Technical Regulations TR CU 009/2011

Amendments enter into force on 1 January 2027

This page shows the version currently in force. Decision No. 74 of the Council of the Eurasian Economic Commission dated 12.09.2025 introduced amendments to the regulation that take effect on **1 January 2027**. If you are planning certification from that date, refer to the new version.

Note by IZPI!

The Decision provides for amendments by Decision of the Council of the Eurasian Economic Commission of 12.09.2025 No. 74 (enters into force upon expiry of 12 months from the date of its official publication); of 12.09.2025 No. 74 (enters into force on 01.01.2027).
In accordance with Article 13 of the Agreement on Common Principles and Rules of Technical Regulation in the Republic of Belarus, the Republic of Kazakhstan and the Russian Federation of 18 November 2010, the Customs Union Commission (hereinafter, the Commission) **decided:**

1. To adopt the Technical Regulation of the Customs Union "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011) (attached).

2. To approve:

2.1. The list of international and regional (interstate) standards and, in their absence, national (state) standards, the voluntary application of which ensures compliance with the requirements of the Technical Regulation of the Customs Union "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011) (attached);

Footnote. Item 2.1 as amended by Decision of the Board of the Eurasian

Economic Commission of 10.04.2018 No. 54 (enters into force upon expiry of 30 calendar days from the date of its official publication).
2.2. The list of international and regional (interstate) standards and, in their absence, national (state) standards containing rules and methods of research (testing) and measurement, including sampling rules, necessary for the application and implementation of the requirements of the Technical Regulation of the Customs Union "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011) and for the conformity assessment of objects of technical regulation (attached).

Footnote. Item 2.2 as amended by decisions of the Board of the Eurasian Economic Commission of 17.05.2016 No. 46 (enters into force upon expiry of 30 calendar days from the date of its official publication); of 10.04.2018 No. 54 (enters into force upon expiry of 30 calendar days from the date of its official publication).
3. To establish that:

3.1. The Technical Regulation of the Customs Union "On the Safety of Perfumery and Cosmetic Products" (hereinafter, the Technical Regulation) enters into force on 1 July 2012;

3.2. Documents on the assessment (confirmation) of conformity with mandatory requirements established by regulatory legal acts of the Customs Union or by the legislation of a Member State, issued or adopted in respect of products that are an object of technical regulation of the Technical Regulation (hereinafter, products) before the date of entry into force of the Technical Regulation, shall remain valid until the expiry of their validity period, but not later than 1 July 2014. The said documents issued or adopted before the date of official publication of this Decision shall remain valid until the expiry of their validity period.

From the date of entry into force of the Technical Regulation, the issuance or adoption of documents on the assessment (confirmation) of conformity of products with mandatory requirements previously established by

regulatory legal acts of the Customs Union or by the legislation of a Member State shall not be permitted;

3.3. Until 1 July 2014, the manufacture and placing on the market of products in accordance with mandatory requirements previously established by regulatory legal acts of the Customs Union or by the legislation of a Member State shall be permitted, provided that there are documents on the assessment (confirmation) of conformity of the products with the said mandatory requirements issued or adopted before the date of entry into force of the Technical Regulation.

Such products shall be marked with the national mark of conformity (mark of circulation on the market) in accordance with the legislation of the Member States or with Commission Decision of 20 September 2010 No. 386.

Marking of such products with the single mark of product circulation on the market of a Member State shall not be permitted;

3.4. Circulation of products placed on the market during the validity period of the documents on the assessment (confirmation) of conformity referred to in subitem 3.2 of this Decision shall be permitted during the shelf life of the products established in accordance with the legislation of the Member State.

4. The Commission Secretariat, jointly with the Parties, shall prepare a draft Plan of measures necessary for the implementation of the Technical Regulation and, within three months from the date of entry into force of this Decision, ensure its submission to the Commission for approval in accordance with the established procedure.

5. The Belarusian Party, with the participation of the Parties and on the basis of monitoring the results of the application of standards, shall ensure the preparation of proposals for updating the lists of standards referred to in item 2 of this Decision and their submission, at least once a year from

the date of entry into force of the Technical Regulation, to the Commission Secretariat for approval by the Commission in accordance with the established procedure.

6. This Decision enters into force 15 days after the date of its official publication, unless within this period the Parties declare the suspension of their approval of the Technical Regulation.

Members of the Customs Union Commission:

For the Republic of Belarus	For the Republic of Kazakhstan	For the Russian Federation
S. Rumas	U. Shukeyev	I. Shuvalov

APPROVED
by Decision of the Commission
of the Customs Union
of 23 September 2011 No. 799

Footnote. Throughout the text, the words "Member State of the CU", "Member State of the Eurasian Economic Union" and "Member State of the Customs Union" in the corresponding number and case have been replaced with the words "Member State" in the corresponding number and case, and the words "this Technical Regulation of the CU" in the corresponding case have been replaced with the words "this Technical Regulation" in the corresponding case by decisions of the Council of the Eurasian Economic Commission of 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication).

TECHNICAL REGULATION
OF THE CUSTOMS UNION

TR CU 009/2011
On the Safety of Perfumery and Cosmetic Products

Annex 3.	List of Colorants Permitted for Use in Perfumery and Cosmetic Products
Annex 4	List of Preservatives Permitted for Use in Perfumery and Cosmetic Products
Annex 5.	List of UV Filters Permitted for Use in Perfumery and Cosmetic Products
Annex 6.	Requirements for the Hydrogen Ion Exponent (pH) Value of Perfumery and Cosmetic Products
Annex 7.	Microbiological Safety Indicators of Perfumery and Cosmetic Products
Annex 8.	Requirements for Toxicological Indicators of Perfumery and Cosmetic Products
Annex 9.	Requirements for Clinical and Laboratory Indicators of Perfumery and Cosmetic Products

Annex 10.	Requirements for Clinical Indicators of Oral Hygiene Products
Annex 11.	Symbol Indicating the Availability of Additional Information on Perfumery and Cosmetic Products
Annex 12.	List of Perfumery and Cosmetic Products Subject to State Registration

Article 1. Scope of Application

1. This Technical Regulation applies to:

finished perfumery and cosmetic products (including those on carriers) placed on the market in the territories of the Member States of the Eurasian Economic Union (hereinafter, respectively, the Member States and the Union);

perfumery and cosmetic products applied to light industry articles placed on the market in the territories of the Member States, which are not classified as perfumery and cosmetic products on carriers;

perfumery and cosmetic products applied to articles (other than light industry articles) placed on the market in the territories of the Member States, which are not classified as perfumery and cosmetic products on carriers.

2. Perfumery and cosmetic products that are applied to articles placed on the market in the territories of the Member States and are not classified as perfumery and cosmetic products on carriers are subject only to the requirements of paragraphs 2 – 6, 9.1, 9.3 and 10, as well as paragraph 9.2 (with regard to information on special precautions (if necessary) and information on the methods of use of the perfumery and cosmetic products, the absence of which may lead to improper use of the perfumery and cosmetic products by the consumer (if necessary)), of Article 5 of this Technical Regulation.

3. This Technical Regulation does not apply to the following products:

1) products intended for ingestion, inhalation, injection or implantation into the human body;

2) products for permanent make-up (tattooing) applied with disruption of the skin integrity;

3) products used for diagnostics (ultrasound gel, etc.) and treatment, including those registered as a medicinal product, a medical device or a traditional medicine remedy;

4) products intended for pain relief, resolution of bruises, relief of leg swelling, treatment of bruises and wounds, removal of benign neoplasms (warts, papillomas, etc.), acting on veins and joints;

5) products intended for the ear canal, the nasal mucosa or the mucous membrane of the eyes;

6) disinfectants and antiseptics, repellents;

7) products intended for the detection of dental plaque;

8) lubricants, intimate lubricating gels;

9) fluoride dental varnishes;

10) moist toilet paper;

11) products intended for the mucous membrane of the genitals and anus;

12) adhesive for attaching eyelashes, rhinestones, nail tips.

4. This Technical Regulation establishes requirements for products and for the related production processes in order to protect human life and health and property, protect the environment, and prevent actions that mislead consumers regarding the intended use and safety of the products.

Footnote. Article 1 as amended by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force upon

expiry of 12 months from the date of its official publication).

Article 2. Rules for Identification of Perfumery and Cosmetic Products

1. For the purposes of applying this Technical Regulation, identification is carried out on the basis of the features characterizing perfumery and cosmetic products and established in this Technical Regulation.

2. The features characterizing perfumery and cosmetic products are:

- method of use of the product - perfumery and cosmetic products are intended exclusively for external application to specific parts of the human body;

- site of application of the product - perfumery and cosmetic products are applied to the skin, hair, nails, lips, teeth, oral mucosa and external genitalia;

- purposes of use of the product (individually or in any combination) - cleansing and/or changing the appearance of the skin, hair, nails, lips, teeth, oral mucosa and external genitalia without disrupting their integrity, imparting a pleasant odor to them and/or odor correction, and maintaining them in a normal functional condition.

3. Identification of perfumery and cosmetic products for the purposes of applying this Technical Regulation is carried out on the basis of documentation. Technical documents, and/or supply contracts, and/or specifications, and/or labels, and/or product leaflets and other documents characterizing the products may be used as documentation.

Article 3. Terms and Definitions

For the purposes of applying this Technical Regulation, the concepts established by the Protocol on Technical Regulation within the Eurasian Economic Union (Annex No. 9 to the Treaty on the Eurasian Economic Union of 29 May 2014) and by the standard conformity assessment schemes approved by Decision of the Council of the Eurasian Economic

Commission No. 44 of 18 April 2018 are used, as well as the following concepts, which mean the following:

"safety of perfume and cosmetic products" means the combination of properties and characteristics of perfume and cosmetic products that ensure the absence of any harmful effect of perfume and cosmetic products on the consumer when they are used in accordance with their intended purpose and method of application during their shelf life;

"secondary packaging" means packaging into which perfume and cosmetic products in primary packaging are placed, but which is not transport packaging;

"finished products" means perfume and cosmetic products that have passed through all stages of production, filling (packing) and labelling;

"demineralising action" means the ability of perfume and cosmetic products or their ingredients to remove mineral substances from the enamel and bone structures of teeth without loss of their integrity;

"ingredient of perfume and cosmetic products (ingredient)" means a substance or mixture of substances of synthetic or natural origin used for the production of perfume and cosmetic products. Ingredients do not include impurities in ingredients, or materials used in the manufacturing process of perfume and cosmetic products that are not present in the finished products;

"toxicity index" means a value reflecting the degree of toxicity of perfume and cosmetic products;

"preservatives" means chemical substances of natural and (or) synthetic origin that ensure the resistance of perfume and cosmetic products to microbial contamination during their shelf life;

"decorative cosmetics" means perfume and cosmetic products for make-up of the face, eyes, lips, eyebrows and body, and for colouring hair and

nails;

"children's cosmetics" means perfume and cosmetic products intended for children under 14 years of age;

"cosmetics for tattooing" means perfume and cosmetic products intended for applying a design to the skin without injection (face and body paints, including those applied by airbrush, temporary tattoos, skin transfers, henna for tattooing, etc.);

"intimate cosmetics" means perfume and cosmetic products for the care of the external genital organs and the areas of the body around them;

"professional cosmetics" means perfume and cosmetic products intended for use by legal entities and individual entrepreneurs when providing hairdressing and (or) cosmetic services;

"family cosmetics" means perfume and cosmetic products intended for the whole family;

"margin of safety MoS (The Margin of Safety)" means the value obtained by dividing the highest dose or exposure level at which no adverse effects are observed by the systemic exposure dose of an ingredient of perfume and cosmetic products;

"colorants" means chemical substances of natural or synthetic origin intended to impart colour to perfume and cosmetic products, or contained in perfume and cosmetic products intended for colouring the skin, hair and nails;

"readily fermentable carbohydrates" means carbohydrates that are broken down in the oral cavity to form acids that cause destruction of the tooth enamel surface. Readily fermentable carbohydrates include glucose, fructose, galactose, sucrose, lactose, cellobiose and other mono- and oligosaccharides, as well as the polysaccharides processed starch, inulin and glycogen. Readily fermentable carbohydrates are contained in sugar,

honey, maple syrup, etc. Readily fermentable carbohydrates do not include pectins, dietary fibre (cellulose), hemicelluloses or sucralose;

"labelling of perfume and cosmetic products (labelling)" means information for the consumer in the form of inscriptions and numerical, colour and graphic symbols applied to the consumer packaging, label or tag;

"name of perfume and cosmetic products" means the verbal and (or) numerical designation of an item assigned to it by the manufacturer;

"intended purpose of perfume and cosmetic products" means a functional property of perfume and cosmetic products that specifies their area of application;

"product type designation of perfume and cosmetic products" means the designation of a type of homogeneous perfume and cosmetic products (toothpaste, lotion, perfume, cream, etc.);

"nanomaterial" means an insoluble or biopersistent and intentionally manufactured material with at least one external dimension or internal structure in the range from 1 to 100 nm;

"circulation of products on the market" means the movement on the market of the Member States of perfume and cosmetic products dispatched from the warehouse of the manufacturer, the person authorised by the manufacturer, or the importer (seller), or shipped without warehousing, for sale or other transfer to consumers in the territories of the Member States;

"general toxic action" means the adverse effect of harmful substances on the organism;

"homogeneous perfume and cosmetic products" means products of the same product type designation that are similar in ingredient composition and meet the same requirements;

"perfume and cosmetic products (PCP)" means a substance or mixtures of substances intended for application directly to the external surfaces of the human body (skin, hair, nails, lips and external genital organs) or to the teeth and the mucous membrane of the oral cavity with the sole or main purpose of cleaning them, changing their appearance, imparting a pleasant odour, and (or) correcting body odour, and (or) protecting them, and (or) keeping them in good condition, and (or) caring for them;

"perfume and cosmetic products for personal protection of the skin against harmful occupational factors" means perfume and cosmetic products intended for application to human skin to protect it, or used to clean the skin in order to reduce exposure to harmful and hazardous factors in industrial production conditions, which are not objects of technical regulation of the Technical Regulation of the Customs Union "On the Safety of Personal Protective Equipment" (TR CU 019/2011);

"perfume and cosmetic products for artificial tanning" means products that give the skin a tanning effect by means of a chemical reaction without exposing the skin to UV rays (self-tanner, self-bronzer, etc.);

"perfume and cosmetic products on carriers" means perfume and cosmetic products applied to textile, pulp-and-paper, polymer and similar materials (cosmetic wipes, masks on a woven or non-woven base, wax strips, peeling socks, cosmetic plasters, patches, etc.). Such products perform only a perfume and cosmetic function;

"perfumery and cosmetic product applied to an article" – a perfumery and cosmetic product applied to an article that is not a perfumery and cosmetic product and that performs functions other than the functions of a perfumery and cosmetic product (light industry articles with a perfumery and cosmetic product applied to and (or) incorporated into them that is released from them during use, toothpaste applied to a toothbrush, liquid soap applied to a sponge, etc.), which is not a perfumery and cosmetic product on carriers;

"perfumery and cosmetic product obtained from a kit" – a product obtained after mixing the components contained in a kit in accordance with the instructions enclosed with it (for example, a soap-making kit, a shampoo-making kit, a balm-making kit, a perfume-making kit, etc.);

"primary packaging" – packaging in direct contact with the perfumery and cosmetic product;

"peeling" – a perfumery and cosmetic product for removing surface cells of the epidermis by chemical action;

"consumer packaging of a perfumery and cosmetic product" – primary packaging or a combination of primary and secondary packaging of a perfumery and cosmetic product that reaches the consumer together with the perfumery and cosmetic product and does not perform the function of transport packaging;

"sample (tester)" – a sample of a perfumery and cosmetic product presented in a small pack size and (or) simplified packaging, intended for testing and trial;

"microbiologically low-risk product" – a product whose medium excludes physical and chemical conditions for the growth and (or) survival (preservation of viability) of microorganisms;

"irritant action" – a localized non-specific inflammatory reaction of the skin or mucous membrane upon contact exposure to a perfumery and cosmetic product;

"formulation" – the complete list, established by the manufacturer, of the ingredients contained in a perfumery and cosmetic product, indicating the mass fraction of the ingredients;

"sachet" – a perfumery and cosmetic product in single-use flexible consumer packaging;

"sensitizing action" – the ability of a substance, upon entering the body, to cause the development in it of specific hypersensitivity mediated by hyperergic immune mechanisms;

"trace amount of a substance" – an unintentionally present amount of a prohibited substance resulting from impurities of natural or synthetic ingredients, from the process of production, storage, or migration from packaging, which is technically unavoidable when the requirements for production conditions are complied with;

"oral hygiene products" – perfumery and cosmetic products with a hygienic and (or) preventive action, intended for direct application to the teeth, gums and oral mucosa with the sole and (or) main purpose of cleaning them, perfuming them, changing their appearance, protecting them, or keeping them in good condition;

"shelf life of a product (perfumery and cosmetic product, raw material)" – the period after the expiry of which the product is considered unfit for its intended use. The shelf life is established by the product manufacturer in the technical documents. During the shelf life of a perfumery and cosmetic product, the manufacturer is obliged to guarantee the conformity of the perfumery and cosmetic product with the safety requirements for the life and health of the consumer and the preservation of its consumer properties, provided that the storage conditions are complied with. During the shelf life of a raw material for which a shelf life has been established, the manufacturer of the raw material is obliged to guarantee the conformity of the properties and characteristics of the raw material specified by it in the technical documents, provided that the storage conditions are complied with;

"storage period of a product (raw material, packaging, labelling materials)" – the period during which the product, provided that the established storage conditions are complied with, retains the properties and characteristics established in the technical documents. The storage period

is established in the technical documents. Expiry of the storage period does not mean that the product is unfit for its intended use;

"standard storage conditions for perfumery and cosmetic products" – storage temperature for liquid products – not lower than 5 °C and not higher than 25 °C, for solid toilet soap – not lower than minus 5 °C, for other perfumery and cosmetic products – not lower than 0 °C and not higher than 25 °C; absence of direct exposure to sunlight;

"sterile perfumery and cosmetic product" – a perfumery and cosmetic product packed in hermetically sealed packaging, intended for single use, for which sterility requirements have been established;

"technical documents" – documents in accordance with which perfumery and cosmetic products are manufactured, stored and transported (technical specifications, standards, process instructions, formulations, specifications and others);

"transport packaging" – packaging intended for the storage and transportation of products in order to protect them from damage during movement, and forming an independent transport unit;

"UV filter (ultraviolet filter)" – a substance intended to protect the skin from the penetration of ultraviolet radiation by absorption, reflection or scattering;

"label" – a means of information about a packaged perfumery and cosmetic product placed on the consumer packaging;

"tag" – an article of any shape, size and material intended for the application of labelling, attached to or enclosed with a unit of a perfumery and cosmetic product or inserted into the packaging.

Footnote. Article 3 as amended by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force upon expiry of 12 months from the date of its official publication).

Article 4. Rules for the Circulation of Perfumery and Cosmetic Products on the Union Market

1. Perfumery and cosmetic products shall be placed on the market in the territories of the Member States provided that they have undergone the necessary conformity assessment procedures established by this Technical Regulation and by other technical regulations of the Union (Customs Union) that apply to them.

2. Perfumery and cosmetic products that comply with the requirements of this Technical Regulation and with the requirements of other technical regulations of the Union (Customs Union) applicable to them, and that have undergone the conformity assessment procedure, shall bear the single mark of product circulation on the Union market.

Perfumery and cosmetic products whose conformity with the requirements of this Technical Regulation and with the requirements of other technical regulations of the Union (Customs Union) applicable to them has not been confirmed shall not be marked with the single mark of product circulation on the Union market and shall not be permitted to be placed on the Union market.

3. The circulation of perfumery and cosmetic products placed on the market in the customs territory of the Union during the period of validity of the declaration of conformity or the certificate of State Registration confirming the conformity of the perfumery and cosmetic products with the requirements of this Technical Regulation (the requirements of other technical regulations of the Union (Customs Union)) is permitted until the expiry of the shelf life of the products established by the manufacturer.

Footnote. Article 4 as amended by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force upon expiry of 12 months from the date of its official publication).
Article 5. Requirements for Perfumery and Cosmetic Products

1. The safety of perfumery and cosmetic products is ensured by a set of requirements:

1) for composition;

2) for physicochemical indicators;

3) for microbiological indicators;

4) for the content of toxic elements;

5) for toxicological indicators;

6) for clinical (clinical and laboratory) indicators;

7) for production;

8) for consumer packaging;

9) for product labelling.

2. Requirements for the composition of perfumery and cosmetic products

2.1. the use in perfumery and cosmetic products of the substances listed in Annex 1 is prohibited;

2.1[1]. the use of sucrose and other readily fermentable carbohydrates as ingredients in oral hygiene products is prohibited;

2.2. the use in perfumery and cosmetic products of substances subject to the restrictions specified in Annex 2 is permitted;

2.3. the use in perfumery and cosmetic products of colorants in accordance with Annex 3 is permitted;

2.4. the use in perfumery and cosmetic products of preservatives in accordance with Annex 4 is permitted;

2.5. the use in perfumery and cosmetic products of ultraviolet filters in accordance with Annex 5 is permitted.

2.6. The lists of ingredients of perfumery and cosmetic products given in Annexes 1 - 5 are updated in accordance with the established procedure.

2.7. Family cosmetics intended, among others, for children under 14 years of age shall not contain ingredients that are not permitted for use in products for children under 14 years of age in accordance with Annexes 2 – 5 to this Technical Regulation.

3. Requirements for the physicochemical indicators of perfumery and cosmetic products

For the perfumery and cosmetic products specified in Annex 6, the pH value shall comply with the standard established in that Annex. Requirements for the pH value are not regulated for the following perfumery and cosmetic products:

depilatory waxes and wax strips;

anhydrous hair styling gels;

fat- and wax-based cosmetic products;

hair sprays;

solid toilet soap;

powdered and compact decorative products;

anhydrous cosmetic oils;

cosmetic products for nail modelling and polishing;

perfumery products (solid, dry, liquid);

anhydrous cosmetic nail care products based on organic solvents;

solid deodorants and solid antiperspirants;

solid bath products;

100-percent essential oils.

For fluoride-containing oral hygiene products, the fluoride content (calculated on the molar mass of fluorine) shall comply with the requirements set out in Annex 2.

4. Requirements for microbiological indicators of perfumery and cosmetic products

4.1. Microbiological indicators of perfumery and cosmetic products shall comply with the requirements set out in Annex 7.

4.2. Microbiological indicators are not determined for perfumery and cosmetic products with a microbiologically low risk, including:

1) perfumery and cosmetic products containing ethyl alcohol and (or) organic solvents at a concentration of more than 20 % by volume, used without dilution;

2) nail varnishes, except water-based nail varnishes;

3) deodorants, deodorant-antiperspirants, antiperspirants;

4) oxidative hair dyes, lightening and highlighting products;

5) permanent waving products and hair straightening products based on thiol compounds;

6) depilatory products;

7) fat-based solid toilet soap;

8) dry pencils;

9) bath salts;

10) 100-percent essential oils;

11) tooth whitening products containing hydrogen peroxide or other components releasing hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (present as an ingredient or released) of 0,1 – 6,0 %;

12) shaving products (creams, gels, etc.) having a pH value of more than 10,0.

5. Requirements for the content of toxic elements

In perfumery and cosmetic products containing raw materials of natural plant or natural mineral origin in an amount of more than 1 %, the content of toxic elements shall not exceed: arsenic - 5,0 mg/kg; mercury - 1,0 mg/kg; lead - 5,0 mg/kg.

6. Requirements for toxicological and clinical (clinical-laboratory) indicators of perfumery and cosmetic products

6.1. Perfumery and cosmetic products, when used as intended, shall be safe for humans.

6.1.1. Where the assessment of toxicological indicators is carried out by determining the skin irritant effect, the irritant effect on mucous membranes and the general toxic effect, the toxicological indicators of perfumery and cosmetic products shall comply with the requirements according to Annex 8.

Where the assessment of toxicological indicators of perfumery and cosmetic products is carried out on the basis of an analysis of the toxicological characteristics of the ingredients, the perfumery and cosmetic product shall be considered toxicologically safe if it contains ingredients each of which has a margin of safety (MoS) greater than or

equal to 100. An ingredient shall be recognised as safe without calculation of the MoS if it has no dermal absorption or if the level of such absorption is low.

6.1.2. Clinical (clinical-laboratory) indicators of perfumery and cosmetic products shall comply with the requirements set out in Annex 9.

6.1.3. Clinical indicators of oral hygiene products shall comply with the requirements set out in Annex 10.

For liquid oral hygiene products and liquid tooth whitening products not containing fluorine compounds, with a pH value of less than 5,5 and (or) containing substances that cause enamel demineralisation, the absence of a demineralising effect is determined by laboratory methods *(in vitro)*.

6.1.4. Toxicological tests of decorative cosmetics, including nail varnishes, as well as hair colouring and tinting products of the same product type name and product name, manufactured according to a single technical document but differing in shade, are carried out in full on a sample of not less than 30 % of the shades submitted for examination. The samples examined shall contain the maximum amount of each specific colorant. For the remaining shades submitted for examination, only the sensitising effect is determined.

6.1.5. Toxicological and clinical (clinical-laboratory) indicators of perfumery and cosmetic products are determined in accredited testing laboratories (centres) after positive results of testing the products for physico-chemical and microbiological indicators have been obtained.

7. Requirements for the production of perfumery and cosmetic products

7.1. Requirements for production processes

To ensure the safety of perfumery and cosmetic products during production, it is necessary to:

- carry out their production in accordance with the requirements of clause 7.2 of this technical regulation;

- carry out the production of products in production premises that comply with the requirements of clause 7.3 of this technical regulation;

- use process equipment and implements that comply with the requirements of clause 7.4 of this technical regulation;

- admit to the production of products personnel who meet the requirements of clause 7.5 of this technical regulation;

7.2. Ensuring the safety of perfumery and cosmetic products during their production

The safety of products during their production and circulation shall be ensured by:

- selecting the production processes necessary to ensure product safety;

- selecting a sequence and flow of production processes that excludes contamination of raw materials, packaging materials, bulk products and finished products;

- defining, in production control programmes, the controlled stages of production processes and of the products at the stages of their production;

- carrying out control of raw materials, processing aids and auxiliary materials used in the production of products, as well as control of bulk and finished products, by means ensuring the necessary reliability and completeness of control;

- establishing requirements for raw materials, packaging, labelling materials, acceptance criteria, measures to be taken in the event of defects or minor deviations, and conditions of transportation and storage. Raw materials, packaging and labelling materials that do not meet the

acceptance criteria shall be appropriately marked and placed so as to prevent their use in production. Raw materials, packaging and labelling materials for which a storage period has been established shall, after the storage period has expired, be checked for conformity with the properties and characteristics specified by the manufacturer of the raw materials, packaging and labelling materials in the technical documents, in order to determine their suitability for further use and to establish a new storage period. The use in production of raw materials whose shelf life has expired is prohibited;

- monitoring the operation of process and measuring equipment in a manner that ensures the production of products meeting the requirements of this Technical Regulation;

- ensuring the documentation of information on the controlled stages of technological processes and of the results of control of perfumery and cosmetic products at the stages of their production;

- recording and registering in detail all technological operations for each stage (specifying the raw materials added, temperatures, speeds, mixing times, sampling, cleaning, sanitary treatment of equipment, if necessary, and transfer of bulk products)

- observing the storage conditions of products;

- maintaining production premises, process equipment and implements used in the production of products in a condition that prevents contamination of the products;

- selecting methods by which workers comply with personal hygiene rules in order to ensure product safety;

- using methods that ensure the safety of bulk and finished products, and establishing the frequency of cleaning, washing, disinfection, disinsection and deratization of production premises, process equipment and

implements used in the production of perfumery and cosmetic products;

- keeping and storing documentation, on paper and (or) electronic media, confirming the conformity of the manufactured products with the requirements established by this Technical Regulation;

- traceability of perfumery and cosmetic products at all stages of production;

- carrying out control of finished products, in accordance with established test methods, for conformity with acceptance criteria before placing them on the market.

- retaining archive samples from each batch of perfumery and cosmetic products.

7.3. Requirements for production premises in which perfumery and cosmetic products are produced

7.3.1. Production premises shall meet the following requirements:

- ventilation and/or air-conditioning systems installed in production premises shall ensure that the air supplied to the production premises cannot be a source of product contamination;

- lighting systems installed in production premises shall make it possible to contain all fragments and prevent them from entering the products, and shall also not be a source of product contamination;

- production premises shall not contain staff changing rooms for storing personnel's personal and work (special) clothing;

- production premises shall not contain toilets, and toilet doors shall not open directly into production premises;

- the layout of production premises shall make it possible to ensure the sequence and flow of technological processes that exclude counter-flows

or cross-flows of raw materials, bulk and finished products, and contaminated and clean implements, where this is necessary to prevent product contamination;

- production premises shall be arranged so as to ensure protection against the entry of animals, including rodents and insects;

- production premises shall be arranged so as to exclude areas from which dirt, condensate, mould and other similar sources of product contamination cannot be removed;

- the floor construction shall prevent the accumulation of water in the production premises;

- floor, wall and door surfaces shall be made of waterproof, washable and non-toxic materials that can be subjected to sanitary treatment and disinfection;

- ceilings (where there are no ceilings, the inner surface of the roof) and structures located above production premises shall prevent any particles or condensate from entering the products;

- opening windows (transoms) shall be fitted with protective insect screens;

- sewerage equipment in production premises shall be designed and constructed so as to exclude the risk of product contamination.

7.3.2. The storage in production premises of any substances and materials not used in the production of perfumery and cosmetic products is not permitted, with the exception of detergents and disinfectants. Detergents and disinfectants may be stored in specially designated areas of the production premises.

7.4. Requirements for process equipment and implements used in the production of perfumery and cosmetic products

7.4.1. Process equipment and implements used in the production of perfumery and cosmetic products shall:

- allow them to be sanitized and disinfected;

- be made of materials that are not sources of product contamination.

7.4.2. Process equipment shall, where necessary to achieve the objectives of this Technical Regulation, be fitted with appropriate control instruments.

7.5. Requirements for workers engaged in the production of perfumery and cosmetic products

7.5.1. Workers engaged in the production of perfumery and cosmetic products who come into direct contact with raw materials, bulk and finished products, and materials and implements in contact with the products (raw materials) shall observe personal hygiene and wear clean special work clothing and footwear to the extent necessary so as not to be a source of product contamination.

7.5.2. Workers engaged in the production of perfumery and cosmetic products are prohibited from bringing into production premises any items that are not used in the performance of their job duties and may become sources of product contamination, and from smoking and eating in these premises.

8. Requirements for the Consumer Packaging of Perfumery and Cosmetic Products

8.1. Perfumery and cosmetic products shall be placed in consumer packaging (primary packaging or a combination of primary and secondary packaging) and closures (if any) that ensure the safety of such products and the preservation of their consumer properties during circulation throughout the shelf life, and that comply with the requirements of this Technical Regulation and of the Technical Regulation of the Customs

Union "On the Safety of Packaging" (TR CU 005/2011).

8.2. Oral hygiene products shall be packed in consumer packaging that guarantees first-opening control, or in consumer packaging protected against unauthorized opening until it is opened by the consumer. Other perfumery and cosmetic products may be packed in consumer packaging that guarantees first-opening control, or in consumer packaging protected against unauthorized opening until it is opened by the consumer.

8.3. It is not permitted to place on the market perfumery and cosmetic products in consumer packaging whose external design (the combination of graphic images and text information applied to the packaging) is identical to the external design of the packaging of food products, including alcoholic beverages, or of medicinal products, and misleads the consumer as to the purpose of the packaged product.

9. Requirements for the Labeling of Perfumery and Cosmetic Products

9.1. Perfumery and cosmetic products shall be labeled by applying information for the consumer in the form of inscriptions and numerical, color and graphic designations to the consumer packaging, label or tag, taking into account the labeling requirements specified in Annexes 2, 3, 4, 5. If information on the composition of the product and on precautions is placed on a tag attached to or accompanying each unit of the product and (or) inserted into the secondary packaging, a graphic symbol in the form of a hand on an open book (Annex 11) shall be applied to the consumer packaging. Instead of the graphic symbol, it is permitted to provide information indicating where this information is placed (for example: "Composition/Ingredients and precautions see on.

9.2. The labeling of perfumery and cosmetic products shall contain the following information:

- the generic name and the product name (if any) of the perfumery and cosmetic product. The product name assigned by the manufacturer to a

perfumery and cosmetic product shall not be identical or confusingly similar to the trade name of a registered medicinal product or to the name of a medical device. The criterion of similarity is a semantic (meaning-based), phonetic (sound-based) or transliteration-based (relating to the use of another alphabet to render the name) feature determining the similarity of invented names. At the same time, the product name (generic name) of a perfumery and cosmetic product may include information on the ingredients contained in the product, including biologically active substances (hand cream with vitamin F, after-sun cream with d-panthenol, face cream with hyaluronic acid, etc.);

- the purpose of the perfumery and cosmetic product, if it does not follow from the generic name of the product;

- cosmetics intended for children (children's and family cosmetics) shall bear the corresponding information in the labeling (children's, for children, for newborns, family, for the whole family, or another inscription classifying the product as children's or family cosmetics) in the product name, and (or) the name of the series (line), and (or) in the purpose. Family cosmetics shall bear information on the minimum age of the users for whom they are intended. Children's cosmetics shall contain information on the age of the children for whom they are intended. The presence in the labeling of a perfumery and cosmetic product of conditions of use and warnings that must be communicated to the consumer in accordance with the requirements of Annexes 2 – 5 to this Technical Regulation (for example, "do not use for children under ...", "children aged 6 years and under...", etc.) does not classify the product as children's cosmetics but constitutes warning information;

- the name of the manufacturer (producer) and its location (legal address, including the country);

- the Country of Origin of the perfumery and cosmetic product (if the country where the production of the product is located does not coincide

with the legal address of the manufacturer);

- if the manufacturer does not accept claims in the territory of a Member State, the labeling of the perfumery and cosmetic product shall use phrases that directly or indirectly convey to the consumer information identifying the organization or individual entrepreneur authorized to accept claims from consumers (for example, "for questions/suggestions contact", "consumer service", "address in the Member State", "supplier" and similar), and shall also state its name and location; a telephone number and e-mail address may be stated. If the manufacturer itself accepts claims in the territory of the Member State, the phrase "authorized to accept claims" and phrases of similar meaning are not required in the labeling of the perfumery and cosmetic product;

- the nominal quantity of the product in the consumer packaging (volume, and (or) mass, and (or) number of pieces). For solid toilet soap, the nominal mass of the bar at the time of packing. For products with a nominal volume of less than 5 мл (ml) or a nominal mass of less than 5 г (g), as well as for product samples (testers), the nominal quantity need not be indicated;

- Color and/or Tone (for decorative cosmetics and coloring products);

- the mass fraction of fluoride calculated on the basis of the molar mass of fluorine (%, or mg/kg, or ppm) for oral hygiene products containing fluorine compounds;

- the shelf life shall be indicated in one of the following ways:

"Годен до..." (date);

"Использовать до..." (date);

"Дата изготовления..." (date) and "Срок годности..." (months, years);

"Дата изготовления..." and "Годен до..." (date);

"Дата изготовления..." and "Использовать до..." (date);

"Срок годности... from the date of manufacture indicated on the packaging" (months, years).

The words "Дата изготовления..." in the marking may be replaced by the word "Изготовлено...".

Where the shelf life is applied to the bottom of the primary packaging, the seam of a tube, etc., the information on where the shelf life of the product is applied may be given in the form of the following wording: "Date of manufacture (manufactured): indicated on/see the packaging", "Best before (or use by): indicated on/see the packaging" or "Date of manufacture (manufactured)/Best before (or use by): indicated on/see the packaging. For products whose consumer packaging is small in size or has a complex shape (lipstick, eyeliner, eye shadow, mascara, etc.), the shelf life may be indicated as follows: "До..." (date). The date includes the month and year (mm.yyyy or mm.yy) or the day, month and year (dd.mm.yyyy or dd.mm.yy). The shelf life may be indicated without a separator or with a separator. A hyphen "-", a full stop ".", a slash "/", etc. may be used as the separator. A word-and-number format of the date is permitted, in which case the month is written as a word. Where the shelf life of the product is indicated as "До..." (month, year), the shelf life expires on the last day of the preceding month; if "До..." (day, month, year), the shelf life expires before the specified day;

- a description of the storage conditions where these conditions differ from the standard ones;

- Special Precautions (where necessary) when using the product, including information on the warnings set out in Annexes 2-5 to this Technical Regulation;

- the batch number or a special code allowing the batch of perfumery and cosmetic products to be identified;

- information on the methods of use of the perfumery and cosmetic product, the absence of which may lead to misuse of the perfumery and cosmetic product by the consumer;

- the List of Ingredients in accordance with paragraph 9.3. of this Article.

For aerosol products with a propellant, warning inscriptions (warnings) shall be given regarding:

protection from direct sunlight and from heating of the container;

the rules for use by children;

flammability and the danger of spraying near an open flame and red-hot objects (where necessary);

the danger of contact with the eyes or with irritated skin (where necessary);

the impossibility of spraying the product in aerosol packaging with the head pointing down (for products in aerosol packaging containing carbon dioxide or compressed air as the propellant) (where necessary);

the prohibition on breaching the integrity of the aerosol packaging.

For perfumery and cosmetic products for the personal protection of the skin against harmful occupational factors, the product marking shall contain the relevant information on the intended purpose of such products.

The marking of a kit for making perfumery and cosmetic products shall contain information on its contents (the designation, the name (if any) and the quantity of components). Each component of the kit shall bear a designation and a name (if any). The List of Ingredients shall comply with paragraph 9.3 of this Article. The kit shall contain instructions for making the product.

9.3. The List of Ingredients shall be preceded by the heading "Ингредиенты" or "Состав".

If the information is given in accordance with the International Nomenclature of Cosmetic Ingredients (INCI) using letters of the Latin alphabet, the heading "Ингредиенты" or "Состав" may be given together with information indicating where the List of Ingredients is located (for example: "Состав/Ingredients смотри на...").

Ingredients are listed in descending order of their mass fraction in the formulation, and the perfume (fragrance) composition is listed as a single ingredient without disclosing its composition. If the composition contains ingredients (No. 67-92) listed in Annex 2 and their content exceeds a concentration of 0,01% for rinse-off products, 0,001% for leave-on products, they shall be indicated in the list of contents.

For products in aerosol packaging with a propellant, the composition of the propellant is indicated. The composition of the propellant may be indicated either in the List of Ingredients or separately.

Ingredients present in the form of nanomaterials shall be clearly indicated in the List of Ingredients, with the word "нано" or "nano" given in brackets after their name where the ingredients are indicated in accordance with the International Nomenclature of Cosmetic Products (INCI).

Ingredients at a concentration of less than 1 % may be listed in any order after those ingredients whose concentration is more than 1 %.

Colourants may be listed in any order after the other ingredients, in accordance with the colour index or accepted designations.

The list of ingredients may be given either in the state or official language(s) of the Member States in which the perfumery and cosmetic products are sold, or in accordance with the International Nomenclature of Cosmetic Ingredients (INCI) using letters of the Latin alphabet.

On decorative cosmetic products released as a series of different tones, all colorants used in the series may be listed, using the term "может содержать" or the sign (+/-).

Samples intended to be given to consumers shall be labelled in accordance with paragraph 9.2 of this Article.

Samples intended to demonstrate the properties of the product and not intended to be given to consumers shall bear labelling containing the following information:

the generic name, the product name (if any) and the intended use (where necessary) of the product, as specified in the manufacturer's technical documents;

the name of the manufacturer (abbreviated, sufficient to identify the manufacturer) and (or) the trademark;

color and (or) tone (for decorative cosmetics);

shelf life (in accordance with paragraph 9.2 of this Article);

the batch number or a special code allowing the batch of perfumery and cosmetic products to be identified.

This information may be indicated on the consumer packaging or on an information medium located in the immediate vicinity of the sample (tag, leaflet, brochure, etc.). In this case, the graphic symbol in the form of a hand on an open book (Annex 11) does not have to be applied to the consumer packaging.

9.4. The information provided for in paragraph 9.2 of this Article shall be indelible and legible. The labelling shall remain on the consumer packaging during storage, transportation, sale and use of the product throughout its shelf life.

9.5. The information on perfumery and cosmetic products provided for in paragraph 9.2 of this Article shall be given in Russian and, where the legislation of the Member States so requires, in the state language (state languages) of the Member State in whose territory such products are sold.

The name of the manufacturer, the location of the manufacturer and the product name, the name of the color and (or) tone (for decorative cosmetics and coloring products) expressed in words, the name of the line (series), and the units of volume (ml, L) or mass (g, kg) may be written using letters of the Latin alphabet. The country of origin of perfumery and cosmetic products shall be stated in Russian and, where the legislation of the Member States so requires, in the state language (state languages) of the Member State in whose territory such products are sold.

10. Requirements for perfumery and cosmetic products applied onto articles, which do not fall under perfumery and cosmetic products on carriers, placed on the market in the territories of the Member States.

Reports of studies (tests) and measurements (hereinafter, respectively, the test report and tests) and the report (if any) on the results of the assessment of toxicological indicators of perfumery and cosmetic products based on an analysis of the toxicological characteristics of the ingredients, confirming the conformity of perfumery and cosmetic products applied onto articles (other than light industry articles) that fall within the scope of other technical regulations of the Union (Customs Union) and are placed on the market in the territories of the Member States with the requirements of paragraphs 3 – 6 of Article 5 of this technical regulation, are included in the set of evidentiary materials compiled during the conformity assessment of such articles.

Test reports on toxicological and clinical (clinical-laboratory) indicators, except for the indicator "irritant effect on mucous membranes", or the report (if any) on the results of the assessment of toxicological indicators of perfumery and cosmetic products based on an analysis of the

toxicological characteristics of the ingredients, confirming the conformity of perfumery and cosmetic products applied onto light industry articles that fall within the scope of other technical regulations of the Union (Customs Union) and are placed on the market in the territories of the Member States with the requirements of paragraph 6 of Article 5 of this technical regulation, shall be included in the set of evidentiary materials compiled during the conformity assessment of such articles.

Footnote. Article 5 as amended by decisions of the Council of the Eurasian Economic Commission dated 02.12.2015 No. 91 (enters into force 12 months after the date of its official publication); dated 29.03.2019 No. 32 (enters into force 12 months after the date of its official publication); dated 29.11.2024 No. 114 (enters into force 12 months after the date of its official publication).

Article 5^1. Ensuring the conformity of perfumery and cosmetic products with the requirements of the technical regulation

1. The conformity of products with this technical regulation is ensured by direct fulfilment of its safety requirements.

2. Research (test) methods are established in the standards included in the list of standards containing rules and methods of research (testing) and measurement, including sampling rules, necessary for the application and fulfilment of the requirements of this technical regulation and for the conformity assessment of objects of technical regulation.

Footnote. The Technical Regulation was supplemented with Article 5^1 in accordance with the decision of the Council of the Eurasian Economic Commission dated 29.03.2019 No. 32 (enters into force 12 months after the date of its official publication).

Article 6. Conformity Assessment

1. Before being placed on the market in the customs territory of the Union, perfumery and cosmetic products shall undergo assessment of conformity with the requirements of this technical regulation in the following forms:

- proof of conformity in the form of declaration of conformity;

- state registration.

Conformity assessment of perfumery and cosmetic products against the requirements of this technical regulation is carried out in accordance with the standard conformity assessment schemes, taking into account the specifics established by this technical regulation.

2. Perfumery and cosmetic products included in the list according to Annex 12 are subject to state registration.

Perfumery and cosmetic products not included in the list according to Annex 12 to this technical regulation are subject to declaration of conformity.

3. State registration of perfumery and cosmetic products manufactured in the customs territory of the Union shall be carried out at the stage of putting them into production, and of perfumery and cosmetic products imported into the customs territory of the Union, prior to their importation into the customs territory of the Union.

In state registration, the applicants may be a legal entity or a natural person registered as an individual entrepreneur, registered in the territory of a Member State in accordance with its legislation, that is the manufacturer or the importer (seller), or a person authorized by the manufacturer.

State registration of perfumery and cosmetic products shall be carried out by the body (organization, institution) of a Member State authorized to perform such work in accordance with the legislation of that State (hereinafter, the authorized body).

4. State registration of perfumery and cosmetic products includes the following procedures:

a) identification and sampling (specimens) of perfumery and cosmetic products, carried out by the manufacturer, or the applicant, or, on the instruction (application) of the applicant and in the applicant's presence, by an accredited testing laboratory (centre), in accordance with the rules established in the documents included in the list of standards containing the rules and methods of research (testing) and measurement, including sampling rules, necessary for the application and fulfilment of the requirements of this Technical Regulation and for the conformity assessment of objects of technical regulation. Identification and sampling (specimens) may be carried out at the manufacturer's warehouse, or at the applicant's warehouse, or at a temporary storage warehouse, or a customs warehouse.

Sampling (specimens) of perfumery and cosmetic products may be carried out by an accredited inspection body of a Member State included in the unified register of conformity assessment bodies of the Union;

b) testing and, where necessary, assessment of the toxicological indicators of perfumery and cosmetic products on the basis of an analysis of the toxicological characteristics of the ingredients, of the selected samples (specimens) of perfumery and cosmetic products for compliance with the requirements of items 3 – 6 of Article 5 of this Technical Regulation in an accredited testing laboratory (centre);

c) submission by the applicant to the authorized body of the application for state registration and of the documents and information attached to it, as specified in item 5 of this Article;

d) registration of the application for state registration
and of the documents attached to it;

e) examination of the documents submitted by the applicant, including examination of the results of the tests performed on the perfumery and cosmetic products;

f) decision to issue a certificate or to refuse
state registration of the perfumery and cosmetic products;

g) entry of information on the state registration of the products into the national part of the unified register of certificates of state registration of products;

h) issue of the Certificate of State Registration.

5. For state registration of perfumery and cosmetic products, the applicant shall submit the following documents and information to the authorized body:

- application for state registration of the products (may be submitted as an electronic document);

- copies of the manufacturer's documents (formulations, product specifications, other documents), certified by the applicant, containing a list of the ingredients included in the perfumery and cosmetic products, indicating their functions, as well as the mass fraction of the ingredients provided for in Annexes 2 – 5 to this Technical Regulation, for each name of perfumery and cosmetic product;

- copies of documents containing information on the presence of trace amounts of substances in the perfumery and cosmetic products (if trace amounts are present);

- copies, certified by the applicant, of the documents in accordance with which the products were manufactured (technical conditions, specifications, etc.);

- report on the sampling (specimens) of the products;

- copies of documents, certified by the applicant, containing the organoleptic and physicochemical indicators for each product name;

- copies of documents, certified by the applicant, containing information on the nanomaterial (if it is present in the perfumery and cosmetic products): chemical name, particle size, and the physical and chemical properties provided for in Annexes 2 – 5 to this Technical Regulation;

- a labelling sample of the consumer packaging of the perfumery and cosmetic products, certified by the applicant (for example, a copy of the label (packaging), a photo, a layout approved for printing, an annotation containing the claimed consumer properties (if they are claimed in the product labelling), special precautions (if necessary) for use of the products and information on the methods of use of the perfumery and cosmetic products, the absence of which may lead to incorrect use of the perfumery and cosmetic products by the consumer (if any)), confirming compliance with the requirements of items 9.1 – 9.5 of Article 5 of this Technical Regulation;

- test reports on the conformity of the perfumery and cosmetic products with the requirements of paragraphs 3 – 6 of Article 5 of this Technical Regulation and a report (if any) on the results of the assessment of the toxicological indicators of the perfumery and cosmetic products based on an analysis of the toxicological characteristics of the ingredients for conformity with the requirements of paragraph 6 of Article 5 of this Technical Regulation, obtained from an accredited testing laboratory (centre). Test reports on the conformity of the perfumery and cosmetic products with the requirements of paragraphs 3 – 6 of Article 5 of this Technical Regulation, covering tests performed for the purpose of their State Registration, and reports (if any) on the results of the assessment of the toxicological indicators of the perfumery and cosmetic products based on an analysis of the toxicological characteristics of the ingredients for conformity with the requirements of paragraph 6 of Article 5 of this Technical Regulation, issued for the purpose of their State Registration, must have been obtained no earlier than one year before the date on which the authorized body registers the application for State Registration. Where the toxicological indicators of the perfumery and cosmetic products

are assessed based on an analysis of the toxicological characteristics of the ingredients, the set of documents shall include the corresponding reports instead of test reports on the conformity of the perfumery and cosmetic products with the requirements of paragraph 6 of Article 5 of this Technical Regulation;

- copies of the manufacturer's documents on the conformity of production with the requirements of paragraphs 7 – 7.5.2 of Article 5 of this Technical Regulation (a written notification from the manufacturer on the conformity of production with the requirements of this Technical Regulation, or a declaration (statement or written notification) from the manufacturer on compliance with the principles of Good Manufacturing Practice (GMP), or a copy of the certificate of conformity of the quality management system, or a copy of the certificate of conformity of the production of perfumery and cosmetic products with the principles of Good Manufacturing Practice (GMP)), certified by the applicant;

- copies of documents confirming the consumer properties of the perfumery and cosmetic products claimed in the labelling of the consumer packaging (antimicrobial action, anti-wrinkle, SPF factor, anti-caries and anti-inflammatory action of oral hygiene products, etc.), certified by the applicant. Claims regarding the consumer properties of perfumery and cosmetic products must be substantiated taking into account the common criteria set out in Annex 13;

- information on the registration or record (individual, identification) number of the applicant assigned upon the state registration of a legal entity or of a natural person registered as an individual entrepreneur in accordance with the legislation of the Member States;

- a copy of the agreement with the manufacturer, including a foreign manufacturer, under which the person authorized by the manufacturer acts on behalf of that manufacturer in conformity assessment and in placing the perfumery and cosmetic products on the market in the

customs territory of the Union, and bears liability for any non-conformity of the perfumery and cosmetic products with the requirements of the technical regulations of the Union (Customs Union), certified by the applicant (for a person authorized by the manufacturer);

- copies of documents confirming the importation of samples of the perfumery and cosmetic products into the customs territory of the Union, certified in accordance with the legislation of the Member State in which the State Registration of the perfumery and cosmetic products is carried out (scheme 2p).

Translations of the manufacturer's documents from a foreign language into Russian and (or), where the legislation of the Member State so requires, into the state language of the Member State in which the State Registration of the perfumery and cosmetic products is carried out, shall be certified in accordance with the legislation of that Member State, or by a translator holding a document confirming their qualification, or by the applicant.

The applicant shall be liable for the accuracy of the documents and information submitted to the authorized body for the purpose of issuing the Certificate of State Registration of the perfumery and cosmetic products.

6. State Registration of perfumery and cosmetic products shall be carried out according to one of the following schemes:

- scheme 1p applies to products manufactured in the customs territory of the Union;

- scheme 2p applies to products manufactured outside the customs territory of the Union.

6.1. Scheme 1p for the State Registration of perfumery and cosmetic products.

In the State Registration of perfumery and cosmetic products under scheme 1p, the applicant is the manufacturer (the person authorized by the manufacturer).

The manufacturer shall take all necessary measures to ensure the stability of the production process and the conformity of the perfumery and cosmetic products manufactured with the requirements of this Technical Regulation, and shall carry out production control.

For the purpose of testing in the State Registration of perfumery and cosmetic products, the applicant, or an accredited testing laboratory (centre) on the instruction (application) of the applicant and in the applicant's presence, shall carry out identification and sampling of the perfumery and cosmetic products at the manufacturer's warehouse or at the applicant's warehouse.

Sampling of perfumery and cosmetic products may be carried out by an accredited inspection body of a Member State included in the unified register of conformity assessment bodies of the Union.

The results of the identification and sampling of perfumery and cosmetic products shall be documented in the relevant report (reports).

Testing in the State Registration of perfumery and cosmetic products and the assessment of toxicological indicators based on an analysis of the toxicological characteristics of the ingredients of the selected samples of perfumery and cosmetic products for the purpose of State Registration shall be carried out by an accredited testing laboratory (centre).

The applicant shall compile the set of documents and information provided for in paragraph 5 of this Article and submit it to the authorized body.

6.2. Scheme 2p for the State Registration of perfumery and cosmetic products.

In the State Registration of perfumery and cosmetic products under scheme 2p, the applicants are the person authorized by the manufacturer and the importer (seller).

For the purpose of testing during State Registration of perfumery and cosmetic products, the manufacturer, the applicant or, on the instruction (application) of the applicant and in the applicant's presence, an accredited testing laboratory (centre) shall carry out identification and sampling of the products at the warehouse of the manufacturer or of the applicant, or at a temporary storage warehouse, or at a customs warehouse.

Sampling during State Registration of perfumery and cosmetic products may be carried out by an accredited inspection body of a Member State included in the unified register of conformity assessment bodies of the Union.

The results of identification and sampling of perfumery and cosmetic products shall be documented in an appropriate report (reports).

Testing of perfumery and cosmetic products and assessment of the toxicological indicators of perfumery and cosmetic products on the basis of an analysis of the toxicological characteristics of the ingredients of the selected samples of perfumery and cosmetic products for the purposes of State Registration shall be carried out by an accredited testing laboratory (centre).

The applicant shall compile the set of documents and information provided for in paragraph 5 of this Article and submit it to the authorized body.

The applicant shall take all necessary measures to ensure that the products it supplies comply with the requirements of this Technical Regulation.

7. The authorized body shall review the application for State Registration of perfumery and cosmetic products and the attached documents and information provided for in paragraph 5 of this Article, and shall register the application for State Registration of perfumery and cosmetic products.

Examination of the documents and information submitted by the applicant, including examination of the results of testing of perfumery and cosmetic products, shall be carried out by the authorized body.

If both the examination of the documents and information submitted by the applicant and the product tests performed yield positive results, the authorized body shall decide to issue a Certificate of State Registration of perfumery and cosmetic products.

If non-compliance of the products with the requirements of this Technical Regulation is established, the authorized body shall decide to refuse to issue a Certificate of State Registration of perfumery and cosmetic products. The decision refusing to issue a Certificate of State Registration of perfumery and cosmetic products shall be handed to the applicant or sent by registered mail with a list of enclosures and acknowledgement of receipt, in writing or as an electronic document (stating the reasons for refusal), within 3 working days from the date of such decision.

The authorized body shall issue the Certificate of State Registration of perfumery and cosmetic products to the applicant and enter information about it in the national part of the unified register of Certificates of State Registration of products.

8. The Certificate of State Registration of perfumery and cosmetic products shall be drawn up in accordance with the uniform form and rules approved by Decision of the Board of the Eurasian Economic Commission No. 80 of 30 June 2017.

The Certificate of State Registration of perfumery and cosmetic products may be drawn up as an electronic document.

The Certificate of State Registration of perfumery and cosmetic products shall be drawn up for one or more names of perfumery and cosmetic products of the same designation and shall remain valid until the product name is changed and (or) changes are made to the formulation (composition) that result in changes to the safety indicators of the perfumery and cosmetic products. The Validity Period of a Certificate of State Registration of perfumery and cosmetic products issued under scheme 1p and scheme 2p is 5 years.

After completion of the State Registration procedure for perfumery and cosmetic products, the original Certificate of State Registration of perfumery and cosmetic products and the set of documents and information provided for in paragraph 5 of this Article shall be kept by the applicant, including after production of the perfumery and cosmetic products has ceased or the last batch of the perfumery and cosmetic products has been supplied, for the duration of their shelf life.

The Certificate of State Registration of perfumery and cosmetic products and (or) its annex may be replaced without additional or repeated testing in the following cases:

- detection of errors (misprints) in the certificate and (or) its annex;

- change in the legal form or location (legal entity address) of the manufacturer;

- change in the legal form or location (legal entity address), as well as in the address (addresses) of the place(s) of business of the applicant (if the addresses differ).

Where the Certificate of State Registration of perfumery and cosmetic products and (or) its annex is replaced, circulation of the products in the customs territory of the Union shall not be suspended.

The Certificate of State Registration of perfumery and cosmetic products and (or) its annex may be replaced without submitting additional test reports or expert opinions on the perfumery and cosmetic products to the authorized body where the certificate and (or) its annex needs to be supplemented with information not relating to the safety indicators of the products, information on indications (contraindications) for the use of certain types of products by particular population groups, and information of no hygienic significance (for example, indication of additional product forms and volumes, types of consumer packaging, trademarks, etc.).

9. Proof of Conformity of perfumery and cosmetic products shall be carried out in the form of a declaration of conformity under one of the following schemes:

- scheme 3д – for serially produced perfumery and cosmetic products;

- scheme 4д – for a batch of perfumery and cosmetic products;

- scheme 6д – for serially produced perfumery and cosmetic products where the manufacturer has a certified quality management system or a certificate of conformity of production with the principles of good manufacturing practice (GMP).

The declaration of conformity of perfumery and cosmetic products with the requirements of this Technical Regulation is drawn up in respect of one or more names of perfumery and cosmetic products of one designation.

10. For the declaration of conformity of perfumery and cosmetic products with the requirements of this Technical Regulation, the applicant shall be a legal entity or a natural person acting as an individual entrepreneur, registered in the territory of a Member State in accordance with its legislation, that is:

- for schemes 3д and 6д – the manufacturer, a person authorized by the manufacturer;

- for scheme 4д – the manufacturer, a person authorized by the manufacturer, an importer (seller).

11. Depending on the declaration of conformity scheme applied by the applicant, a set of documents and information is drawn up for each name of perfumery and cosmetic products, which includes:

- copies of the manufacturer's documents containing the list of ingredients included in the composition of the perfumery and cosmetic products, indicating their functions and the mass fraction of the ingredients provided for in Annexes 2 – 5 to this Technical Regulation, certified by the applicant (schemes 3д, 4д, 6д);

- copies of documents containing information on the presence of trace amounts of substances in the perfumery and cosmetic products (if trace amounts are present), certified by the applicant (schemes 3д, 4д, 6д);

- copies of documents containing the organoleptic and physico-chemical parameters of the products, certified by the applicant (schemes 3д, 4д, 6д);

- test reports of perfumery and cosmetic products for conformity with the requirements of paragraphs 3 – 6 of Article 5 of this Technical Regulation (if any), a report (if any) on the results of the assessment of toxicological parameters of perfumery and cosmetic products based on an analysis of the toxicological characteristics of the ingredients for conformity with the requirements of paragraph 6 of Article 5 of this Technical Regulation, issued by an accredited testing laboratory (centre) (schemes 3д, 4д, 6д);

- a copy of the contract (supply agreement) and the shipping documents identifying the product batch, including its size (scheme 4д);

- a sample of the labelling of the consumer packaging of the perfumery and cosmetic products (for example, a copy of the label (packaging), a photo, a layout approved for printing, an annotation (if any)), confirming

conformity with the requirements of paragraphs 9 – 9.5 of Article 5 of this Technical Regulation, certified by the applicant (schemes 3д, 4д, 6д);

- a copy of the manufacturer's document on the conformity of production with the requirements of paragraphs 7 – 7.5.2 of Article 5 of this Technical Regulation (a written notification by the manufacturer of the conformity of production with the requirements of this Technical Regulation or a declaration (statement or written notification) by the manufacturer of compliance with the principles of good manufacturing practice (GMP)), certified by the applicant (scheme 3д);

- a copy of the certificate of conformity of the quality management system and (or) a copy of the certificate of conformity of the production of perfumery and cosmetic products with the principles of good manufacturing practice (GMP), certified by the applicant (scheme 6д);

- a copy of the manufacturer's document on the conformity of production with the requirements of paragraphs 7 – 7.5.2 of Article 5 of this Technical Regulation (a written notification by the manufacturer of the conformity of production with the requirements of this Technical Regulation or a declaration (statement or written notification) by the manufacturer of compliance with the principles of good manufacturing practice (GMP)) or a copy of the certificate of conformity of the quality management system and (or) a copy of the certificate of conformity of the production of perfumery and cosmetic products with the principles of good manufacturing practice (GMP), certified by the applicant (scheme 4д);

- copies of documents confirming the consumer properties of the perfumery and cosmetic products declared in the labelling of the consumer packaging (antimicrobial action, anti-wrinkle, SPF factor, anti-caries, anti-inflammatory action of oral hygiene products, etc.), certified by the applicant. Claims regarding the consumer properties of perfumery and cosmetic products shall be substantiated taking into account the common criteria in accordance with Annex 13 to this Technical Regulation (schemes

3д, 4д, 6д);

- a copy of the agreement with the manufacturer, including a foreign manufacturer, on the basis of which the person authorized by the manufacturer acts on behalf of that manufacturer in conformity assessment and in placing perfumery and cosmetic products on the market in the customs territory of the Union, and also bears liability for non-conformity of the perfumery and cosmetic products with the requirements of the technical regulations of the Union (Customs Union), certified by the applicant (for a person authorized by the manufacturer) (schemes 3д and 6д);

- information on the registration or record (individual, identification) number of the applicant assigned upon state registration of a legal entity or a natural person as an individual entrepreneur in accordance with the legislation of the Member States (schemes 3д, 4д, 6д).

A person authorized by the manufacturer or an importer (seller) may use test reports of perfumery and cosmetic products for tests carried out on behalf of the manufacturer or of the person authorized by the manufacturer, on the basis of their written consent.

The set of documents and information provided for by this paragraph is compiled on paper or electronic media.

Translations of the manufacturer's documents from a foreign language into Russian and (or), where the legislation of a Member State contains a corresponding requirement, into the state language of the Member State in which the declaration of conformity is registered, are certified in accordance with the legislation of that Member State, or by a translator holding a document confirming their qualifications, or by the applicant.

12. The manufacturer, depending on the declaration of conformity scheme applied:

- carries out production control and takes all necessary measures to ensure that the production process of perfumery and cosmetic products is stable and ensures the conformity of the manufactured perfumery and cosmetic products with the requirements of this Technical Regulation (scheme 3д);

- carries out production control and takes all necessary measures to ensure the stable functioning of the implemented and certified management system and of the production conditions for manufacturing perfumery and cosmetic products that comply with the requirements of this Technical Regulation (scheme 6д).

13. The applicant, depending on the conformity declaration scheme applied:

- compiles and analyses the set of documents and information provided for in paragraph 11 of this Article;

- ensures that identification and sampling (taking of specimens) of perfumery and cosmetic products are carried out. Identification and sampling (taking of specimens) of perfumery and cosmetic products may be carried out by the manufacturer, by the applicant or, on the applicant's instruction, by a product certification body or an accredited testing laboratory (centre). The applicant submits to the certification body or to the accredited testing laboratory (centre) the documents and information necessary for the identification and sampling (taking of specimens) of perfumery and cosmetic products. Sampling (taking of specimens) of perfumery and cosmetic products is carried out: for serially produced perfumery and cosmetic products – at the warehouse of the manufacturer (of the person authorized by the manufacturer), or at a temporary storage warehouse, or at a customs warehouse, or on the finished-product production line; for a batch of products – at the location of the batch (at the finished-product warehouse of the manufacturer (of the person authorized by the manufacturer), or at a customs warehouse, or at a

temporary storage warehouse, or at the consignee's warehouse under safekeeping, or on the finished-product production line);

- ensures that the selected samples (specimens) of perfumery and cosmetic products are tested for compliance with the requirements of this Technical Regulation by an accredited testing laboratory (centre). For perfumery and cosmetic products at the stage of being put into production, samples (specimens) of perfumery and cosmetic products taken from a batch manufactured in the manufacturer's laboratory in accordance with technical documents approved in the established manner (technical specifications, formulation, specification, standard) and the manufacturing technology may be used for testing. The perfumery and cosmetic products must be filled into primary packaging made of a material identical to that of the packaging used in their production and labelled in accordance with the requirements of paragraphs 9 – 9.5 of Article 5 of this regulation. The labelling may be applied to the consumer packaging and (or) to a tag attached to it;

- adopts the declaration of conformity in accordance with the uniform form and rules approved by Decision of the Board of the Eurasian Economic Commission No. 293 of 25 December 2012;

- compiles and keeps a set of evidentiary materials confirming the conformity of the perfumery and cosmetic products with the requirements of this Technical Regulation, which includes:

the documents and information provided for in paragraph 11 of this Article;

Test Reports on the perfumery and cosmetic products for compliance with the requirements of paragraphs 3 – 6 of Article 5 of this Technical Regulation, and a report (if any) on the results of the assessment of toxicological indicators of the perfumery and cosmetic products based on an analysis of the toxicological characteristics of the ingredients for compliance with the requirements of paragraph 6 of Article 5 of this

Technical Regulation, issued by an accredited testing laboratory (centre);

the registered declaration of conformity.

For the application of schemes 3д and 6д, the Test Report on samples (specimens) of perfumery and cosmetic products must have been issued no earlier than 1 year before the date of registration of the declaration.

For the application of scheme 4д, the results of tests on samples (specimens) of perfumery and cosmetic products may be used for subsequent batches of similar perfumery and cosmetic products for which a declaration of conformity was previously adopted and registered. In this case, the applicant identifies the batch of perfumery and cosmetic products in order to establish its similarity to the perfumery and cosmetic products for which a declaration of conformity was previously adopted and registered. If the applicant has established such similarity, sampling (taking of specimens) and testing of the perfumery and cosmetic products are not carried out. The validity period of the Test Report on the perfumery and cosmetic products used shall not exceed 2 years from the date of its approval, provided that the tests were carried out using the test methods in force at the time of adoption of the declaration of conformity and established by standards included in the list of standards containing rules and methods of research (testing) and measurement, including sampling rules, necessary for the application and implementation of the requirements of this Technical Regulation and for the conformity assessment of objects of technical regulation, provided for in paragraph 2 of Article 5^1 of this Technical Regulation, and that no changes have been made to the formulation (composition) of the perfumery and cosmetic products.

14. To register the declaration of conformity, the applicant submits the documents and information provided for by the Procedure for the Registration, Suspension, Resumption and Termination of Declarations of Conformity of Products with the Requirements of the Technical

Regulations of the Eurasian Economic Union, approved by Decision of the Board of the Eurasian Economic Commission No. 41 of 20 March 2018, including copies of the documents and the information provided for in paragraph 13 of this Article, except for documents confirming the consumer properties of the perfumery and cosmetic products.

All copies of documents submitted shall be certified by the applicant.

15. The declaration of conformity of perfumery and cosmetic products with the requirements of this Technical Regulation remains valid until the name of the product is changed and (or) changes are made to the formulation (composition) that result in changes to the safety indicators of the perfumery and cosmetic products, but for not more than 5 years for conformity declared under scheme 3д, not more than 7 years for conformity declared under scheme 6д, and, for conformity declared under scheme 4д, taking into account the shelf life of the products included in the given batch of perfumery and cosmetic products.

If a registered declaration of conformity for serially produced perfumery and cosmetic products covers perfumery and cosmetic products manufactured from the date of manufacture of the selected samples (specimens) of the products that have undergone testing, this information and the details of the date of manufacture of the selected samples (specimens) of the products that have undergone testing shall be indicated in field 8 "Additional information" of the uniform form of the declaration of conformity with the requirements of the technical regulation of the Eurasian Economic Union, approved by Decision of the Board of the Eurasian Economic Commission No. 293 of 25 December 2012.

When registering a new declaration of conformity, the applicant shall decide to terminate the declaration of conformity that is to be replaced.

16. The original of the declaration of conformity and the set of documents and information provided for in paragraph 13 of this Article (in electronic form or on paper) shall be retained by the applicant after the

discontinuation of production of the perfumery and cosmetic products or the delivery of the last batch of the perfumery and cosmetic products for the duration of their shelf life.

The set of evidentiary materials confirming the conformity of the perfumery and cosmetic products with the requirements of this Technical Regulation shall be retained by the body (organization) of the Member State authorized to register declarations of conformity, including an accredited certification body of the Member State, for 5 years after the expiry of the declaration of conformity.

Copies of the registered declaration of conformity and of the set of evidentiary materials may be stored in electronic form in accordance with the legislation of the Member States.

17. If a change is made to the formulation (composition) of perfumery and cosmetic products that does not lead to changes in the safety indicators of the perfumery and cosmetic products established by this Technical Regulation, and the product name is not changed, the perfumery and cosmetic products manufactured according to the new formulation shall be tested; in this case, adoption of a new declaration of conformity is not required.

The set of documents and information to be retained by the applicant shall be supplemented with the following documents:

- copies of the manufacturer's documents containing the list of ingredients included in the composition of the perfumery and cosmetic products, indicating their functions and the mass fraction of the ingredients provided for in Annexes 2 – 5 to this Technical Regulation, after the change to the formulation (composition), certified by the applicant;

- copies of documents containing information on the presence of trace amounts of substances in the perfumery and cosmetic products (if trace amounts are present);

- copies of documents containing the organoleptic and physicochemical indicators of the products after the change to the formulation (composition), certified by the applicant;

- test reports on the conformity of the perfumery and cosmetic products manufactured according to the new formulation with the requirements of paragraphs 3 – 6 of Article 5 of this Technical Regulation, and the report (if any) on the results of the assessment of the toxicological indicators of the perfumery and cosmetic products manufactured according to the new formulation, based on an analysis of the toxicological characteristics of the ingredients, for conformity with the requirements of paragraph 6 of Article 5 of this Technical Regulation, issued by an accredited testing laboratory (centre);

- a sample of the labelling, if it has been changed, certified by the applicant;

- a copy of the manufacturer's document (notification) on the release of products according to the new formulation, certified by the applicant.

Footnote. Article 6 as worded by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force 12 months after the date of its official publication).

Article 7. Marking with the Single Mark of Product Circulation on the Union Market

1. Perfumery and cosmetic products that comply with the requirements of this Technical Regulation and have undergone the conformity assessment procedure for this Technical Regulation in accordance with Article 6 shall be marked with the single mark of product circulation on the Union market.

2. Marking with the single mark of product circulation on the Union market shall be carried out before the products are placed on the market.

3. The single mark of product circulation on the Union market shall be applied to each unit of the products (consumer packaging, tag, label) and/or to the shipping documentation.

The single mark of product circulation on the Union market may be applied by any method that ensures a clear and distinct image throughout the entire shelf life of the perfumery and cosmetic products.

Footnote. Article as amended by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force 12 months after the date of its official publication).

Article 8. Safeguard Clause

Footnote. Article 8 was repealed by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force 12 months after the date of its official publication).

Article 9. State Control (Supervision)

Footnote. Article 9 was repealed by Decision of the Council of the Eurasian Economic Commission No. 114 of 29.11.2024 (enters into force 12 months after the date of its official publication).

ANNEX 1
to the Technical Regulation
of the Customs Union
"On the Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

LIST
of substances prohibited for use in perfumery and cosmetic products

Footnote. Annex 1 as revised by Decision of the Council of the Eurasian Economic Commission No. 32 of 29.03.2019 (enters into force upon expiry of 12 months from the date of its official publication); as amended by

Decision of the Council of the Eurasian Economic Commission No. 64 of 15.04.2022 (enters into force upon expiry of 12 months from the date of its official publication).

464.	Isobutane, if it contains ≥ 0,1 % w/w butadiene	Isobutane, if it contains ≥ 0,1 % w/w Butadiene	75-28-5	200-857-2
465	Butane, if it contains ≥ 0,1 % w/w butadiene	Butane, if it contains ≥ 0,1 % w/w Butadiene	106-97-8	203-448-7
466.	Gases (petroleum), C3-4, if they contain > 0,1 % w/w butadiene	Gases (petroleum), C3-4, if they contain > 0,1 % w/w Butadiene	68131-75-9	268-629-5
467.	Tail gas (petroleum), catalytic cracked distillate and catalytic cracked naphtha fractionation absorber, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), catalytic cracked distillate and catalytic cracked naphtha fractionation absorber, if it contains > 0,1 % w/w Butadiene	68307-98-2	269-617-2
468.	Tail gas (petroleum), catalytic polymerised naphtha fractionation stabiliser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), catalytic polymn. naphtha fractionation stabiliser, if it contains > 0,1 % w/w Butadiene	68307-99-3	269-618-8

469.	Tail gas (petroleum), catalytic reformed naphtha fractionation stabiliser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), catalytic reformed naphtha fractionation stabiliser, hydrogen sulfide-free, if it contains > 0,1 % w/w Butadiene	68308-00-9	269-619-3
470.	Tail gas (petroleum), cracked distillate hydrotreater stripper, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), cracked distillate hydrotreater stripper, if it contains > 0,1 % w/w Butadiene	68308-01-0	269-620-9
471.	Tail gas (petroleum), gas oil catalytic cracking absorber, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), gas oil catalytic cracking absorber, if it contains > 0,1 % w/w Butadiene	68308-03-2	269-623-5
472.	Tail gas (petroleum), gas recovery plant, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), gas recovery plant, if it contains > 0,1 % w/w Butadiene	68308-04-3	269-624-0
473.	Tail gas (petroleum), deethaniser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), gas recovery plant deethaniser, if it contains > 0,1 % w/w Butadiene	68308-05-4	269-625-6
474.	Tail gas (petroleum), hydrodesulphurised distillate and hydrodesulphurised naphtha fractionator, acid-free, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), hydrodesulfurised distillate and hydrodesulfurised naphtha fractionator, acid-free, if it contains > 0,1 % w/w Butadiene	68308-06-5	269-626-1

475.	Tail gas (petroleum), hydrodesulphurised vacuum gas oil stripper, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), hydrodesulfurised vacuum gas oil stripper, hydrogen sulfide-free, if it contains > 0,1 % w/w Butadiene	68308-07-6	269-627-7
476.	Tail gas (petroleum), isomerised naphtha fractionation stabiliser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), isomerised naphtha fractionation stabiliser, if it contains > 0,1 % w/w Butadiene	68308-08-7	269-628-2
477.	Tail gas (petroleum), light straight-run naphtha stabiliser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), light straight-run naphtha stabiliser, hydrogen sulfide-free, if it contains > 0,1 % w/w Butadiene	68308-09-8	269-629-8
478.	Tail gas (petroleum), hydrodesulphurised distillate stabiliser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), straight-run distillate hydrodesulferised, hydrogen sulfide-free, if it contains > 0,1 % w/w Butadiene	68308-10-1	269-630-3
479.	Tail gas (petroleum), propane-propylene alkylation deethaniser, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), propane-propylene alkylation feed prep deethaniser, if it contains > 0,1 % w/w Butadiene	68308-11-2	269-631-9
480.	Tail gas (petroleum), vacuum gas oil hydrodesulphurised, if it contains > 0,1 % w/w butadiene	Tail gas (petroleum), vacuum gas oil hydrodesulferised, hydrogen sulfidefree, if it contains > 0,1 % w/w Butadiene	68308-12-3	269-632-4

481.	Gases (petroleum), catalytic cracked overheads, if it contains > 0,1 % w/w butadiene	Gases (petroleum), catalytic cracked overheads, if it contains > 0,1 % w/w Butadiene	68409-99-4	270-071-2
482.	Alkanes, C1-2, if they contain > 0,1 % w/w butadiene	Alkanes, C1-2, if they contain > 0,1 % w/w Butadiene	68475-57-0	270-651-5
483.	Alkanes, C2-3, if they contain > 0,1 % w/w butadiene	Alkanes, C2-3, if they contain > 0,1 % w/w Butadiene	68475-58-1	270-652-0
484.	Alkanes, C3-4, if they contain > 0,1 % w/w butadiene	Alkanes, C3-4, if they contain > 0,1 % w/w Butadienen	68475-59-2	270-653-6
485.	Alkanes, C4-5, if they contain > 0,1 % w/w butadiene	Alkanes, C4-5, if they contain > 0,1 % w/w Butadiene	68475-60-5	270-654-1
486.	Fuel gases, if they contain > 0,1 % w/w butadiene	Fuel-gases, if they contain > 0,1 % w/w Butadiene	68476-26-6	270-667-2
487.	Fuel gases, crude oil distillates, if they contain > 0,1 % w/w butadiene	Fuel gases, crude oil distillates, if they contain > 0,1 % w/w Butadiene	68476-29-9	270-670-9
488.	Hydrocarbons, C3-4, if they contain > 0,1 % w/w butadiene	Hydrocarbons, C3-4, if they contain > 0,1 % w/w Butadiene	68476-40-4	270-681-9
489.	Hydrocarbons, C4-5, if they contain > 0,1 % w/w butadiene	Hydrocarbons, C4-5, if they contain > 0,1 % w/w Butadiene	68476-42-6	270-682-4
490.	Hydrocarbons, C2-4, C3-rich, if they contain > 0,1 % w/w butadiene	Hydrocarbons, C2-4, C3-rich, if they contain > 0,1 % w/w Butadiene	68476-49-3	270-689-2

491.	Petroleum gases, liquefied, if they contain > 0,1 % w/w butadiene	Petroleum gases, liquefied, if they contain > 0,1 % w/w Butadiene	68476-85-7	270-704-2
492.	Petroleum gases, liquefied, sweetened, if they contain > 0,1 % w/w butadiene	Petroleum gases, liquefied, sweetened, if they contain > 0,1 % w/w Butadiene	68476-86-8	270-705-8
493.	Gases (petroleum), C3-4, isobutane-rich, if they contain > 0,1 % w/w butadiene	Gases (petroleum), C3-4, isobutane-rich, if they contain > 0,1 % w/w Butadiene	68477-33-8	270-724-1
494.	Distillates (petroleum), C3-6, piperylene-rich, if they contain > 0,1 % w/w butadiene	Distillates (petroleum), C3-6, piperylene-rich, if they contain > 0,1 % w/w Butadiene	68477-35-0	270-726-2
495.	Gases (petroleum), amine system feed, if they contain > 0,1 % w/w butadiene	Gases (petroleum), amine system feed, if they contain > 0,1 % w/w Butadiene	68477-65-6	270-746-1
496.	Gases (petroleum), benzene unit hydrodesulphurised off, if they contain > 0,1 % w/w butadiene	Gases (petroleum), benzene unit hydrode-sulferised off, if they contain > 0,1 % w/w Butadiene	68477-66-7	270-747-7
497.	Gases (petroleum), benzene unit recycle, hydrogen-rich, if they contain > 0,1 % w/w butadiene	Gases (petroleum), benzene unit recycle, hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68477-67-8	270-748-2

498.	Gases (petroleum), blend oil, hydrogen-nitrogen-rich, if they contain > 0,1 % w/w butadiene	Gases (petroleum), blend oil, hydrogen-nitrogen-rich, if they contain > 0,1 % w/w Butadiene	68477-68-9	270-749-8
499.	Gases (petroleum), butane splitter overheads, if they contain > 0,1 % w/w butadiene	Gases (petroleum), butane splitter overheads, if they contain > 0,1 % w/w Butadiene	68477-69-0	270-750-3
500.	Gases (petroleum), C2-3, if they contain > 0,1 % w/w butadiene	Gases (petroleum), C2-3, if they contain > 0,1 % w/w Butadiene	68477-70-3	270-751-9
501.	Gases (petroleum), catalytic-cracked gas oil depropaniser bottoms, C4-rich acid-free, if they contain > 0,1 % w/w butadiene	Gases (petroleum), catalytic-cracked gas oil depropaniser bottoms, C4-rich acid-free, if they contain > 0,1 % w/w Butadiene	68477-71-4	270-752-4
502.	Gases (petroleum), catalytic-cracked naphtha debutaniser bottoms, C3-5-rich, if they contain > 0,1 % w/w butadiene	Gases (petroleum), catalytic-cracked naphtha debutaniser bottoms, C3-5-rich, if they contain > 0,1 % w/w Butadiene	68477-72-5	270-754-5

503.	Gases (petroleum), overhead of the catalytic cracking naphtha depropanisation column, with a high C3 content acid-free, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic cracked naphtha depropaniser overhead, C3-rich acid-free, if they contain > 0,1 % w/w Butadiene	68477-73-6	270-755-0
504.	Gases (petroleum), catalytic cracking, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic cracker, if they contain > 0,1 % w/w Butadiene	68477-74-7	270-756-6
505.	Gases (petroleum), catalytic cracking, with a high C1-5 content, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic cracker, C1-5-rich, if they contain > 0,1 % w/w Butadiene	68477-75-8	270-757-1
506.	Gases (petroleum), overhead of the catalytic polymerisation naphtha stabilisation column, with a high C2-4 content, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic polymd. naphtha stabiliser overhead, C2-4-rich, if they contain > 0,1 % w/w Butadiene	68477-76-9	270-758-7
507.	Gases (petroleum), gases discharged from the catalytic reforming naphtha stripping column, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic reformed naphtha stripper overheads, if they contain > 0,1 % w/w Butadiene	68477-77-0	270-759-2

508.	Gases (petroleum), catalytic reforming, with a high C1-4 content, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic reformer, C1-4-rich, if they contain > 0,1 % w/w Butadiene	68477-79-2	270-760-8
509.	Gases (petroleum), recycle gas of the C6-8 catalytic reforming unit, if they contain > 0,1 percent butadiene	Gases (petroleum), C6-8 catalytic reformer recycle, if they contain > 0,1 % w/w Butadiene	68477-80-5	270-761-3
510.	Gases (petroleum), C6-8 catalytic reforming, if they contain > 0,1 percent butadiene	Gases (petroleum), C6-8 catalytic reformer, if they contain > 0,1 % w/w Butadiene	68477-81-6	270-762-9
511.	Gases (petroleum), C6-8 recycle gas of the catalytic reforming unit, with a high hydrogen content, if they contain > 0,1 percent butadiene	Gases (petroleum), C6-8 catalytic reformer recycle, hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68477-82-7	270-763-4
512.	Gases (petroleum), C3-5 feed for olefinic-paraffinic alkylation, if they contain > 0,1 percent butadiene	Gases (petroleum), C3-5 olefinic-paraffinic alkylation feed, if they contain > 0,1 % w/w Butadiene	68477-83-8	270-765-5
513.	Gases (petroleum), C2 return stream, if they contain > 0,1 percent butadiene	Gases (petroleum), C2-return stream, if they contain > 0,1 % w/w Butadiene	68477-84-9	270-766-0

514.	Gases (petroleum), with a high C4 content, if they contain > 0,1 percent butadiene	Gases (petroleum), C4-rich, if they contain > 0,1 % w/w Butadiene	68477-85-0	270-767-6
515.	Gases (petroleum), gases discharged from the deethaniser, if they contain > 0,1 percent butadiene	Gases (petroleum), deethaniser overheads, if they contain > 0,1 % w/w Butadiene	68477-86-1	270-768-1
516.	Gases (petroleum), gases discharged from the deisobutanisation column, if they contain > 0,1 percent butadiene	Gases (petroleum), deisobutaniser tower overheads, if they contain > 0,1 % w/w Butadiene	68477-87-2	270-769-7
517.	Gases (petroleum), depropaniser gas, dry, with a high propene content, if they contain > 0,1 percent butadiene	Gases (petroleum), depropaniser dry, propene-rich, if they contain > 0,1 % w/w Butadiene	68477-90-7	270-772-3
518.	Gases (petroleum), gases discharged from the depropaniser, if they contain > 0,1 percent butadiene	Gases (petroleum), depropaniser overheads, if they contain > 0,1 % w/w Butadiene	68477-91-8	270-773-9
519.	Gases (petroleum), dry sour petroleum gas discharged from the gas concentration unit, if they contain > 0,1 percent butadiene	Gases (petroleum), dry sour, gas-concn.-unit-off, if they contain > 0,1 % w/w Butadiene	68477-92-9	270-774-4

520.	Gases (petroleum), gas from gas-concentration reabsorption distillation, if they contain > 0,1 percent butadiene	Gases (petroleum), gas concn. reabsorber distn., if they contain > 0,1 % w/w Butadiene	68477-93-0	270-776-5
521.	Gases (petroleum), gases discharged from the depropaniser of the gas recovery unit, if they contain > 0,1 percent butadiene	Gases (petroleum), gas recovery plant depropaniser overheads, if they contain > 0,1 % w/w Butadiene	68477-94-1	270-777-0
522.	Gases (petroleum), feed for the Girbatol treatment unit, if they contain > 0,1 percent butadiene	Gases (petroleum), Girbatol unit feed, if they contain > 0,1 % w/w Butadiene	68477-95-2	270-778-6
523.	Gases (petroleum), gas discharged from the hydrogen absorber, if they contain > 0,1 percent butadiene	Gases (petroleum), hydrogen absorber off, if they contain > 0,1 % w/w Butadiene	68477-96-3	270-779-1
524.	Gases (petroleum), with a high hydrogen content, if they contain > 0,1 percent butadiene	Gases (petroleum), hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68477-97-4	270-780-7
525.	Gases (petroleum), oil blend recycle gas obtained in the hydrotreater, with a high hydrogen and nitrogen content, if they contain > 0,1 percent butadiene	Gases (petroleum), hydrotreater blend oil recycle, hydrogen-nitrogen-rich, if they contain > 0,1 % w/w Butadiene	68477-98-5	270-781-2

526.	Gases (petroleum), gas from the isomerised naphtha rectification column, with a high C4 content, free of hydrogen sulphide, if they contain > 0,1 percent butadiene	Gases (petroleum), isomerised naphtha fractionator, C4-rich, hydrogen sulfide-free, if they contain > 0,1 % w/w Butadiene	68477-99-6	270-782-8
527.	Gases (petroleum), recycle gas, with a high hydrogen content, if they contain > 0,1 percent butadiene	Gases (petroleum), recycle, hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68478-00-2	270-783-3
528.	Gases (petroleum), fresh gas blended with recycle gas, obtained in the reforming unit, with a high hydrogen content, if they contain > 0,1 percent butadiene	Gases (petroleum), reformer make-up, hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68478-01-3	270-784-9
529.	Gases (petroleum), hydrotreater of the reforming unit, if they contain > 0,1 percent butadiene	Gases (petroleum), reforming hydrotreater, if they contain > 0,1 % w/w Butadiene	68478-02-4	270-785-4
530.	Gases (petroleum), reforming unit hydrotreater, high in hydrogen and methane, if they contain > 0,1 percent butadiene	Gases (petroleum), reforming hydrotreater, hydrogen-methane-rich, if they contain > 0,1 % w/w Butadiene	68478-03-5	270-787-5

531.	Gases (petroleum), make-up gas mixed with recycle gas, obtained in the reforming unit hydrotreater, high in hydrogen, if they contain > 0,1 percent butadiene	Gases (petroleum), reforming hydrotreater make-up, hydrogen-rich, if they contain > 0,1 % w/w Butadiene	68478-04-6	270-788-0
532.	Gases (petroleum), thermal cracking distillation, if they contain > 0,1 percent butadiene	Gases (petroleum), thermal cracking distn., if they contain > 0,1 % w/w Butadiene	68478-05-7	270-789-6
533.	Tail gas (petroleum), reflux drum of the fractionation column for catalytic cracked clarified oil and thermal cracked vacuum distillation residue, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic cracked clarified oil and thermal cracked vacuum residue fractionation reflux drum, if it contains > 0,1 % w/w Butadiene	68478-21-7	270-802-5
534.	Tail gas (petroleum), catalytic cracked naphtha stabilisation column absorber, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic cracked naphtha stabilisation absorber, if it contains > 0,1 % w/w Butadiene	68478-22-8	270-803-0
535.	Tail gas (petroleum), catalytic cracking unit, catalytic reforming unit and hydrodesulfurised combined product fractionation column, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic cracker, catalytic reformer and hydrodesulferised combined fractionater, if it contains > 0,1 % w/w Butadiene	68478-24-0	270-804-6

536.	Tail gas (petroleum), catalytic cracking unit refractionation column absorber, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic cracker refractionation absorber, if it contains > 0,1 % w/w Butadiene	68478-25-1	270-805-1
537.	Tail gas (petroleum), catalytic reformed naphtha fractionation stabilisation column, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic reformed naphtha fractionation stabilizer, if it contains > 0,1 % w/w Butadiene	68478-26-2	270-806-7
538.	Tail gas (petroleum), catalytic reformed naphtha separator, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic reformed naphtha separator, if it contains > 0,1 % w/w Butadiene	68478-27-3	270-807-2
539.	Tail gas (petroleum), catalytic reformed naphtha stabilisation column, if it contains > 0,1 percent butadiene	Tail gas (petroleum), catalytic reformed naphtha stabiliser, if it contains > 0,1 % w/w Butadiene	68478-28-4	270-808-8
540.	Tail gas (petroleum), cracked distillate hydrotreating unit separator, if it contains > 0,1 percent butadiene	Tail gas (petroleum), cracked distillate hydrotreater separator, if it contains > 0,1 % w/w Butadiene	68478-29-5	270-809-3
541.	Tail gas (petroleum), gas, hydrodesulfurised straight-run naphtha separator, if it contains > 0,1 percent butadiene	Tail gas (petroleum), hydrodesulfurised straight-run naphtha separator, if it contains > 0,1 % w/w Butadiene	68478-30-8	270-810-9

542.	Residual petroleum gas, mixed stream from the saturation gas generation unit, high in C4, if it contains > 0,1 percent butadiene	Tail gas (petroleum), saturate gas plant mixed stream, C4-rich, if it contains > 0,1 % w/w Butadiene	68478-32-0	270-813-5
543.	Tail gas (petroleum), saturate gas recovery plant, high in C1-2, if it contains > 0,1 percent butadiene	Tail gas (petroleum), saturate gas recovery plant, C1-2-rich, if it contains > 0,1 % w/w Butadiene	68478-33-1	270-810-0
544.	Tail gas (petroleum), vacuum distillation residue thermal cracking unit, if it contains > 0,1 percent butadiene	Tail gas (petroleum), vacuum residues thermal cracker, if it contains > 0,1 % w/w Butadiene	68478-34-2	270-815-6
545.	Hydrocarbons, high in C3-4, petroleum distillate, if it contains > 0,1 percent butadiene	Hydrocarbons, C3-4-rich, petroleum distillate, if they contain > 0,1 % w/w Butadiene	68512-91-4	270-990-9
546.	Gases (petroleum), off-gases from the catalytic reforming straight-run naphtha stabilisation column, if they contain > 0,1 percent butadiene	Gases (petroleum), catalytic reformed straight-run naphtha stabiliser overheads, if they contain > 0,1 % w/w Butadiene	68513-14-4	270-999-8
547.	Gases (petroleum), off-gas from the dehexanisation column for straight-run naphtha boiling over the full temperature range, if they contain > 0,1 percent butadiene	Gases (petroleum), full-range straight-run naphtha dehexaniser off, if they contain > 0,1 % w/w Butadiene	68513-15-5	271-000-8

548.	Gases (petroleum), off-gas from the depropanisation column of the hydrocracking unit, with a high hydrocarbon content, if they contain > 0,1 percent butadiene	Gases (petroleum), hydrocracking depropaniser off, hydrocarbon-rich, if they contain > 0,1 % w/w Butadiene	68513-16-6	271-001-3
549.	Gases (petroleum), off-gas from the light straight-run solvent naphtha stabilisation column, if they contain > 0,1 percent butadiene	Gases (petroleum), light straight-run naphtha stabiliser off, if they contain > 0,1 % w/w Butadiene	68513-17-7	271-002-9
550.	Gases (petroleum), high-pressure flash drum off-gas, reformer unit wastewater, if they contain > 0,1 percent butadiene	Gases (petroleum), reformer effluent high-pressure flash drum off, if they contain > 0,1 % w/w Butadiene	68513-18-8	271-003-4
551.	Gases (petroleum), flash drum off-gas, low-pressure, reformer effluent water, if they contain > 0,1 percent butadiene	Gases (petroleum), reformer effluent low-pressure flash drum off, if they contain > 0,1 % w/w Butadiene	68513-19-9	271-005-5
552.	Residue (petroleum), alkylation splitter column, high in C4, if they contain > 0,1 percent butadiene	Residues (petroleum), alkylation splitter, C4-rich, if they contain > 0,1 % w/w Butadiene	68513-66-6	271-010-2
553.	Hydrocarbons, C1-4, if they contain > 0,1 percent butadiene	Hydrocarbons, C1-4, if they contain > 0,1 % w/w Butadiene	68514-31-8	271-032-2

554.	Hydrocarbons, C1-4, sweetened, if they contain > 0,1 percent butadiene	Hydrocarbons, C1-4, sweetened, if they contain > 0,1 % w/w Butadiene	68514-36-3	271-038-5
555.	Gases (petroleum), gas discharged after distillation of refinery gas, if they contain > 0,1 percent butadiene	Gases (petroleum), oil refinery gas distn. off, if they contain > 0,1 % w/w Butadiene	68527-15-1	271-258-1
556.	Hydrocarbons, C1-3, if they contain > 0,1 percent butadiene	Hydrocarbons, C1-3, if they contain > 0,1 % w/w Butadiene	68527-16-2	271-259-7
557.	Hydrocarbons, C1-4, debutaniser column fraction, if they contain > 0,1 percent butadiene	Hydrocarbons, C1-4, debutaniser fraction, if they contain > 0,1 % w/w Butadiene	68527-19-5	271-261-8
558.	Gases (petroleum), gases discharged from the depentaniser column of the benzene unit hydrotreater, if they contain > 0,1 percent butadiene	Gases (petroleum), benzene unit hydrotreater depentaniser overheads, if they contain > 0,1 % w/w Butadiene	68602-82-4	271-623-5
559.	Gases (petroleum), C1-5, with a high content of gasoline vapours, if they contain > 0,1 percent butadiene	Gases (petroleum), C1-5, wet, if they contain > 0,1 % w/w Butadiene	68602-83-5	271-624-0

560.	Gases (petroleum), gas discharged from the secondary absorber, fractionation column for gases discharged from the fluidised-bed catalytic cracking unit, if they contain > 0,1 percent butadiene	Gases (petroleum), secondary absorber off, fluidised catalytic cracker overheads fractionator, if they contain > 0,1 % w/w Butadiene	68602-84-6	271-625-6
561.	Hydrocarbons, C2-4, if they contain > 0,1 percent butadiene	Hydrocarbons, C2-4, if they contain > 0,1 % w/w Butadiene	68606-25-7	271-734-9
562.	Hydrocarbons, C3, if they contain > 0,1 percent butadiene	Hydrocarbons, C3, if they contain > 0,1 % w/w Butadiene	68606-26-8	271-735-4
563.	Gases (petroleum), alkylation feedstock, if they contain > 0,1 percent butadiene	Gases (petroleum), alkylation feed, if they contain > 0,1 % w/w Butadiene	68606-27-9	271-737-5
564.	Gases (petroleum), gas after fractionation of depropaniser bottoms, if they contain > 0,1 percent butadiene	Gases (petroleum), depropaniser bottoms fractionation off, if they contain > 0,1 % w/w Butadiene	68606-34-8	271-742-2
565.	Petroleum products, refinery gases, if they contain > 0,1 percent butadiene	Petroleum products, refinery gases, if they contain > 0,1 % w/w Butadiene	68607-11-4	271-750-6

566.	Gases (petroleum), low-pressure separator of the hydrocracking unit, if they contain > 0,1 percent butadiene	Gases (petroleum), hydrocracking low-pressure separator, if they contain > 0,1 % w/w Butadiene	68783-06-2	272-182-1
567.	Gases (petroleum), refinery blend, if they contain > 0,1 percent butadiene	Gases (petroleum), refinery blend, if they contain > 0,1 % w/w Butadiene	68783-07-3	272-183-7

568.	Gases (petroleum), catalytic cracking, if they contain > 0,1 percent Butadiene	Gases (petroleum), catalytic cracking, if they contain > 0,1 % w/w Butadiene	68783-64-2	272-203-4
569.	Gases (petroleum), C2-4, sweetened, if they contain > 0,1 percent Butadiene	Gases (petroleum), C2-4, sweetened, if they contain > 0,1 % w/w Butadiene	68783-65-3	272-205-5
570.	Gases (petroleum), refinery, if they contain > 0,1 percent Butadiene	Gases (petroleum), refinery, if they contain > 0,1 % w/w Butadiene	68814-67-5	272-338-9
571.	Gases (petroleum), platformer products separator off, if they contain > 0,1 percent Butadiene	Gases (petroleum), platformer products separator off, if they contain > 0,1 % w/w Butadiene	68814-90-4	272-343-6
572.	Gases (petroleum), hydrotreated sour kerosine depentaniser stabiliser off, if they contain > 0,1 percent Butadiene	Gases (petroleum), hydrotreated sour kerosine depentaniser stabiliser off, if they contain > 0,1 % w/w Butadiene	68911-58-0	272-775-5
573.	Gases (petroleum), hydrotreated sour kerosine flash drum, if they contain > 0,1 percent Butadiene	Gases (petroleum), hydrotreated sour kerosine flash drum, if they contain > 0,1 % w/w Butadiene	68911-59-1	272-776-0
574.	Gases (petroleum), crude oil fractionation off, if they contain > 0,1 percent Butadiene	Gases (petroleum), crude oil fractionation off, if they contain > 0,1 % w/w Butadiene	68918-99-0	272-871-7

575.	Gases (petroleum), dehexaniser off, if they contain > 0,1 percent Butadiene	Gases (petroleum), dehexaniser off, if they contain > 0,1 % w/w Butadiene	68919-00-6	272-872-2
576.	Gases (petroleum), distillate unifiner desulfurisation tripper off, if they contain > 0,1 percent Butadiene	Gases (petroleum), distillate unifiner desulfurisation tripper off, if they contain > 0,1 % w/w Butadiene	68919-01-7	272-873-8
577.	Gases (petroleum), fluidised catalytic cracker fractionation off if they contain > 0,1 percent Butadiene	Gases (petroleum), fluidised catalytic cracker fractionation off if they contain > 0,1 % w/w Butadiene	68919-02-8	272-874-3
578.	Gases (petroleum), fluidised catalytic cracker scrubbing secondary absorber off, if they contain > 0,1 percent Butadiene	Gases (petroleum), fluidised catalytic cracker scrubbing secondary absorber off, if they contain > 0,1 % w/w Butadiene	68919-03-9	272-875-9
579.	Gases (petroleum), heavy distillate hydrotreater desulfurisation stripper off, if they contain > 0,1 percent Butadiene	Gases (petroleum), heavy distillate hydrotreater desulfurisation stripper off, if they contain > 0,1 % w/w Butadiene	68919-04-0	272-876-4
580.	Gases (petroleum), light straight run gasoline fractionation stabiliser off, if they contain > 0,1 percent Butadiene	Gases (petroleum), light straight run gasoline fractionation stabiliser off, if they contain > 0,1 % w/w Butadiene	68919-05-1	272-878-5

581.	Gases (petroleum), naphtha unifiner desulfurisation stripper off, if they contain > 0,1 percent Butadiene	Gases (petroleum), naphtha unifiner desulfurisation stripper off, if they contain > 0,1 % w/w Butadiene	68919-06-2	272-879-0
582.	Gases (petroleum), platformer stabiliser off, light ends fractionation, if they contain > 0,1 percent Butadiene	Gases (petroleum), platformer stabiliser off, light ends fractionation, if they contain > 0,1 % w/w Butadiene	68919-07-3	272-880-6
583.	Gases (petroleum), preflash tower off, crude distn., if they contain > 0,1 percent Butadiene	Gases (petroleum), preflash tower off, crude distn., if they contain > 0,1 % w/w Butadiene	68919-08-4	272-881-1
584.	Gases (petroleum), straight-run naphtha catalytic reforming off, if they contain > 0,1 percent Butadiene	Gases (petroleum), straight-run naphtha catalytic reforming off, if they contain > 0,1 % w/w Butadiene	68919-09-5	272-882-7
585.	Gases (petroleum), straight-run stabiliser off, if they contain > 0,1 percent Butadiene	Gases (petroleum), straight-run stabiliser off, if they contain > 0,1 % w/w Butadiene	68919-10-8	272-883-2
586.	Gases (petroleum), tar stripper off, if they contain > 0,1 percent Butadiene	Gases (petroleum), tar stripper off, if they contain > 0,1 % w/w Butadiene	68919-11-9	272-884-8
587.	Gases (petroleum), unifiner stripper off, if they contain > 0,1 percent Butadiene	Gases (petroleum), unifiner stripper off, if they contain > 0,1 % w/w Butadiene	68919-12-0	272-885-3

588.	Gases (petroleum), fluidised catalytic cracker splitter overheads, if they contain > 0,1 percent Butadiene	Gases (petroleum), fluidised catalytic cracker splitter overheads, if they contain > 0,1 % w/w Butadiene	68919-20-0	272-893-7
589.	Gases (petroleum), catalytic cracked naphtha debutanizer, if they contain > 0,1 percent Butadiene	Gases (petroleum), catalytic cracked naphtha debutanizer, if they contain > 0,1 % w/w Butadiene	68952-76-1	273-169-3
590.	Tail gas (petroleum), catalytic cracked distillate and naphtha stabiliser, if it contains > 0,1 percent Butadiene	Tail gas (petroleum), catalytic cracked distillate and naphtha stabiliser, if it contains > 0,1 % w/w Butadiene	68952-77-2	273-170-9
591.	Tail gas (petroleum), catalytic hydrodesulfurised naphtha separator, if it contains > 0,1 percent Butadiene	Tail gas (petroleum), catalytic hydrodesulfurised naphtha separator, if it contains > 0,1 % w/w Butadiene	68952-79-4	273-173-5
592.	Tail gas (petroleum), straight-run naphtha hydrodesulfurised, if it contains > 0,1 percent Butadiene	Tail gas (petroleum), straight-run naphtha hydrodesulferised, if it contains > 0,1 % w/w Butadiene	68952-80-7	273-174-0
593.	Tail gas (petroleum), thermal-cracked distillate, gas oil and naphtha absorber, if it contains > 0,1 percent Butadiene	Tail gas (petroleum), thermal-cracked distillate, gas oil and naphtha absorber, if it contains > 0,1 % w/w Butadiene	68952-81-8	273-175-6

594.	Tail gas (petroleum), thermal cracked hydrocarbon fractionation stabiliser, petroleum coking, if it contains > 0,1 percent Butadiene	Tail gas (petroleum), thermal cracked hydrocarbon fractionation stabiliser, petroleum coking, if it contains > 0,1 % w/w Butadiene	68952-82-9	273-176-1
595.	Gases (petroleum), light steam-cracked, butadiene conc., if they contain > 0,1 percent Butadiene	Gases (petroleum), light steam-cracked, butadiene conc., if they contain > 0,1 % w/w Butadiene	68955-28-2	273-265-5
596.	Gases (petroleum), sponge absorber off, fluidised catalytic cracker and gas oil desulfuriser overhead fractionation, if they contain > 0,1 percent Butadiene	Gases (petroleum), sponge absorber off, fluidised catalytic cracker and gas oil desulfuriser overhead fractionation, if they contain > 0,1 % w/w Butadiene	68955-33-9	273-269-7
597.	Gases (petroleum), straight-run naphtha catalytic reformer stabiliser overhead, if they contain > 0,1 percent Butadiene	Gases (petroleum), straight-run naphtha catalytic reformer stabiliser overhead, if they contain > 0,1 % w/w Butadiene	68955-34-0	273-270-2
598.	Gases (petroleum), crude oil distillation and catalytic cracking, if they contain > 0,1 percent Butadiene	Gases (petroleum), crude distn. and catalytic cracking, if they contain > 0,1 % w/w Butadiene	68989-88-8	273-563-5
599.	Hydrocarbons, C4, if they contain > 0,1 percent Butadiene	Hydrocarbons, C4, if they contain > 0,1 % w/w Butadiene	87741-01-3	289-339-5

600.	Alkanes, C1-4, C3-rich, if they contain > 0,1 percent Butadiene	Alkanes, C1-4, C3-rich, if they contain > 0,1 % w/w Butadiene	90622-55-2	292-456-4
601.	Gases (petroleum), gas exiting the gas oil diethanolamine scrubber, if they contain > 0,1 percent Butadiene	Gases (petroleum), gas oil diethanolamine scrubber off, if they contain > 0,1 % w/w Butadiene	92045-15-3	295-397-2
602.	Gases (petroleum), gas oil hydrodesulphurisation effluent, if they contain > 0,1 percent Butadiene	Gases (petroleum), gas oil hydrodesulfurisation effluent, if they contain > 0,1 % w/w Butadiene	92045-16-4	295-398-8
603.	Gases (petroleum), gas oil hydrodesulphurisation purge gas, if they contain > 0,1 percent Butadiene	Gases (petroleum), gas oil hydrodesulfurisation purge, if they contain > 0,1 % w/w Butadiene	92045-17-5	295-399-3
604.	Gases (petroleum), hydrogenator wastewater flash drum off-gas, if they contain > 0,1 percent Butadiene	Gases (petroleum), hydrogenator effluent flash drum off, if they contain > 0,1 % w/w Butadiene	92045-18-6	295-400-7
605.	Gases (petroleum), naphtha steam cracking high-pressure residual gas, if they contain > 0,1 percent Butadiene	Gases (petroleum), naphtha steam cracking high-pressure residual, if they contain > 0,1 % w/w Butadiene	92045-19-7	295-401-2

606.	Gases (petroleum), residue visbreaking off-gas, if they contain > 0,1 percent Butadiene	Gases (petroleum), residue visbreaking off, if they contain > 0,1 % w/w Butadiene	92045-20-0	295-402-8
607.	Gases (petroleum), C3-rich steam cracking gas, if they contain > 0,1 percent Butadiene	Gases (petroleum), steam-cracker C3-rich, if they contain > 0,1 % w/w Butadiene	92045-22-2	295-404-9
608.	Hydrocarbons, C4, steam-cracker distillate, if they contain > 0,1 percent Butadiene	Hydrocarbons, C4, steam-cracker distillate, if they contain > 0,1 % w/w Butadiene	92045-23-3	295-405-4
609.	Gases (petroleum), liquefied, sweetened, C4 fraction, if they contain > 0,1 percent Butadiene	Petroleum gases, liquefied, sweetened, C4 fraction, if they contain > 0,1 % w/w Butadiene	92045-80-2	295-463-0
610.	Hydrocarbons, C4, 1,3-butadiene- and isobutene-free, if they contain > 0,1 percent Butadiene	Hydrocarbons, C4, 1,3-butadiene- and isobutene-free, if they contain > 0,1 % w/w Butadiene	95465-89-7	306-004-1
611.	Raffinates (petroleum), steam-cracked C4 fraction extracted with cuprous ammonium acetate, C3-5 and C3-5 unsaturated, butadiene-free, if they contain > 0,1 percent Butadiene	Raffinates (petroleum), steam-cracked C4 fraction cuprous ammonium acetate extn., C3-5 and C3-5 unsatd., butadiene-free, if they contain > 0,1 % w/w Butadiene	97722-19-5	307-769-4
612.	Benzo[def]chrysene (benzo[a]pyrene)	Benzo[def]chrysene (benzo[a]pyrene)	50-32-8	200-028-5

613.	Pitch, coal tar-petroleum product, if it contains > 0,005 percent benzo[a]pyrene	Pitch, coal tar-petroleum, if it contains > 0,005 % w/w benzo[a]pyrene	68187-57-5	269-109-0
614.	Distillates (coal-petroleum product), containing condensed aromatic rings, if they contain > 0,005 percent benzo[a]pyrene	Distillates (coal-petroleum), condensedring arom., if they contain > 0,005 % w/w benzo[a]pyrene	68188-48-7	269-159-3
615.	Moved or deleted	Moved or deleted	-	-
616.	Moved or deleted	Moved or deleted	-	-

783.	Distillates (petroleum), solvent-dewaxed heavy naphthenic fraction, if they contain > 3 % DMSO extract	Distillates (petroleum), solvent-dewaxed heavy naphthenic, if they contain > 3 % w/w DMSO extract	64742-63-8	265-167-6
784.	Distillates (petroleum), solvent-dewaxed light naphthenic fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent-dewaxed light naphthenic, if they contain > 3 % w/w DMSO extract	64742-64-9	265-168-1
785.	Distillates (petroleum), solvent-dewaxed heavy naphthenic fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent-dewaxed heavy paraffinic, if they contain > 3 % w/w DMSO extract	64742-65-0	265-169-7
786.	Paraffin oil (petroleum), if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), if it contains > 3 % w/w DMSO extract	64742-67-2	265-171-8
787.	Naphthenic oil (petroleum), if it contains > 3 % w/w DMSO extract	Naphthenic oils (petroleum), catalytic dewaxed heavy, if they contain > 3 % w/w DMSO extract	64742-68-3	265-172-3

788.	Naphthenic oil (petroleum), catalytic dewaxed light fraction, if it contains > 3 % w/w DMSO extract	Naphthenic oils (petroleum), catalytic dewaxed light, if they contain > 3 % w/w DMSO extract	64742-69-4	265-173-9
789.	Paraffin oil (petroleum), catalytic dewaxed heavy fraction, if it contains > 3 % w/w DMSO extract	Paraffin oils (petroleum), catalytic dewaxed heavy, if they contain > 3 % w/w DMSO extract	64742-70-7	265-174-4
790.	Paraffin oil (petroleum), catalytic dewaxed light fraction, if it contains > 3 % w/w DMSO extract	Paraffin oils (petroleum), catalytic dewaxed light, if they contain > 3 % w/w DMSO extract	64742-71-8	265-176-5
791.	Naphthenic oil (petroleum), completely dewaxed heavy fraction, if it contains >3 % w/w DMSO extract	Naphthenic oils (petroleum), complex dewaxed heavy, if they contain > 3 % w/w DMSO extract	64742-75-2	265-179-1
792.	Naphthenic oil (petroleum), completely dewaxed light fraction, if it contains >3 % w/w DMSO extract	Naphthenic oils (petroleum), complex dewaxed light, if they contain > 3 % w/w DMSO extract	64742-76-3	265-180-7
793.	Extracts (petroleum), solvent of heavy naphthenic distillate, aromatic concentrated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), heavy naphthenic distillate solvent, arom. conc., if they contain > 3 % w/w DMSO extract	68783-00-6	272-175-3

794.	Extracts (petroleum), solvent of distillates of solvent-refined heavy paraffinic fraction, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), solvent-refined heavy paraffinic distillate solvent , if they contain > 3 % w/w DMSO extract	68783-04-0	272-180-0
795.	Extracts (petroleum), heavy paraffinic fraction distillates, solvent-deasphalted, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), heavy paraffinic distillates, solvent-deasphalted, if they contain > 3 % w/w DMSO extract	68814-89-1	272-342-0
796.	Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-containing, high-viscosity, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based, highviscosity, if they contain > 3 % w/w DMSO extract	72623-85-9	276-736-3
797.	Lubricating oils (petroleum), C15-30, hydrotreated neutral oil-containing, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C15-30, hydrotreated neutral oil-based, if they contain > 3 % w/w DMSO extract	72623- 86-0	276-737-9
798.	Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-containing, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based, if they contain > 3 % w/w DMSO extract	72623- 87-1	276-738-4
799.	Lubricating oils, if they contain > 3 % w/w DMSO extract	Lubricating oils, if they contain > 3 % w/w DMSO extract	74869-22-0	

800.	Refined petroleum product, completely dewaxed heavy paraffinic fraction, if it contains > 3 % w/w DMSO extract	Distillates (petroleum), complex dewaxed heavy paraffinic, if they contain > 3 % w/w DMSO extract	90640-91-8	292-613-7
801.	Refined petroleum product, completely dewaxed light paraffinic fraction, if it contains > 3 % w/w DMSO extract	Distillates (petroleum), complex dewaxed light paraffinic, if they contain > 3 % w/w DMSO extract	90640-92-9	292-614-2
802.	Distillates (petroleum), calcined heavy paraffinic fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent dewaxed heavy paraffinic, clay-treated, if they contain > 3 % w/w DMSO extract	90640-94-1	292-616-3
803.	Hydrocarbons, C20-50, solvent-dewaxed heavy paraffinic fraction, hydrotreated, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C20-50, solvent dewaxed heavy paraffinic, hydrotreated, if they contain > 3 % w/w DMSO extract	90640-95-2	292-617-9
804.	Distillates (petroleum), solvent-dewaxed light paraffinic fraction, clay-treated, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent dewaxed light paraffinic, clay-treated, if they contain > 3 % w/w DMSO extract	90640-96-3	292-618-4

805.	Distillates (petroleum), solvent-dewaxed light paraffinic fraction, hydrotreated, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent dewaxed light paraffinic, hydrotreated, if they contain > 3 % w/w DMSO extract	90640-97-4	292-620-5
806.	Extracts (petroleum), solvent of heavy naphthenic distillate, hydrotreated, if it contains > 3 % w/w DMSO extract	Extracts (petroleum), heavy naphthenic distillate solvent, hydrotreated, if they contain > 3 % w/w DMSO extract	90641-07-9	292-631-5
807.	Extracts (petroleum), solvent of heavy paraffinic distillate, hydrotreated, if it contains > 3 % w/w DMSO extract	Extracts (petroleum), heavy paraffinic distillate solvent, hydrotreated, if they contain > 3 % w/w DMSO extract	90641-08-0	292-632-0
808.	Extracts (petroleum), solvent of light paraffinic distillate, hydrotreated, if it contains > 3 % w/w DMSO extract	Extracts (petroleum), light paraffinic distillate solvent, hydrotreated, if they contain > 3 % w/w DMSO extract	90641-09-1	292-633-6
809.	Residual oils (petroleum), hydrotreated, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Residual oils (petroleum), hydrotreated solvent dewaxed, if they contain > 3 % w/w DMSO extract	90669-74-2	292-656-1

810.	Residual oils (petroleum), catalytically dewaxed, if they contain > 3 % w/w DMSO extract	Residual oils (petroleum), catalytic dewaxed, if they contain > 3 % w/w DMSO extract	91770-57-9	294-843-3
811.	Distillates (petroleum), dewaxed heavy paraffinic fraction, hydrotreated, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), dewaxed heavy paraffinic, hydrotreated if they contain > 3 % w/w DMSO extract	91995-39-0	295-300-3
812.	Distillates (petroleum), dewaxed light paraffinic fraction, hydrotreated, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), dewaxed light paraffinic, hydrotreated, if they contain > 3 % w/w DMSO extract	91995-40-3	295-301-9
813.	Distillates (petroleum), hydrocracked, solvent-refined, dewaxed, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), hydrocracked solvent-refined, dewaxed, if they contain > 3 % w/w DMSO extract	91995-45-8	295-306-6
814.	Purified petroleum product, selectively refined light naphthenic fraction, water-treated, if it contains > 3 % w/w DMSO extract	Distillates (petroleum), solvent-refined light naphthenic, hydrotreated, if they contain > 3 % w/w DMSO extract	91995-54-9	295-316-0

815.	Extracts (petroleum product), solvent of distillate of a light paraffinic fraction that has undergone hydrotreatment, if it contains > 3 % w/w DMSO extract	Extracts (petroleum), hydrotreated light paraffinic distillate solvent, if they contain > 3 % w/w DMSO extract	91995-73-2	295-335-4

816.	Extracts (petroleum), light naphthenic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light naphthenic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	91995-75-4	295-338-0
817.	Extracts (petroleum), light paraffinic distillate solvent, acid-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light paraffinic distillate solvent, acid-treated, if they contain > 3 % w/w DMSO extract	91995-76-5	295-339-6
818.	Extracts (petroleum), light paraffinic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light paraffinic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	91995-77-6	295-340-1
819.	Extracts (petroleum), light vacuum gas oil solvent, hydrotreated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light vacuum gas oil solvent, hydrotreated, if they contain > 3 % w/w DMSO extract	91995-79-8	295-342-2
820.	Foots oil (petroleum), water-treated, if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), hydrotreated, if it contains > 3 % w/w DMSO extract	92045-12-0	295-394-6
821.	Lubricating oils (petroleum), C17-35, solvent-extracted, dewaxed, hydrotreated, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C17-35, solvent-extd., dewaxed, hydrotreated, if they contain > 3 % w/w DMSO extract	92045-42-6	295-423-2

822.	Lubricating oils (petroleum), hydrocracked, non-aromatic, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), hydrocracked nonarom solvent-deparaffined, if they contain > 3 % w/w DMSO extract	92045-43-7	295-424-8
823.	Residual oils (petroleum), hydrocracked, acid-treated, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Residual oils (petroleum), hydrocracked acid-treated solvent-dewaxed, if they contain > 3 % w/w DMSO extract	92061-86-4	295-499-7
824.	Paraffin oils (petroleum), solvent-refined, dewaxed heavy fraction, if they contain > 3 % w/w DMSO extract	Paraffin oils (petroleum), solvent-refined dewaxed heavy, if they contain > 3 % w/w DMSO extract	92129-09-4	295-810-6
825.	Extracts (petroleum), heavy paraffinic distillate solvent, clay-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), heavy paraffinic distillate solvent, clay-treated, if they contain > 3 % w/w DMSO extract	92704-08-0	296-437-1
826.	Lubricating oils (petroleum), base oils, paraffinic, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), base oils, paraffinic, if they contain > 3 % w/w DMSO extract	93572-43-1	297-474-6
827.	Extracts (petroleum), heavy naphthenic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), heavy naphthenic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	93763-10-1	297-827-4

828.	Extracts (petroleum), solvent for the distillate of solvent-dewaxed heavy paraffinic fraction, hydrodesulfurised, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), solvent-dewaxed heavy paraffinic distillate solvent, hydrodesulfurised, if they contain > 3 % w/w DMSO Extract	93763-11-2	297-829-5
829.	Hydrocarbons, residue from the distillation of hydrocracked paraffinic fraction, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Hydrocarbons, hydrocracked paraffinic distn. residues, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	93763-38-3	297-857-8
830.	Foots oil (petroleum), acid-treated, if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), acid-treated, if it contains > 3 % w/w DMSO extract	93924-31-3	300-225-7
831.	Foots oil (petroleum), acid-treated, if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), acid-treated, if it contains > 3 % w/w DMSO extract	93924-32-4	300-226-2
832.	Hydrocarbons, C20-50, hydrogenated residual oil vacuum distillate, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C20-50, residual oil hydrogenation vacuum distillate, if they contain > 3 % w/w DMSO extract	93924- 61-9	300-227-1

833.	Distillates (petroleum), solvent-refined hydrotreated heavy fraction, hydrogenated, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent-refined hydrotreated heavy, hydrogenated, if they contain > 3 % w/w DMSO extract	94733-08-1	305-588-5
834.	Distillates (petroleum), solvent-refined hydrocracked light fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent-refined hydrocracked light, if they contain > 3 % w/w DMSO extract	94733-09-2	305-589-0
835.	Lubricating oils (petroleum), C18-40, solvent-dewaxed hydrocracked distillate-based, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C18-40, solvent-dewaxed hydrocracked distillate- based, if they contain > 3 % w/w DMSO extract	94733-15-0	305-594-8
836.	Lubricating oils (petroleum), C18-40, solvent-dewaxed hydrogenated raffinate-based, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C18-40, solvent-dewaxed hydrogenated raffinate- based, if they contain > 3 % w/w DMSO extract	94733-16-1	305-595-3
837.	Hydrocarbons, C13-30, aromatic-rich, solvent-extracted naphthenic distillate, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C13-30, arom.-rich, solvent-extd. naphthenic distillate, if they contain > 3 % w/w DMSO extract	95371-04-3	305-971-7

838.	Hydrocarbons, C16-32, aromatic-rich, solvent-extracted naphthenic distillate, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C16-32, arom. rich, solvent-extd. naphthenic distillate, if they contain > 3 % w/w DMSO extract	95371-05-4	305-972-2
839.	Hydrocarbons, C37-68, vacuum distillation residue, dewaxed, deasphalted, hydrotreated, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C37-68, dewaxed deasphalted hydrotreated vacuum distn. Residues, if they contain > 3 % w/w DMSO extract	95371-07-6	305-974-3
840.	Hydrocarbons, C37-65, vacuum distillation residue, hydrotreated, deasphalted, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C37-65, hydrotreated deasphalted vacuum distn. Residues, if they contain > 3 % w/w DMSO extract	95371-08-7	305-975-9
841.	Distillates (petroleum), hydrocracked, solvent-refined light fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), hydrocracked solvent-refined light, if they contain > 3 % w/w DMSO extract	97488-73-8	307-010-7
842.	Distillates (petroleum), solvent-refined hydrogenated heavy fraction, if they contain > 3 % w/w DMSO extract	Distillates (petroleum), solvent-refined hydrogenated heavy, if they contain > 3 % w/w DMSO extract	97488-74-9	307-011-2

843.	Lubricating oils (petroleum), C18-27, hydrocracked, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C18-27, hydrocracked solvent-dewaxed, if they contain > 3 % w/w DMSO extract	97488-95-4	307-034-8
844.	Hydrocarbons, C17-30, hydrotreated solvent-deasphalted atmospheric distillation residue, distillation light fractions, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C17-30, hydrotreated solvent-deasphalted atm. distn. residue, distn. lights, if they contain > 3 % w/w DMSO extract	97675-87-1	307-661-7 307-661-7
845.	Hydrocarbons, C17-40, hydrotreated solvent-deasphalted distillation residue, light fractions of vacuum distillation, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C17-40, hydrotreated solvent-deasphalted distn. residue, vacuum distn. lights, if they contain > 3 % w/w DMSO extract	97722-06-0	307-755-8
846	Hydrocarbons, C13-27, solvent-extracted light naphthenic fraction, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C13-27, solvent-extd. light naphthenic, if they contain > 3 % w/w DMSO extract	97722-09-3	307-758-4
847.	Hydrocarbons, C14-29, solvent-extracted light naphthenic fraction, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C14-29, solvent-extd. light naphthenic, if they contain > 3 % w/w DMSO extract	97722-10-6	307-760-5
848.	Foots oil (petroleum), carbon-treated, if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), carbon-treated, if it contains > 3 % w/w DMSO extract	97862-76-5	308-126-0

849.	Foots oil (petroleum), silicic acid-treated, if it contains > 3 % w/w DMSO extract	Foots oil (petroleum), silicic acid-treated, if it contains > 3 % w/w DMSO extract	97862-77-6	308-127-6
850.	Hydrocarbons, C27-42, dearomatised, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C27-42, dearomatised, if they contain > 3 % w/w DMSO extract	97862-81-2	308-131-8
851.	Hydrocarbons, C17-30, hydrotreated distillates, distillation light fractions, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C17-30, hydrotreated distillates, distn. Lights, if they contain > 3 % w/w DMSO extract	97862-82-3	308-132-3
852.	Hydrocarbons, C27-45, naphthenic fraction of vacuum distillation, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C27-45, naphthenic vacuum distn., if they contain > 3 % w/w DMSO extract	97862-83-4	308-133-9
853.	Hydrocarbons, C27-45, dearomatised, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C27-45, dearomatised, if they contain > 3 % w/w DMSO extract	97926-68-6	308-287-7
854.	Hydrocarbons, C20-58, hydrotreated, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C20-58, hydrotreated, if they contain > 3 % w/w DMSO extract	97926-70-0	308-289-8
855.	Hydrocarbons, C27-42, naphthenic fraction, if they contain > 3 % w/w DMSO extract	Hydrocarbons, C27-42, naphthenic, if they contain > 3 % w/w DMSO extract	97926-71-1	308-290-3

856.	Extracts (petroleum), light paraffinic distillate solvent, carbon-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light paraffinic distillate solvent, carbon-treated, if they contain > 3 % w/w DMSO extract	100684-02-4	309-672-2
857.	Extracts (petroleum), light paraffinic distillate solvent, clay-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light paraffinic distillate solvent, clay-treated, if they contain > 3 % w/w DMSO extract	100684- 03-5	309-673-8
858.	Extracts (petroleum), light vacuum-distilled gas oil solvent, carbon-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light vacuum, gas oil solvent, carbon-treated, if they contain > 3 % w/w DMSO extract	100684-04-6	309-674-3
859.	Extracts (petroleum), light vacuum gas oil solvent, clay-treated, if they contain > 3 % w/w DMSO extract	Extracts (petroleum), light vacuum gas oil solvent, clay-treated, if they contain > 3 % w/w DMSO extract	100684-05-7	309-675-9
860.	Residual oils (petroleum), carbon-treated, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Residual oils (petroleum), carbon-treated solvent-dewaxed, if they contain > 3 % w/w DMSO extract	100684-37-5	309-710-8
861	Residual oils (petroleum), clay-treated, solvent-dewaxed, if they contain > 3 % w/w DMSO extract	Residual oils (petroleum), clay-treated solvent-dewaxed, if they contain > 3 % w/w DMSO extract	100684-38-6	309-711-3

862.	Lubricating oils (petroleum), C>25, solvent-extracted, deasphalted, dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C>25, solvent-extd., deasphalted, dewaxed, hydrogenated, if they contain > 3 % w/w DMSO Extract	101316-69-2	309-874-0
863.	Lubricating oils (petroleum), C17-32, solvent-extracted, dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C17-32, solvent-extd., dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	101316-70-5	309-875-6
864.	Lubricating oils (petroleum), C20-35, solvent-extracted, dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C20-35, solvent-extd., dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	101316-71-6	309-876-1
865.	Lubricating oils (petroleum), C24-50, solvent-extracted, dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	Lubricating oils (petroleum), C24-50, solvent-extd., dewaxed, hydrogenated, if they contain > 3 % w/w DMSO extract	101316-72-7	309-877-7
866.	Distillates (petroleum), sweetened middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	Distillates (petroleum), sweetened middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64741-86-2	265-088-7

867.	Gas oils (petroleum), solvent-refined, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	Gas oils (petroleum), solvent-refined, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64741-90-8	265-092-9
868	Distillates (petroleum), solvent-refined middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	Distillates (petroleum), solvent-refined middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64741-91-9	265-093-4
869.	Gas oils (petroleum), acid-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	Gas oils (petroleum), acid-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-12-7	265-112-6
870.	Distillates (petroleum), acid-treated middle fraction, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	Distillates (petroleum), acid-treated middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-13-8	265-113-1

871.	Distillates (petroleum), light fraction, acid-treated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not a carcinogen	Distillates (petroleum), acid-treated light, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-14-9	265-114-7
872.	Gas oils (petroleum), chemically neutralised, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not a carcinogen	Gas oils (petroleum), chemically neutralised, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-29-6	265-129-9

873.	Distillates (petroleum), middle fraction, chemically neutralised, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), chemically neutralised middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-30-9	265-130-4
874.	Distillates (petroleum), middle fraction, clay-treated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), clay-treated middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-38-7	265-139-3
875.	Distillates (petroleum), middle fraction, hydrotreated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), hydrotreated middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-46-7	265-148-2

876.	Gas oils (petroleum), hydrodesulfurised, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Gas oils (petroleum), hydrodesulfurised, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-79-6	265-182-8
877.	Distillates (petroleum), middle fraction, hydrodesulfurised, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), hydrodesulfurised middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-80-9	265-183-3
878.	Distillates (petroleum), catalytic reformer fractionator residue, high-boiling, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), catalytic reformer fractionator residue, high-boiling, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	68477-29-2	270-719-4

879.	Distillates (petroleum), catalytic reformer fractionator residue, intermediate-boiling, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), catalytic reformer fractionator residue, intermediate-boiling, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	68477-30-5	270-721-5
880.	Distillates (petroleum), catalytic reformer fractionator residue, low-boiling, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), catalytic reformer fractionator residue, low-boiling, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	68477-31-6	270-722-0
881.	Alkanes, C12-26-branched and linear, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Alkanes, C12-26-branched and linear, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	90622-53-0	292-454-3

882.	Distillates (petroleum), highly refined middle fraction, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), highly refined middle, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	90640-93-0	292-615-8
883.	Distillates (petroleum), catalytic reformer, heavy fraction aromatisation concentrate, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), catalytic reformer, heavy arom. conc., except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	91995-34-5	295-294-2
884.	Gas oils, paraffinic, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Gas oils, paraffinic, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	93924-33-5	300-227-8

885.	Naphtha (petroleum), heavy fraction, solvent-refined and hydrodesulfurised, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Naphtha (petroleum), solvent-refined hydrodesulfurised heavy, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97488-96-5	307-035-3
886.	Hydrocarbons, C 16-20, hydrotreated middle-fraction distillate, distillation lights, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Hydrocarbons, C 16-20, hydrotreated middle distillate, distn. Lights, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97675- 85-9	307-659-6
887.	Hydrocarbons, C12-20, hydrotreated paraffinic fractions, distillation lights, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Hydrocarbons, C12-20, hydrotreated paraffinic, distn. lights, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97675-86-0	307-660-1

888	Hydrocarbons, C11-17, solvent-extracted light naphthenic fraction, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Hydrocarbons, C11-17, solvent-extd. light naphthenic, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97722-08-2	307-757-9
889.	Gas oils, hydrotreated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Gas oils, hydrotreated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97862-78-7	308-128-1
890.	Distillates (petroleum), light paraffinic fraction, carbon-treated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), carbon-treated light paraffinic, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	100683-97-4	309-667-5

891.	Distillates (petroleum), intermediate paraffinic fraction, carbon-treated, except where the full refining history is available and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), intermediate paraffinic, carbon-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	100683-98-5	309-668-0
892.	Distillates (petroleum), intermediate paraffinic fraction, clay-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Distillates (petroleum), intermediate paraffinic, clay-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	100683-99-6	309-669-6
893.	Lubricating greases, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Lubricating greases, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	74869-21-9	278-011-7

894.	Slack wax (petroleum), except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64742-61-6	265-065-5
895.	Slack wax (petroleum), acid-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), acid-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	90669-77-5	292-659-8
896.	Slack wax (petroleum), clay-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), clay-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	90669-78-6	292-660-3
897.	Slack wax (petroleum), hydrotreated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), hydrotreated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	92062-09-4	295-523-6

898.	Slack wax (petroleum), low-melting, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), low-melting, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	92062-10-7	295-524-1
899.	Slack wax (petroleum), low-melting, hydrotreated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), low-melting, hydrotreated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	92062-11-8	295-525-7
900.	Slack wax (petroleum), low-melting, carbon-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), low-melting, carbon-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97863-04-2	308-155-9

901.	Slack wax (petroleum), low-melting, clay-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), low-melting, clay-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97863-05-3	308-156-4
902.	Slack wax (petroleum), low-melting, silicic acid-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), low-melting, silicic acid-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97863-06-4	308-158-5
903.	Slack wax (petroleum), carbon-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Slack wax (petroleum), carbon-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen (CAS No., EC No.)	100684-49-9	309-723-9

904.	Petrolatum, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	8009-03-8	232-373-2
905.	Petrolatum (petroleum), oxidised, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), oxidised, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	64743-01-7	265-206-7
906.	Petrolatum (petroleum), alumina-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), alumina-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	85029-74-9	285-098-5
907.	Petrolatum (petroleum), hydrotreated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), hydrotreated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	92045-77-7	295-459-9

908.	Petrolatum (petroleum), carbon-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), carbon-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97862-97-0	308-149-6
909.	Petrolatum (petroleum), silicic acid-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), silicic acid-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	97862-98-1	308-150-1
910.	Petrolatum (petroleum), clay-treated, except where the full refining history is known and it can be confirmed that the substance from which this product is manufactured is not carcinogenic	Petrolatum (petroleum), clay-treated, except if the full refining history is known and it can be shown that the substance from which it is produced is not a carcinogen	100684-33-1	309-706-6
911.	Distillates (petroleum), light catalytic cracked	Distillates (petroleum), light catalytic cracked	64741-59-9	265-060-4
912.	Distillates (petroleum), intermediate catalytic cracked	Distillates (petroleum), intermediate catalytic cracked	64741-60-2	265-062-5

913.	Distillates (petroleum), light thermal cracked	Distillates (petroleum), light thermal cracked	64741-82-8	265-084-5
914.	Distillates (petroleum), catalytic cracking of hydrodesulfurised light fraction	Distillates (petroleum), hydrodesulfurised light catalytic cracked	68333-25-5	269-781-5
915.	Distillates (petroleum), light naphtha subjected to steam cracking	Distillates (petroleum), light steam-cracked naphtha	68475-80-9	270-662-5
916.	Distillates (petroleum), petroleum distillates subjected to cracking—steam cracking	Distillates (petroleum), cracked steam-cracked petroleum distillates	68477-38-3	270-727-8
917.	Gas oils (petroleum), steam cracking	Gas oils (petroleum), steam-cracked	68527-18-4	271-260-2

918.	Distillates (petroleum), middle fraction, hydrodesulfurised – thermally cracked	Distillates (petroleum), hydrodesulfurised thermal cracked middle	85116-53-6	285-505-6
919.	Gas oils (petroleum), thermally cracked, hydrodesulfurised	Gas oils (petroleum), thermal-cracked, hydrodesulfurised	92045-29-9	295-411-7
920.	Residues (petroleum), naphtha, hydrogenated – steam-cracked	Residues (petroleum), hydrogenated steam-cracked naphtha	92062-00-5	295-514-7
921.	Residues (petroleum), distillation of steam-cracked naphtha	Residues (petroleum), steam-cracked naphtha distn.	92062-04-9	295-517-3
922.	Distillates (petroleum), light fraction catalytic cracking, thermally degraded	Distillates (petroleum), light catalytic cracked, thermally degraded	92201-60-0	295-991-1
923.	Residues (petroleum), steam-cracked naphtha – heat-soaked in the cracking furnace reaction chamber	Residues (petroleum), steam-cracked heat-soaked naphtha	93763-85-0	297-905-8
924.	Gas oils (petroleum), light vacuum distillation, thermal cracking – hydrodesulfurisation	Gas oils (petroleum), light vacuum, thermal-cracked hydrodesulfurised	97926-59-5	308-278-8

925.	Distillates (petroleum), middle fraction, hydrodesulfurised – coking	Distillates (petroleum), hydrodesulfurised middle coker	101316-59-0	309-865-1
926.	Distillates (petroleum), heavy fraction – steam cracking	Distillates (petroleum), heavy steam-cracked	101631-14-5	309-939-3
927.	Residues (petroleum), atmospheric tower	Residues (petroleum), atm. Tower	64741-45-3	265-045-2
928.	Gas oils (petroleum), heavy fraction – vacuum distillation	Gas oils (petroleum), heavy vacuum	64741-57-7	265-058-3
929.	Distillates (petroleum), heavy fraction – catalytic cracking	Distillates (petroleum), heavy catalytic cracked	64741-61-3	265-063-0
930.	Clarified oils (petroleum), catalytic cracking	Clarified oils (petroleum), catalytic cracked	64741-62-4	265-064-6
931.	Residues (petroleum), catalytic reforming – fractionator	Residues (petroleum), catalytic reformer fractionator	64741-67-9	265-069-3
932.	Residues (petroleum), hydrocracking	Residues (petroleum), hydrocracked	64741-75-9	265-076-1
933.	Residues (petroleum), thermal cracking	Residues (petroleum), thermal cracked	64741-80-6	265-081-9

934.	Distillates (petroleum), heavy fraction – thermal cracking	Distillates (petroleum), heavy thermal cracked	64741-81-7	265-082-4
935.	Gas oils (petroleum), hydrotreatment – vacuum distillation	Gas oils (petroleum), hydrotreated vacuum	64742-59-2	265-162-9
936.	Residues (petroleum), hydrodesulfurisation – atmospheric tower	Residues (petroleum), hydrodesulfurised atmospheric tower	64742-78-5	265-181-2
937.	Gas oils (petroleum), heavy fraction, hydrodesulfurised – vacuum distillation	Gas oils (petroleum), hydrodesulfurised heavy vacuum	64742-86-5	265-189-6
938.	Residues (petroleum), steam cracking	Residues (petroleum), steam-cracked	64742-90-1	265-193-8
939.	Residues (petroleum), atmospheric distillation	Residues (petroleum), atmospheric	68333-22-2	269-777-3
940.	Clarified oils (petroleum), hydrodesulfurisation – catalytic cracking	Clarified oils (petroleum), hydrodesulfurised catalytic cracked	68333-26-6	269-782-0
941.	Distillates (petroleum), intermediate fraction, hydrodesulfurised – catalytic cracking	Distillates (petroleum), hydrodesulfurised intermediate catalytic cracked	68333-27-7	269-783-6

942.	Distillates (petroleum), heavy fraction, hydrodesulfurised – catalytic cracking	Distillates (petroleum), hydrodesulfurised heavy catalytic cracked	68333-28-8	269-784-1
943.	Fuel oil, residue from straight-run gas oil distillation, high-sulfur	Fuel oil, residues-straight-run gas oils, high-sulfur	68476-32-4	270-674-0
944.	Fuel oil, residual	Fuel oil, residual	68476-33-5	270-675-6
945.	Residues (petroleum), catalytic reforming – fractionation – distillation of residue	Residues (petroleum), catalytic reformer fractionator residue distn.	68478-13-7	270-792-2
946.	Residues (petroleum), heavy fraction coking – gas oil and vacuum gas oil	Residues (petroleum), heavy coker gas oil and vacuum gas oil	68478-17-1	270-796-4
947.	Residues (petroleum), heavy fraction coking and light fraction vacuum distillation	Residues (petroleum), heavy coker and light vacuum	68512-61-8	270-983-0
948.	Residues (petroleum), light fraction vacuum distillation	Residues (petroleum), light vacuum	68512-62-9	270-984-6
949.	Residues (petroleum), light fraction, steam-cracked	Residues (petroleum), steam-cracked light	68513-69-9	271-013-9
950.	Fuel oil, No 6	Fuel oil, No 6	68553-00-4	271-384-7

951.	Residues (petroleum), topping plant, low-sulfur	Residues (petroleum), topping plant, low-sulfur	68607-30-7	271-763-7
952.	Gas oils (petroleum), heavy fraction – atmospheric distillation	Gas oils (petroleum), heavy atmospheric	68783-08-4	272-184-2
953.	Residues (petroleum), coker scrubber residue, containing condensed aromatic rings	Residues (petroleum), coker scrubber, condensed-ring-arom.-contg	68783-13-1	272-187-9
954.	Distillates (petroleum), vacuum distillation of petroleum residues	Distillates (petroleum), petroleum residues vacuum	68955-27-1	273-263-4
955.	Residues (petroleum), steam-cracked, resinous	955. Residues (petroleum), steam-cracked, resinous	68955-36-2	273-272-3
956.	Distillates (petroleum), vacuum distillation of intermediate fraction	Distillates (petroleum), intermediate vacuum	70592-76-6	274-683-0
957.	Distillates (petroleum), vacuum distillation of light fraction	Distillates (petroleum), light vacuum	70592-77-7	274-684-6
958.	Distillates (petroleum), vacuum distillation	Distillates (petroleum), vacuum	70592-78-8	274-685-1

959.	Gas oils (petroleum), hydrodesulfurisation – coking – heavy fraction – vacuum distillation	Gas oils (petroleum), hydrodesulfurised coker heavy vacuum	85117-03-9	285-555-9
960.	Residue (petroleum), steam cracking, distillates	Residues (petroleum), steam-cracked, distillates	90669-75-3	292-657-7
961.	Residue (petroleum), vacuum distillation, light fraction	Residues (petroleum), vacuum, light	90669-76-4	292-658-2
962.	Fuel oil, heavy fraction, high-sulfur	Fuel oil, heavy, high-sulfur	92045-14-2	295-396-7
963.	Residue (petroleum), catalytic cracking	Residues (petroleum), catalytic cracking	92061-97-7	295-511-0
964.	Distillates (petroleum), intermediate fraction from catalytic cracking, thermally degraded	Distillates (petroleum), intermediate catalytic cracked, thermally degraded	92201-59-7	295-990-6
965.	Residual oils (petroleum)	Residual oils (petroleum)	93821-66-0	298-754-0
966.	Residue, steam cracking, thermally treated	Residues, steam cracked, thermally treated	98219-64-8	308-733-0
967.	Distillates (petroleum), middle fraction, hydrodesulfurised, full boiling range	Distillates (petroleum), hydrodesulfurised full-range middle	101316-57-8	309-863-0

968.	Distillates (petroleum), light paraffinic fraction	Distillates (petroleum), light paraffinic	64741-50-0	265-051-5
969.	Distillates (petroleum), heavy paraffinic fraction	Distillates (petroleum), heavy paraffinic	64741-51-1	265-052-0

1339.	1,4-Dihydroxybenzene (hydroquinone), with the exception of No 14 in Annex 2	1,4-Dihydroxybenzene (Hydroquinone), with the exception of entry 14 in Annex III	123-31-9	204-617-8
1340.	[4-[[4-anilino-1-naphthyl][4-(dimethylamino)phenyl]methylene]cyclohexa-2,5-dien-1-ylidene]dimethylammonium chloride (Basic Blue 26; CI 44045) when used as a substance in hair dye products	[4-[[4-anilino-1-naphthyl][4-(dimethyl-amino)phenyl]methylene]cyclohexa-2,5-dien-1-ylidene]dimethylammonium chloride (Basic Blue 26; CI 44045) when used as a substance in hair dye products	2580-56-5	219-943-6

1341	Disodium 3-[(2,4-dimethyl-5-sulphonatophenyl)azo]-4-hydroxynaphthalene-1-sulphonate (Ponceau SX; CI 14700) when used as a substance in hair dye products	Disodium 3-[(2,4-dimethyl-5-sulphonato-phenyl)azo]-4-hydroxy-naphthalene-1-sulphonate (Ponceau SX; CI 14700) when used as a substance in hair dye products	4548-53-2	224-909-9
1342.	Trisodium tris[5,6-dihydro-5-(hydroxyimino)-6-oxonaphthalene-2-sulphonato(2-)-N5,O6]ferrate(3-) (Acid Green 1; CI 10020) when used as a substance in hair dye products	Trisodium tris[5,6-dihydro-5-(hydro-xyimino)-6-oxonaph-thalene-2-sulpho-nato(2-)-N5,O6]ferrate(3-) (Acid Green 1; CI 10020) when used as a substance in hair dye products	19381-50-1	243-010-2
1343.	4-(Phenylazo)resorcinol (Solvent Orange 1; CI 11920) and its salts, when used as a substance in hair dye products	4-(Phenylazo)resorcinol (Solvent Orange 1; CI 11920) and its salts, when used as a substance in hair dye products	2051-85-6	218-131-9
1344.	4-[(4-Ethoxyphenyl)azo]naphthol (Solvent Red 3; CI 12010) and its salts, when used as a substance in hair dye products	4-[(4-Ethoxyphenyl)azo]naphthol (Solvent Red 3; CI 12010) and its salts, when used as a substance in hair dye products	6535-42-8	229-439-8

1345.	1-[(2-Chloro-4-nitrophenyl)azo]-2-naphthol (Pigment Red 4; CI 12085) and its salts, when used as a substance in hair dye products	1-[(2-Chloro-4-nitrophenyl)azo]-2-naphthol (Pigment Red 4; CI 12085) and its salts when used as a substance in hair dye products	2814-77-9	220-562-2
1346.	3-Hydroxy-N-(o-tolyl)-4-[(2,4,5-trichlorophenyl)azo] naphthalene-2-carboxamide (Pigment Red 112; CI 12370) and its salts, when used as a substance in hair dye products	3-Hydroxy-N-(o-tolyl)-4-[(2,4,5-trichloro-phenyl)azo]naphthalene-2-carboxamide (Pigment Red 112; CI 12370) and its salts when used as a substance in hair dye products	6535-46-2	229-440-3
1347.	N-(5-Chloro-2,4-dimethoxyphenyl)-4-[[5-[(diethylamino)sulphonyl]-2-methoxyphenyl]azo] -3-hydroxynaphthalene -2-carboxamide (Pigment Red 5; CI 12490) and its salts, when used as a substance in hair dye products	N-(5-Chloro-2,4-dimethoxyphenyl)-4-[[5-[(diethylamino)sulphonyl]-2-methoxyphenyl]azo] -3-hydroxynaphthalene -2-carboxamide (Pigment Red 5; CI 12490) and its salts when used as a substance in hair dye products	6410-41-9	229-107-2
1348.	Disodium 4-[(5-chloro-4-methyl-2-sulphonatophenyl)azo]-3-hydroxy-2-naphthoate (Pigment Red 48; CI 15865) and its salts, when used as a substance in hair dye products	Disodium 4-[(5-chloro-4-methyl-2-sulpho-natophenyl)azo]-3-hydroxy-2-naphthoate (Pigment Red 48; CI 15865) when used as a substance in hair dye products	3564-21-4	222-642-2

1349.	Calcium 3-hydroxy-4-[(1-sulphonato-2-naphthyl)azo]-2-naphthoate (Pigment Red 63:1; CI 15880), when used as a substance in hair dye products	Calcium 3-hydroxy-4-[(1-sulphonato-2-naphthyl)azo]-2-naphthoate (Pigment Red 63:1; CI 15880) when used as a substance in hair dye products	6417-83-0	229-142-3
1350.	Trisodium 3-hydroxy-4-(4'-sulphonatonaphthylazo)naphthalene-2,7-disulphonate (Acid Red 27; CI 16185), when used as a substance in hair dye products	Trisodium 3-hydroxy-4-(4'-sulphonato-naphthylazo)naphthalene-2,7-disulphonate (Acid Red 27; CI 16185) when used as a substance in hair dye products	915-67-3	213-022-2
1351.	2,2'-[(3,3'-Dichloro[l,l'-biphenyl]-4,4'-diyl)bis(azo)]bis[N-(2,4-dimethylphenyl)-3-oxobutyramide] (Pigment Yellow 13; CI 21100), when used as a substance in hair dye products	2,2'-[(3,3'-Dichloro[l,l'-biphenyl]-4,4'-diyl)bis(azo)]bis[N-(2,4-dimethylphenyl)-3-oxobutyramide] (Pigment Yellow 13; CI 21100) when used as a substance in hair dye products	5102-83-0	225-822-9
1352.	2,2'-[Cyclohexylidenebis[(2-methyl-4,l-phenylene)azo]]bis[4-cyclohexylphenol] (Solvent Yellow 29; CI 21230), when used as a substance in hair dye products	2,2'-[Cyclohexylidenebis[(2-methyl-4,l-phenylene)azo]]bis[4-cyclo-hexylphenol] (Solvent Yellow 29; CI 21230) when used as a substance in hair dye products	6706-82-7	229-754-0

1353.	1-((4-Phenylazo)phenylazo)-2-naphthol (Solvent Red 23; CI 26100), when used as a substance in hair dye products	1-((4-Phenylazo)phenylazo)-2-naphthol (Solvent Red 23; CI 26100) when used as a substance in hair dye products	85-86-9	201-638-4
1354.	Tetrasodium 6-amino-4-hydroxy-3-[[7-sulphonato-4-[(4-sulphonatophenyl)azo]-1-naphthyl]azo]naphthalene-2,7-disulphonate (Food Black 2; CI 27755), when used as a substance in hair dye products	Tetrasodium 6-amino-4-hydroxy-3-[[7-sulphonato-4-[(4-sulphonato-phenyl)azo]-1 -naphthyl]azo] naphthalene-2,7-disulphonate (Food Black 2; CI 27755) when used as a substance in hair dye products	2118-39-0	218-326-9
1355.	Ethanaminium, N-(4-((4-(diethylamino)phenyl)(2,4-disulfophenyl)methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, hydroxide, inner salt, sodium salt (Acid Blue 1; CI 42045), when used as a substance in hair dye products	Ethanaminium, N-(4-((4-(diethylamino)phe-nyl)(2,4-disulfophenyl) methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, hydroxide, inner salt, sodium salt (Acid Blue 1; CI 42045) when used as a substance in hair dye products	129-17-9	204-934-1

1356.	Ethanaminium, N-(4-((4-(diethylamino)phenyl)(5-hydroxy-2,4-disulfophenyl)methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, hydroxide, inner salt, calcium salt (2:1) (Acid Blue 3; CI 42051), when used as a substance in hair dye products	Ethanaminium, N-(4-((4-(diethylamino)phenyl)(5-hydroxy-2,4-disulfophenyl)methylene)-2,5-cyclohexadien-1-ylidene)-N-ethyl-, hydroxide, inner salt, calcium salt (2:1) (Acid Blue 3; CI 42051) when used as a substance in hair dye products	3536-49-0	222-573-8
1357.	Benzenemethanaminium, N-ethyl-N-(4-((4-(ethyl((3-sulfophenyl)methyl)amino)phenyl)(4-hydroxy-2-sulfophenyl)methylene)-2,5-cyclohexadien-1-ylidene)-3-sulfo-, hydroxide, inner salt, disodium salt (Fast Green FCF; CI 42053) when used as a substance in hair dye products	Benzenemethanaminium, N-ethyl-N-(4-((4-(ethyl((3-sulfophenyl)methyl)amino)phenyl)(4-hydroxy-2-sulfophenyl)methylene)-2,5-cyclohexadien-1-ylidene)-3-sulfo-, hydroxide, inner salt, disodium salt (Fast Green FCF; CI 42053) when used as a substance in hair dye products	2353-45-9	219-091-5
1358.	1,3-Isobenzofurandione, reaction products with methylquinoline and quinoline (Solvent Yellow 33; CI 47000) when used as a substance in hair dye products	1,3-Isobenzofurandione, reaction products with methylquinoline and quinoline (Solvent Yellow 33; CI 47000) when used as a substance in hair dye products	8003-22-3	232-318-2

1359.	Nigrosine (CI 50420) when used as a substance in hair dye products	Nigrosine (CI 50420) when used as a substance in hair dye products	8005-03-6	-
1360.	8,18-Dichloro-5,15-diethyl-5,15-dihydrodiindolo[3,2-b:3',2'-m] triphenodioxazine (Pigment Violet 23; CI 51319) when used as a substance in hair dye products	8,18-Dichloro-5,15-diethyl-5,15-dihydro-diindolo[3,2-b:3',2'-m] triphenodioxazine (Pigment Violet 23; CI 51319) when used as a substance in hair dye products	6358-30-1	228-767-9
1361.	1,2-Dihydroxyanthraquinone (Pigment Red 83; CI 58000) when used as a substance in hair dye products	1,2-Dihydroxyanthraquinone (Pigment Red 83; CI 58000) when used as a substance in hair dye products	72-48-0	200-782-5
1362.	Trisodium 8-hydroxypyrene-1,3,6-trisulphonate (Solvent Green 7; CI 59040) when used as a substance in hair dye products	Trisodium 8-hydroxypyrene-1,3,6-trisulphonate (Solvent Green 7; CI 59040) when used as a substance in hair dye products	6358-69-6	228-783-6
1363.	1-Hydroxy-4-(p-toluidino)anthraquinone (Solvent Violet 13; CI 60725) when used as a substance in hair dye products	1-Hydroxy-4-(p-toluidino)anthra-quinone (Solvent Violet 13; CI 60725), when used as a substance in hair dye products	81-48-1	201-353-5
1364.	1,4-bis(p-Tolylamino)anthraquinone (Solvent Green 3; CI 61565) when used as a substance in hair dye products	1,4-bis(p-Tolylamino)anthraquinone (Solvent Green 3; CI 61565) when used as a substance in hair dye products	128-80-3	204-909-5

1365.	6-Chloro-2-(6-chloro-4-methyl-3-oxobenzo[b]thien-2(3H)-ylidene)-4-methylbenzo[b]thiophene-3(2H)-one (VAT Red 1; CI 73360) when used as a substance in hair dye products	6-Chloro-2-(6-chloro-4-methyl-3-oxobenzo[b]thien-2(3H)-ylidene)-4-methylbenzo[b]thiophene-3(2H)-one (VAT Red 1; CI 73360) when used as a substance in hair dye products	2379-74-0	219-163-6
1366.	5,12-Dihydroquino[2,3-b]acridine-7,14-dione (Pigment Violet 19; CI 73900) when used as a substance in hair dye products	5,12-Dihydroquino[2,3-b]acridine-7,14-dione (Pigment Violet 19; CI 73900) when used as a substance in hair dye products	1047-16-1	213-879-2
1367.	(29H,31H-Phthalocyaninato(2-)-N29,N30,N31,N32)copper (Pigment Blue 15; CI 74160) when used as a substance in hair dye products	(29H,31H-Phthalocyaninato(2-)-N29,N30,N31,N32)copper (Pigment Blue 15; CI 74160) when used as a substance in hair dye products	147-14-8	205-685-1
1368.	Disodium [29H,31H-phthalocyaninedisulphonato(4-)-N29,N30,N31,N32]cuprate(2-) (Direct Blue 86; CI 74180) when used as a substance in hair dye products	Disodium [29H,31H-phthalocyani-nedisul-phonato(4-)-N29,N30,N31, N32]cuprate(2-) (Direct Blue 86; CI 74180) when used as a substance in hair dye products	1330-38-7	215-537-8
1369.	Polychloro copper phthalocyanine (Pigment Green 7; CI 74260) when used as a substance in hair dye products	Polychloro copper phthalocyanine (Pigment Green 7; CI 74260) when used as a substance in hair dye products	1328-53-6	215-524-7

Serious allergic reactions may occur when colouring hair.
Read the instructions and follow them.
This product is not intended for use by persons under 16 years of age.
The presence of temporary "black henna" tattoos may increase the risk of allergy.
Do not colour your hair if:
- you have a rash on your face or a sensitive, irritated or damaged
have ever experien

(b) Professional use For (a) and (b): After mixing with an oxidising agent, the maximum concentration applied for hair colouring must not exceed 5 percent calculated as the free base	(b) Must be printed on the label: Dye-to-oxidising-agent ratio in the mixture. For professional use only.  Serious allergic reactions may occur when colouring hair. Read the instruc-tions and follow them. This product is not intended for use by persons under 16 years of age. The presence of temporary "black henna" tattoos may increase allergy. Do not colour

9a	1,4-Benzene diamine, 2-methyl-2,5-Diaminotoluene sulfate (1,4-Benzene diamine, 2-methyl-2,5-Diaminotoluene sulphate)	Toluene-2,5-diamine Toluene-2,5-diamine sulfate ((Toluene-2,5-Di-amine)Toluene-2,5-Diamine Sulfate) CAS No. 95-70-5 / 615-50-9, EC No. 202-442-1 / 210-431-8	(a) Colouring agent in oxidative hair dyes (b) Product for eyelash colouring	(a) (i) General use (a) (ii) Professional use	(a) Must be printed on the label: Dye-to-oxidising-agent ratio in the mixture.  Serious allergic reactions may occur when colouring hair.

Read the instructions and follow them.
This product is not intended for use by persons under 16 years of age.
The presence of temporary "black henna" tattoos may increase the risk of allergy.
Do not colour your hair if:
- you have a rash on your face or a sensitive, irritated or damaged scalp,
- you have ever experienced any reaction after colouring your hair,
- you experienced a reaction

(b) Professional use For (a) and (b): After mixing with an oxidising agent, the maximum concentration applied for colouring hair or eyelashes must not exceed 2,0 percent (calculated as the free base) or 3,6 percent (calculated as sulfate)	(b) Must be printed on the label: Dye-to-oxidising-agent ratio in the mixture.  Serious allergic reactions may occur when colouring eyelashes. Read the instructions and follow them. This product is not intended for use by persons under 16 years of age. The presence of temporary "black henna" tattoos may increase the risk of allergy

your eyelashes if:

9b	1-Methyl-2,6-bis-(2-hydroxyethylamino) - benzene (1-Methyl-2,6-bis-(2-hydroxyethylamino)-benzene)	2,6-Dihydroxy-ethylaminotoluene (2,6-Dihydroxyethyl-aminotoluene) CAS No. 149330-25-6 EC No. 443-210-1)	Colouring agent in oxidative hair dyes		After mixing with an oxidising agent, the maximum concentration applied for hair colouring must not exceed 1,0 percent. - Do not use with nitrosating ingredients. - Maximum nitrosamine content: 50 µg/kg. - Store in containers free of nitrites.	Must be printed on the label: Dye-to-oxidising-agent ratio in the mixture.  Serious allergic reactions may occur when colouring hair. Read the instructions and follow them. This product is not intended for use by persons under 16 years of age. The presence of temporary "black henna" tattoos may increase the risk of allergy. Do not colour - you have a rash on

CAS No. 1310-58-3
EC No. 215-181-3

For softening rough (keratinised) skin

1,5 percent (4)

Contains alkali.
Avoid contact with the eyes.
Keep out of reach of children
Read the instructions for use carefully

16

1-Naphthalenol
(1-Naphthalenol)

1-Naphthol
(1-Naphthol)
CAS No. 90-15-3,
EC No. 201-969-4

Colorant in oxidative hair dyes

After mixing with the oxidising agent, the maximum concentration
used for hair colouring must not exceed 2,0 percent

Must be printed on the label:
Dye-to-oxidising-agent ratio in the mixture

Serious allergic reactions may occur during hair colouring.
Read and follow the instructions. This product is not intended for use by persons under 16 years of age.
The presence of temporary “black henna” tattoos may increase the risk of allergy.
Do not colour your hair if:
- you have a facial rash;
- you have a sensitive scalp,
- you have irritation and/or scalp damage,
- you have ever experienced any reaction after colouring your hair,
- you have previously experienced a reaction to temporary “black henna” tattoos.

Quinolin-9-ol, 6’-methoxy-, (8.alpha, 9R) and its salts ((Cinchonan-9-ol, 6’-methoxy-, (8.alpha.,9R)- and its salts)
Quinine (Quinine) (CAS No. 130-95-0, EC No. 205-003-0)
(a) Rinse-off hair products
(a) 0,5 percent calculated as the free base
(b) Leave-on hair products
(b) 0,2 percent (calculated as quinine)
22
1,3-Benzenediol (1,3-Benzenediol)

Resorcinol
(Resorcinol)
CAS No. 108-46-3,
EC No. 203-585-2

(a) Colorant in oxidative hair dyes

For (a) and (b):
After mixing with the oxidising agent, the maximum concentration used for hair or eyelash colouring must not exceed 1,25 percent

(a) Must be printed on the label:
Dye-to-oxidising-agent ratio in the mixture

Serious allergic reactions may occur during hair colouring.
Read and follow the instructions.

This product is not intended for use by persons under 16 years of age.
Temporary “black henna” tattoos may increase the risk of allergy.
Do not colour your hair if:
- you have a facial rash;
- you have a sensitive scalp,
- you have irritation and/or scalp damage,
- you have ever experienced any reaction after colouring your hair,
- you have previously experienced a reaction to temporary “black henna” tattoos.
Contains resorcinol.
Rinse the hair thoroughly after application.
In case of contact with the eyes, rinse immediately.
Do not use for colouring the eyebrows and eyelashes.

(b) Products for eyelash coloring

(b) For professional use only

(b) Must be printed on the label:
Dye-to-oxidising-agent ratio in the mixture
For professional use only.
Contains resorcinol

Serious allergic reactions may occur when coloring eyelashes.
Read the instructions and follow them
This product is not intended for use by persons under 16 years of age.
Temporary “black henna” tattoos may increase the risk of allergy.
Do not color your eyelashes if:
- you have a facial rash;
- you have a sensitive scalp,
- you have ever experienced any reaction after coloring your hair or eyelashes,
- you have previously experienced a reaction to temporary “black henna” tattoos.
In case of contact with the eyes, rinse immediately.

(c) Hair lotions and shampoos

(c) 0,5 percent

(c) Contains resorcinol

23

(a) Alkali metal sulphides (Alkaline sulphides)
(a) Depilatory products
(a) 2 percent (calculated as sulfur)
pH up to 12.7
(a) Avoid contact with the eyes. Keep out of reach of children
(b) Alkaline earth metal sulphides (Alkaline earth sulphides)
(b) Depilatory products
(b) 6 percent (calculated as sulfur)
(b) Avoid contact with the eyes. Keep out of reach of children.
24

Water-soluble zinc salts with the exception of 4-hydroxybenzene-sulphonate (reference number 25 of this Annex) and zinc pyrithione (reference number 1670 of Annex 1 to this Technical Regulation) (Water-soluble zinc salts with the exception of zink-4-hydroxybenzene-sulphonate (entry 25) and zinc pyrithione (Annex II, entry 1670)
Zinc acetate, zinc chloride, zinc gluconate, zinc glutamate (Zinc acetate, zinc chloride, zinc gluconate. zinc glutamate)
1 percent (calculated as zinc)

Zinc 4-hydroxybenzene-sulphonate (Zinc 4-hydroxybenzene sulphonate)
Zinc phenolsulfonate (Zink phenolsulfonate) CAS No. 127-82-2, EC No. 204-867-8
Deodorants, antiperspirants and thick (astringent) lotions
6 percent (calculated as anhydrous substance)

Avoid contact with the eyes

26

Ammonium monofluorophosphate
(Ammonium monofluorophosphate)

Ammonium monofluorophosphate
(Ammonium monofluorophosphate)
CAS No. 20859-38-5/ 66115-19-3

Oral hygiene products

(a) 0,15 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15 percent.

(a) Contains ammonium monofluorophosphate
For any toothpaste containing compounds with fluoride at a concentration of 0,1 to 0,15 percent expressed as the molar mass of fluorine, if it is not labeled as contraindicated for children (for example, "for adults only"), the following labeling is mandatory:
"Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimize swallowing, brushing must be carried out under adult supervision".
In case of fluoride intake from other sources, consult a dentist or physician".

(b) At a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine.
In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5 percent.

(b) Contains ammonium monofluorophosphate.
For all toothpastes containing fluoride at a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided.
Recommendations for use must be specified.
Not intended for systemic use.
Fluoride intake from other sources is not recommended.
Do not use for persons under 16 years of age. Use on the recommendation of and under the supervision of a dentist.

27

Disodium fluorophosphate
(Disodium fluorophosphate)

Sodium monofluorophosphate
(Sodium monofluoro-phosphate)
CAS No. 10163-15-2/ 7631-97-2,
EC No. 233-433-0/ 231-552-2

Oral hygiene products

(a) 0,15 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15 percent.

(a) Contains sodium monofluorophosphate.
For any toothpaste containing compounds with fluoride at a concentration of 0,1 to 0,15 expressed as the molar mass of fluorine, if it is not labeled as contraindicated for children (for example, "for adults only"), the following labeling is mandatory:

"Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimize swallowing, brushing must be carried out under adult supervision".
In case of fluoride intake from other sources, consult a dentist or physician ".

(b) At a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5 percent.

(b) Contains sodium monofluorophosphate
For all toothpastes containing fluoride at a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided.
Recommendations for use must be specified.
Not intended for systemic use.
Fluoride intake from other sources is not recommended.
Do not use for persons under 16 years of age. Use on the recommendation of and under the supervision of a dentist.

28

Dipotassium fluorophosphate
(Dipotassium fluorophosphate)

Potassium monofluorophosphate
(Potassium monofluoro-phosphate)
CAS No. 14104-28-0,
EC No. 237-957-0

Oral hygiene products

(a) 0,15 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15 percent.

(a) Contains potassium monofluorophosphate.
For any toothpaste containing compounds with fluoride at a concentration of 0,1 to 0,15 percent expressed as the molar mass of fluorine, if it is not labeled as contraindicated for children (for example, "for adults only"), the following labeling is mandatory:
"Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimize swallowing, brushing must be carried out under adult supervision".
In case of fluoride intake from other sources, consult a dentist or physician ".

(b) At a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5 percent

(b) Contains potassium monofluorophosphate
For all toothpastes containing fluoride at a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided.
Recommendations for use must be specified.
Not intended for systemic use.
Fluoride intake from other sources is not recommended.
Do not use for persons under 16 years of age. Use on the recommendation of and under the supervision of a dentist.

29

Calcium fluorophosphate
(Calcium fluorophosphate)

Calcium monofluorophosphate
(Calcium monofluoro-phosphate)

CAS No. 7789-74-4,
EC No. 232-187-1

Oral hygiene products

(a) 0,15 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15 percent.

(a) Contains calcium monofluorophosphate
For any toothpaste containing compounds with fluoride at a concentration of 0,1 to 0,15 percent expressed as the molar mass of fluorine, if it is not labeled as contraindicated for children (for example, "for adults only"), the following labeling is mandatory:
"Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimize swallowing, brushing must be carried out under adult supervision".
In case of fluoride intake from other sources, consult a dentist or physician ".

(b) At a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5 percent.

(b) Contains calcium monofluorophosphate
For all toothpastes containing fluoride at a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided.
Recommendations for use must be specified.
Not intended for systemic use.
Fluoride intake from other sources is not recommended.
Do not use for persons under 16 years of age. Use on the recommendation of and under the

supervision of a dentist.

30

Calcium fluoride
(Calcium fluoride)

Calcium fluoride
(Calcium fluoride)
CAS No. 7789-75-5,
EC No. 232-188-7

Oral hygiene products

(a) 0,15 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15 percent.

(a) Contains calcium fluoride
For any toothpaste containing compounds with fluoride at a concentration of 0,1 to 0,15 percent expressed as the molar mass of fluorine, if it is not labelled as contraindicated for children (for example, "for adults only"), the following labelling is mandatory:
"Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimise swallowing, brushing must be carried out under adult supervision".
In case of fluoride intake from other sources, consult a dentist or physician ".

(b) At a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine. In mixtures with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine expressed as the molar mass of fluorine must not exceed 0,5 percent

(b) Contains calcium fluoride
For all toothpastes containing fluoride at a concentration of 0,15 – 0,5 percent expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided.
Recommendations for use must be specified.
Not intended for systemic use.
Fluoride intake from other sources is not recommended.
Do not use for persons under 16 years of age. Use on the recommendation of and under the supervision of a dentist.

31	Sodium fluoride (Sodium fluoride)	Sodium fluoride (Sodium fluoride) CAS No. 7681-49-4, EC No. 231-667-8	Oral hygiene products	(a) 0,15% expressed as the molar mass of fluorine. Recommendations for use must be specified. Not intended for systemic use. Consumption of fluoride from other sources is not recommended. Do not use for persons under 16 years of age. Use on the recommendation of, and under the supervision of, a dentist.				
44	1,3-Bis-(hydroxymethyl)imi-dazolidine-2-thione (1,3-Bis (hydroxymethyl)-imidazolidine-2-thione)	Dimethylol ethylene thiourea (Dimethylol ethylene thiourea) CAS No 15534-95-9, EC No 239-579-1	(a) Hair products	(a) up to 2%		(a) Must not be used in aerosol products (spray)	(a) (b) Contains dimethylol ethylene thiourea
			(b) Nail products	(b) up to 2%	(b) pH <4		

45	Benzyl alcohol (6) (Benzyl alcohol)	Benzyl alcohol (Benzyl alcohol) CAS No 100-51-6, EC No 202-859-9	(a) Solvent		When used for purposes other than inhibition of the proliferation of microorganisms, the intended use of the ingredient must be specified in the technical documents.	
	(b) Fragrance/ Fragrance compositions/their raw materials			(b) The presence of the substance must be indicated in the list of ingredients in accordance with paragraph 9.3 of Article 5 of this Technical Regulation when its concentration exceeds: - 0,001% in leave-on products; - 0,01% in rinse-off products.		
46	6-Methylcoumarin (6-methylcoumarin)	6-Methylcoumarin (6-methylcoumarin) CAS No 92-48-8, EC No 202-158-8	Oral hygiene products	0,003%		

47	3-Pyridinemethanol hydrofluoride (3-Pyridinemethanol hydrofluoride)	Nicomethanol hydrofluoride (Nicomethanol hydrofluoride) CAS No 62756-44-9	Oral hygiene products	(a) 0,15% expressed as the molar mass of fluorine. In a mixture with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15%.		(a) Contains nicomethanol hydrofluoride For any toothpaste containing compounds containing fluoride at a concentration of 0,1 to 0,15% expressed as the molar mass of fluorine, unless it is labelled as contraindicated for children (for example, "for adults only"), the following labelling is mandatory: "Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimise swallowing, brushing must be carried out under adult supervision". If fluoride is consumed from other sources, consult a dentist or physician.

		(b) At a concentration of 0,15 – 0,5% expressed as the molar mass of fluorine. In a mixture with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5% expressed as the molar mass of fluorine	(b) Contains nicomethanol hydrofluoride. For all toothpastes containing fluoride at a concentration of 0,15 – 0,5% expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided. Recommendations for use must be specified. Not intended for systemic use. Consumption of fluoride from other sources is not recommended. Do not use for persons under 16 years of age. Use on the recommendation of, and under the supervision of, a dentist.			
48	Silver nitrate (Silver nitrate)	Silver nitrate (Silver nitrate) CAS No 7761-88-8, EC No 231-853-9	Exclusively for eyebrow and eyelash colouring	4%		Contains silver nitrate. In case of contact with the eyes, rinse immediately

49	Selenium disulphide (Selenium disulphide)	Selenium disulphide (Selenium disulphide) (CAS No 7488-56-4, EC No 231-303-8)	Anti-dandruff shampoos	1%		Contains selenium disulphide. Avoid contact with the eyes and damaged skin	
50	Aluminium zirconium chloride hydroxide complex AlxZr(OH)yClz and aluminium zirconium chloride hydroxide glycine complex (Aluminium zirconium chloride hydroxide complexes AlxZr(OH)yClz and the aluminium zirconium chloride hydroxide glycine complexes)		Antiperspirants	20% (expressed as anhydrous aluminium-zirconium chloride hydroxide) 5,4% (calculated as zirconium)		1. The ratio of the number of aluminium atoms to the number of zirconium atoms must be within the range 2–10. 2. The ratio of the number of atoms (aluminium + zirconium) to the number of chlorine atoms must be within the range 0,9–2,1. 3. Must not be used in aerosol products (spray)	Do not apply to damaged or irritated skin
51	Bis(8-hydroxyquinolinium) sulphate (Bis(8-hydroxyquinolinium) sulphate)	Oxyquinoline sulfate (Oxyquinoline sulfate) CAS No134-31-6, EC No 205-137-1	Stabiliser of hydrogen peroxide in rinse-off hair products.	0,3% (calculated as the free base)			

Stabiliser of hydrogen peroxide in leave-on hair products		0,03% (calculated as the free base)					
52	Methanol (Methanol)	Methyl alcohol (Methyl alcohol) CAS No 67-56-1, EC No 200-659-6	For denaturing ethyl or isopropyl alcohols	5% (as a percentage of ethyl or isopropyl alcohol)			
53	1-Hydroxyethylidene-diphosphonic acid and its salts (1-Hydroxyethylidene-diphosphonic acid and its salts)	Etidronic acid (Etidronic acid) CAS No 2809-21-4, EC No 220-552-8	(a) Hair care products	1,5% (calculated as etidronic acid)			
			(b) Soap	0,2% (calculated as etidronic acid)			
54	1-Phenoxypropan-2-ol (7) (1-Phenoxypropan-2-ol (7))	Phenoxyisopropanol (Phenoxyisopropanol) CAS No 770-35-4, EC No 212-222-7	Only in rinse-off products Prohibited in oral hygiene products	2%	When used for purposes other than inhibition of the proliferation of microorganisms, the intended use of the ingredient must be specified in the technical documents.		
55	Moved or deleted Moved or deleted						

56	Magnesium fluoride (Magnesium fluoride)	Magnesium fluoride (Magnesium Fluoride) CAS No 7783-40-6, EC No 231-995-1	Oral hygiene products	(a) 0,15% expressed as the molar mass of fluorine. In a mixture with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,15%.		(a) Contains magnesium fluoride. For any toothpaste containing compounds containing fluoride at a concentration of 0,1 to 0,15% expressed as the molar mass of fluorine, unless it is labelled as contraindicated for children (for example, "for adults only"), the following labelling is mandatory: "Children 6 years and younger: the amount of toothpaste used must not exceed the size of a pea. To minimise swallowing, brushing must be carried out under adult supervision". If fluoride is consumed from other sources, consult a dentist or physician.

				(b) At a concentration of 0,15 – 0,5% expressed as the molar mass of fluorine. In a mixture with other fluorine-containing compounds permitted in this Annex, the total concentration of fluorine must not exceed 0,5%.	(b) Contains magnesium fluoride. For all toothpastes containing fluoride at a concentration of 0,15 – 0,5% expressed as the molar mass of fluorine, information on the fluoride mass fraction must be provided. Recommendations for use must be specified. Not intended for systemic use. Consumption of fluoride from other sources is not recommended. Do not use for persons under 16 years of age. Use on the recommendation of, and under the supervision of, a dentist.
57	Strontium chloride hexahydrate (Strontium chloride hexahydrate)	Strontium chloride (Strontium chloride) CAS No 10476-85-4, EC No 233-971-6	(a) Oral hygiene products,	3,5% (calculated as strontium). In a mixture with other strontium-containing compounds, the concentration of strontium must not exceed 3,5%		Contains strontium chloride. Frequent use by children is not recommended

(b) Shampoos, face-care products		2,1% (calculated as strontium). In a mixture with other strontium-containing compounds, the concentration of strontium must not exceed 2,1%				
58	Strontium acetate hemihydrate (Strontium acetate hemihydrate)	Strontium acetate (Strontium acetate) CAS No 543-94-2, EC No. 208-854-8	Oral hygiene products	3,5 percent (expressed as strontium). In a mixture with other strontium-containing compounds, the concentration of strontium must not exceed 3,5 percent		Contains strontium acetate. Frequent use by children is not recommended
59	Talc (hydrated magnesium silicate) (Talc: Hydrated magnesium silicate)	Talc (Talc) CAS No 14807-96-6, EC No. 238-877-9	(a) Powdered products intended for children under three years			(a) Do not allow the powder to enter the child's mouth or nose
(b) Other products						

60	Fatty acid dialkylamides and dialkanolamides (Fatty acid dialkylamides and dialkanolamides)			Maximum secondary amine content: 0,5 percent	- Must not be used together with nitrosating ingredients. - Store in containers that do not contain nitrites. -Maximum secondary amine content: 5 percent (applies to the raw material). - Maximum nitrosamine content: 50 µg/kg	
61	Monoalkylamines, monoalkanolamines and their salts (Monoalkylamines, monoalkanolamines and their salts)			Maximum secondary amine content: 0,5 percent	– Must not be used together with nitrosating ingredients. – Minimum purity – 99 percent –Maximum secondary amine content: 0,5 percent (applies to the raw material) – Maximum nitrosamine content: 50 µg/kg. – Store in containers that do not contain nitrites	

62	Trialkylamines, trialkanolamines and their salts (Trialkylamines, Trialkanolamines and their salts)		(a) Leave-on product (b) Rinse-off product	(a) 2,5 percent	(a) (b): – Must not be used together with nitrosating ingredients. – Minimum purity – 99 percent –Maximum secondary amine content: 0,5 percent (applies to the raw material) – Maximum nitrosamine content: 50 µg/kg. – Store in containers that do not contain nitrites		
63	Strontium hydroxide (Strontium hydroxide)	Strontium hydroxide (Strontium hydroxide) (CAS No 18480-07-4, EC No. 242-367-1)	pH adjuster in depilatory products	3,5 percent (expressed as strontium)		pH ≤12.7	Keep out of reach of children. Avoid contact with the eyes.
64	Strontium peroxide (Strontium peroxide)	Strontium peroxide (Strontium peroxide) (CAS No 1314-18-7, EC No. 215-224-6)	Rinse-off hair products	4,5 percent (expressed as strontium)		All products must comply with the requirements for the concentration of released hydrogen peroxide. Professional use.	For professional use only. Avoid contact with the eyes. If the product gets into the eyes, rinse immediately. Use gloves.

65	Benzalkonium chloride, bromide and saccharinate (Benzalkonium Chloride, bromide and saccharinate)(9)	Benzalkonium bromide (Benzalkonium bromide) (CAS No91080-29-4, EC No. 293-522-5) Benzalkonium chloride (Benzalkonium chloride) CAS No63449-41-2/ 68391-01-5/ 68424-85-1/ 85409-22-9, EC No. 264-151-6/ 269-919-4/ 270-325-2/287-089-1 Benzalkonium saccharinate (Benzalkonium saccharinate) CAS No 68989-01-5, EC No. 273-545-7	Rinse-off hair products (scalp)	3 percent (expressed as benzalkonium chloride)		In the finished product, the concentration of benzalkonium chloride, bromide and saccharinate with an alkyl chain of C14 or less must not exceed 0,1 percent (expressed as benzalkonium chloride). When used for purposes other than inhibiting the proliferation of microorganisms, the intended use of the ingredient must be specified in the technical documents.	Avoid contact with the eyes
66	Polyacrylamides (Polyacrylamides)		(a) Leave-on body products			(a) Maximum residual acrylamide content: 0,1 mg/kg	
(b)	Other products			(b) Maximum residual acrylamide content: 0,5 mg/kg			

67	2-Benzylideneheptanal (2-Benzylideneheptanal)	Amyl cinnamal (Amyl cinnamal) CAS No 122-40-7, EC No. 204-541-5			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
68	Moved or deleted Moved or deleted					
69	Cinnamyl alcohol (Cinnamyl alcohol)	Cinnamyl alcohol (Cinnamyl alcohol) CAS No 104-54-1, EC No. 203-212-3			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	

70	3,7-Dimethyl-2,6-octadienal (3,7-Dimethyl-2,6-octadienal)	Citral (Citral) CAS No. 5392-40-5, EC No. 226-394-6			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
71	Phenol, 2-methoxy-4-(2- propenyl) (Phenol, 2-methoxy-4-(2-propenyl)-	Eugenol (Eugenol) CAS No. 97-53-0, EC No. 202-589-1			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	

72	Hydroxycitro-nellal (7-Hydroxycitronellal)	Hydroxycitro-nellal (Hydroxycitronellal) (CAS No. 107-75-5, EC No. 203-518-7)	(a) Oral hygiene products		(a) (b) The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
(b)	Other products		(b) 1,0 percent			
73	Phenol, 2-methoxy-4-(1-propenyl)- (Phenol, 2-methoxy-4-(1-propenyl)-	Isoeugenol (Isoeugenol) CAS No. 97-54-1/5932-68-3, EC No. 202-590-7/227-678-2	(a) Oral hygiene products		(a) (b) The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
(b)	Other products		(b) 0,02 percent			

74	2-Pentyl-3-phenylprop-2-en-1-ol (2-Pentyl-3-phenylprop-2-en-1-ol)	Amylcinnamyl alcohol (Amylcinnamyl alcohol) CAS No. 101-85-9, EC No. 202-982-8			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
75	Benzyl salicylate (Benzyl salicylate)	Benzyl salicylate (Benzyl salicylate) CAS No. 118-58-1, EC No. 204-262-9			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	

76	2-Propenal, 3-phenyl- (2-Propenal, 3-phenyl-)	Cinnamal (Cinnamal) CAS No. 104-55-2, EC No. 203-213-9			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
77	2H-1-Benzopyran-2-one) (2H-1-Benzopyran-2-one)	Coumarin (Coumarin) CAS No. 91-64-5, EC No. 202-086-7			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	

78	2,6-octadien-1-ol, 3,7-dimethyl-, (2E)- (2,6-Octadien-1-ol, 3,7-dimethyl-,(2E)-	Geraniol (Geraniol) CAS No. 106-24-1, EC No. 203-377-1			The substance must be included in the list of ingredients in accordance with paragraph 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001 percent for leave-on products; 0,01 percent for rinse-off products.	
79	Moved or deleted Moved or deleted					

80	4-Methoxy benzyl alcohol (4-Methoxy benzyl alcohol)	Anise alcohol (Anise alcohol) CAS No. 105-13-5, EC No. 203-273-6			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

81	2-Propenoic acid, 3-phenyl-, phenylmethyl ester (2-Propenoic acid, 3-phenyl-, phenylmetthyl ester)	Benzyl cinnamate (Benzyl cinnamate) CAS No. 103-41-3, EC No. 203-109-3			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

82	2,6,10-Dodecatrien-1-ol, 3,7,11-trimethyl-(2,6,10-Dodecatrien-1-ol, 3,7,11-trimethyl-)	Farnesol (Farnesol) CAS No. 4602-84-0, EC No. 225-004-1			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	
83	Moved or deleted Moved or deleted					

84	1,6-Octadien-3-ol, 3,7-dimethyl-(1,6-Octadien-3-ol, 3,7-dimethyl-)	Linalool (Linalool) CAS No. 78-70-6, EC No. 201-134-4			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

85	Benzyl benzoate (Benzyl benzoate)	Benzyl benzoate (Benzyl benzoate) CAS No. 120-51-4, EC No. 204-402-9			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

86	Citronellol -3,7-dimethyloct-6-en-1-ol (Citronellol/ (±) -3,7-dimethyloct-6-en-1-ol)	Citronellol (Citronellol) CAS No. 106-22-9/ 26489-01-0, EC No. 203-375-0/ 247-737-6			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

87	2-Benzylideneoctanal (2-Benzylideneoctanal)	Hexyl cinnamal (Hexyl cinnamal) CAS No. 101-86-0, EC No. 202-983-3			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

88	d-Limonene(4R)-1-methyl-4-(1-methylethenyl)cyclohexene (d-Limonene(4R)-1-Methyl-4-(1-methyl-ethenyl) cyclohexene)	Limonene (Limonene) CAS No. 5989-27-5, EC No. 227-813-5			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

89	Methyl oct-2-ynoate Methyl heptyne carbonate (Methyl Oct-2-ynoate; Methyl heptine carbonate)	Methyl 2-octynoate (Methyl 2-Octynoate) CAS No. 111-12-6, EC No. 203-836-6	(a) Oral hygiene products		(a) (b) The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	
			(b) Other products	(b) 0,01% when used separately. In a mixture with methyl octyne carbonate, the total content in the finished product must not exceed 0,01% (the content of methyl octyne carbonate must not exceed 0,002%)		

90	3-Methyl-4-(2,6,6-trimethyl-2-cyclohexen-1-yl)-3-buten-2-one (3-Methyl-4-(2,6,6-trimethyl-2-cyclohexen-1-yl)-3-buten-2-one)	Alpha-isomethyl ionone (alpha-Isomethyl ionone) CAS No. 127-51-5, EC No. 204-846-3			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

91	Oak moss extract (Oak moss extract)	Oak moss extract (Evernia prunastri extract) CAS No. 90028-68-5, EC No. 289-861-3			The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	

92	Treemoss extract (Treemoss extract)	Treemoss extract (Evernia furfuracea extract) CAS No. 90028-67-4, EC No. 289-860-8				The substance must be included in the list of ingredients in accordance with Clause 9.3 of Article 5 of this Technical Regulation if its concentration exceeds: 0,001% for leave-on products; 0,01% for rinse-off products.	
93	2,4-Pyrimidinediamine, 3-oxide (2,4-Pyrimidinediamine, 3-oxide)	Diaminopyrimidine oxide (Diaminopyrimidine oxide) CAS No. 74638-76-9	Hair products	1,5%			

94	Dibenzoyl peroxide (Dibenzoyl peroxide)	Benzoyl peroxide (Benzoyl peroxide) CAS No. 94-36-0, EC No. 202-327-6	Artificial nail products	0,7% (after mixing for use)	Professional use.	For professional use only. Avoid contact with the skin Read the instructions for use carefully
95	Hydroquinone methyl ether (Hydroquinone methylether/Mequinol)	p-Hydroxyanisole (p-Hydroxyanisol) CAS No. 150-76-5, EC No. 205-769-8	Artificial nail products	0,02% (after mixing for use)	Professional use.	For professional use only. Avoid contact with the skin. Read the instructions for use carefully
96	5-tert-Butyl-2,4,6-trinitro-m-xylene (5-tert-Butyl-2,4,6-trinitro-m-xylene)	Musk xylene (Musk xylene) CAS No. 81-15-2, EC No. 201-329-4	All perfumery and cosmetic products, except oral hygiene products	(a) 1% in perfumes, eau de parfums		
				(b) 0,4% in toilet waters and extra colognes		
				(c) 0,03% in other products		

97	4’-tert-Butyl-2’,6’-dimethyl-3’,5’-dinitroacetophenone (4’-tert-Butyl-2’,6’-dimethyl-3’,5’-dinitroacetophenone)	Musk ketone (Musk ketone) CAS No. 81-14-1, EC No. 201-328-9	All perfumery and cosmetic products, except oral hygiene products	(a) 1,4% in perfumes, eau de parfums		
(b) 0,56% in toilet waters, extra colognes						
(c) 0,042% in other products						

98	2-Hydroxybenzoic acid (Benzoic acid,2-hydroxy-) (9)	Salicylic acid (Salicylic acid) CAS No. 69-72-7, EC No. 200-712-3	(a) Rinse-off hair products	a) 3%	(a), (b), (c) Must not be used in products for children under 3 years of age. Must not be used: - in forms that may result in exposure of the end consumer's lungs by inhalation; - in oral hygiene products. When used for purposes other than inhibition of the proliferation of microorganisms, the purpose must be apparent from the product description. The total concentration of salicylic acid,	(a), (b), (c) Not intended for use by children under 3 years of age (10)
			(b) Other products, except body lotion, eye shadow, mascara, eyeliner, lipstick and roll-on deodorant	b) 2%		

of use, must not exceed

(c) Body lotion, eye shadow, mascara, eyeliner, lipstick, ball-type deodorant		c) 0,5 percent				
99	Inorganic sulphites and bisulphites (11) (Inorganic sulphites and bisulphites (11))		a) Oxidative hair colouring products	a) 0,67 percent (calculated as SO2)	Where used for purposes other than inhibition of the proliferation of microorganisms, the intended use of the ingredient must be specified in the technical documents.	
b) Hair straightening products			b) 6,7 percent (calculated as SO2)			
c) Self-tanning products for the face			c) 0,45 percent (calculated as SO2)			
d) Other self-tanning products			d) 0,4 percent (calculated as SO2)			

100	1-(4-chlorophenyl)-3-(3,4-dichlorophenyl) urea (12) (1-(4-Chlorophenyl)-3-(3,4-dichlorophenyl) urea (12))	Triclocarban (Triclocarban) CAS No. 101-20-2, EC No. 202-924-1	Rinse-off product	1,5 percent	Purity criterion: 3,3',4,4'-tetrachloroazobenzene ≤ 1 part per million (ppm) 3,3',4,4'-tetrachloroazoxybenzene ≤ 1 part per million (ppm) for other purposes, and Where used for purposes other than inhibition of the proliferation of microorganisms, the intended use of the ingredient must be specified in the technical documents.

EC No 231-265-2

Hair dye substance in oxidative hair dye products

After mixing under oxidative conditions, the maximum concentration applied to hair must not exceed 2,0 % (when 2-methyl-1-naphthol and 1-acetoxy-2-methylnaphthalene are both present in a hair dye formulation, the maximum concentration on hair of 2-methyl-1-naphthol must not exceed 2,0 %).

To be printed on the label:
The mixing ratio.

Hair colorants can cause severe allergic reactions.
Read and follow instructions.
This product is not intended for use on persons under the age of 16.
Temporary "black henna" tattoos may increase your risk of allergy
Do not colour your hair if:

- you have a rash on your face;
- you have a sensitive scalp,
- you have an irritated and/or damaged scalp,
- you have ever experienced any reaction after colouring your hair,
- you have experienced a reaction to a temporary "black henna" tattoo in the past.

Serious allergic reactions may occur during hair colouring. Read the instructions and follow them. This product is not intended for use by persons under 16 years of age. Temporary “black henna” tattoos may increase the risk of allergy. Do not colour - you have a rash on

320	Indigofera tinctoria, dried and pulverised leaves of Indigofera tinctoria L (Indigofera tinctoria, dried and pulverised leaves of Indigofera tinctoria L)	Indigofera tinctoria leaves; Indigofera tinctoria leaf powder; Indigofera tinctoria leaf extract; Indigofera tinctoria extract (Indigofera tinctoria leaf Indigofera tinctoria leaf powder Indigofera tinctoria leaf extract Indigofera tinctoria extract) CAS No. 84775-63-3 EC No. 283-892-6	Colorant in non-oxidative hair dyes	25 percent		

321	Titanium dioxide in powder form containing 1% or more particles with an aerodynamic diameter ≤ 10 µm. (Titanium dioxide in powder form containing 1 % or more of particles with aerodynamic diameter ≤ 10 mm)	Titanium Dioxide (Titanium Dioxide) CAS No. 13463-67-7/ 1317-70-0/1317-80-2 EC No. 236-675-5/ 215-280-1/215-282-2	(a) Loose powder facial products (b) Aerosol hair sprays (c) Other products	(a) 25 percent; (b) 1,4 percent for general use and 1,1 percent for professional use	(a) (b) Only in pigment form (c) Must not be used in forms that may result in exposure of the end consumer's lungs by inhalation	
322	1,3-dihydroxy-2-propanone 1,3-Dihydroxy- 2-propanone	Dihydroxyacetone Dihydroxyacetone CAS No. 96-26-4 EC No. 202-494-5	(a) Colorant in non-oxidative hair dyes (b) Self-tanning products	(a) 6,25 percent; (b) 10 percent		

1 These substances may be used separately or in a mixture, provided that the sum of the ratios of the content of each of them in perfumery and

cosmetic products to the maximum permitted value does not exceed 1.

2 -

3 -

4 The concentration of sodium, potassium or lithium hydroxides is expressed as sodium hydroxide. When mixtures of hydroxides are used, the sum must not exceed the value specified in column 5 of this table.

5 The quantity of sodium, potassium or lithium hydroxides is expressed as sodium hydroxide. When a mixture of hydroxides is used, their total concentration must not exceed the value specified in column 5 of this table.

6 As a preservative, see reference number 34 of Annex 4 to the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011), adopted by Decision No. 799 of the Customs Union Commission dated 23 September 2011 (hereinafter, the Technical Regulation).

7 As a preservative, see reference number 43 of Annex 4 to the Technical Regulation.

8 As a preservative, see reference number 54 of Annex 4 to the Technical Regulation.

9 As a preservative, see reference number 3 of Annex 4 to the Technical Regulation.

10 Only for products that may be used for children under 3 years.

11 As a preservative, see reference number 9 of Annex 4 to the Technical Regulation.

12 As a preservative, see reference number 23 of Annex 4 to the Technical Regulation.

13 As a preservative, see reference number 8 of Annex 4 to the Technical Regulation.

14 -

15 This restriction applies to the substance, not to the finished cosmetic product.

16 The sum of these substances used in a mixture must not exceed the value specified as the "maximum concentration in the ready-to-use product".

17 The free base and salts of this substance for hair colouring may be used, unless prohibited pursuant to Annex 1 to the Technical Regulation.

18 As a preservative, see reference number 58 of Annex 4 to the Technical Regulation.

19 As a preservative, see reference number 44 of Annex 4 to the Technical Regulation.

20 For other uses of potassium hydroxide, see reference number 15d of Annex 2 to the Technical Regulation.

21 For other uses of potassium hydroxide, see reference number 15a of Annex 2 to the Technical Regulation.

22 As a preservative, see reference number 32 of Annex 4 to the Technical Regulation.

Note. The maximum permitted concentration of fluoride in oral hygiene products is indicated as the molar mass of fluorine in %, or mg/kg, or ppm.

ANNEX 3
to the Technical Regulation
of the Customs Union
"On the Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

LIST
of colorants permitted for use in perfumery and cosmetic products

Footnote. Annex 3– as amended by Decision No. 32 of the Council of the Eurasian Economic Commission dated 29.03.2019 (enters into force upon expiry of 12 months from the date of its official publication); as amended by Decision No. 64 of the Council of the Eurasian Economic Commission dated 15.04.2022 (enters into force upon expiry of 12 months from the date of its official publication).

Reference number under the EU Cosmetics Regulation	Substance identification					Conditions			Conditions of use and warnings to be brought to the attention of the consumer
	chemical name/INN/XAN	Colour Index (CI) or name	CAS number	EC number	colour	product type, body parts	maximum permitted concentration in the ready-for-use preparation	other	
1	2	3	4	5	6	7	8	9	10
1	Sodium tris(1,2-naphthoquinone 1-oximato-O,O')ferrate(1-) Sodium tris(1,2-naphthoquinone 1-oximato-O,O')ferrate(1-)	10006			green	rinse-off products			

2	Trisodium tris[5,6-dihydro-5-(hydroxyimino)-6-oxonaphthalene-2-sulphonato(2-)-N5,O6]ferrate(3-) Trisodium tris[5,6-dihydro-5-(hydroxyl-imino)-6-oxonaphtha-lene-2-sulphonato(2-)-N5,O6]ferrate(3-)	10020			green	not used in products intended for mucous membranes			

3	Disodium 5,7-dinitro-8-oxidonaphthalene-2-sulphonate and its insoluble barium, strontium and zirconium lakes, salts and pigments Disodium 5,7-dinitro-8-oxidonaphthalene-2-sulphonate and its insoluble barium, strontium and zirconium lakes, salts and pigments	10316			yellow	not to be used in products intended for application in the eye area			

4	2-[(4-Methyl-2-nitrophenyl)azo]-3-oxo-N-phenylbutyramide 2-[(4-Methyl-2-nitrophenyl)azo]-3-oxo-N-phenylbutyramide	11680			yellow	not used in products intended for mucous membranes

152	Phenol, 4,4'-(3H-2,1-benzothiol-3-ylidene)bis[2,6-dibromo-3-methyl-, S,S-dioxide Phenol, 4,4'-(3H-2,1-benzoxathiol-3-Ylidene) bis[2,6-dibromo-3-methyl-,S,S-dioxide	Bromocresol Green	76-60-8	200-972-8	green	rinse-off product			

153	Sodium 4-[(4,5-dihydro-3-methyl-5-oxo-1-phenyl-1H-pyrazol-4-yl)azo]-3-hydroxynaphthalene-1-sulphonate Sodium 4-[(4,5-di-hydro-3-methyl-5-oxo-1-phenyl-1H-pyrazol-4-yl)azo]-3-hydroxy-naphthalene-1-sulphonate	Acid Red 195	12220-24-5		red	must not be used in products for mucous membranes			

[1] If used as a UV filter, see Clause 27 of Annex 5 to the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011), adopted by Decision No. 799 of the Customs Union Commission dated 23 September 2011 (hereinafter, the Technical Regulation).

[2] If used as a UV filter, see Clauses 30 and 30a of Annex 5 to the Technical Regulation.

[3] PAHs – Polycyclic aromatic hydrocarbons.

Notes:

1. This list includes substances that produce a colouring effect as a result of absorption and reflection and does not include substances whose colouring effect is achieved by photoluminescence, interference or chemical reactions.

2. This list does not include colorants contained in hair colouring products. Colorants not specified in this list may be used in products intended for hair colouring, except for those specified in Annex 1 to the Technical Regulation and subject to the restrictions set out in Annex 2 to the Technical Regulation.

3. This list includes colorants, as well as their salts and lakes. If a colorant is specified in the form of a particular salt, its other salts and lakes are also included.

ANNEX 4
to the Technical Regulation
of the Customs Union
"On the Safety of
Perfumery and Cosmetic
Products" (TR CU 009/2011)

LIST
of preservatives permitted for use in perfumery and cosmetic products

Footnote. Annex 4 as amended by Decision No. 32 of the Council of the Eurasian Economic Commission dated 29.03.2019 (enters into force upon the expiry of 12 months from the date of its official publication); as amended by Decision No. 64 of the Council of the Eurasian Economic Commission dated 15.04.2022 (enters into force upon the expiry of 12 months from the date of its official publication).

[1] For other uses (not as a preservative) – see item 98 of Annex 2 to the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011), adopted by Decision No. 799 of the Customs Union Commission
dated 23 September 2011 (hereinafter referred to as the Technical Regulation).

[2] Only for products that may be used for children under 3 years of age and that remain in prolonged contact with the skin.

[3] For other uses (not as a preservative) – see item 13 of Annex 2 to the Technical Regulation.

[4] For other uses (not as a preservative) – see item 101 of Annex 2 to the Technical Regulation.

[5] For other uses (not as a preservative) – see item 99 of Annex 2 to the Technical Regulation.

[6] For other uses (not as a preservative) – see item 100 of Annex 2 to the Technical Regulation.

[7] For other uses (not as a preservative) – see item 45 of Annex 2 to the Technical Regulation.

[8] For other uses (not as a preservative) – see item 54 of Annex 2 to the Technical Regulation.

[9] Only if the concentration exceeds 0,05 percent.

[10] For other uses (not as a preservative) – see item 65 of Annex 2 to the Technical Regulation.

[11] Only for products intended for children under 3 years of age (except bath products, shower gels and shampoos).

[12] Only for products that may be used for children under 3 years of age.

[13] With regard to products applied to large areas of the body.

[14] For other uses (not as a preservative) – see item 197 of Annex 2 to the Technical Regulation.

[15] For other uses (not as a preservative) – see item 287 of Annex 2 to the Technical Regulation.

[16] For other uses (not as a preservative) – see item 288 of Annex 2 to the Technical Regulation.

[17] The use of methylisothiazolinone is also regulated by the requirements of item 57 of this List. The requirements of items 39
and 57 of this List are mutually exclusive: in the same product, only methylisothiazolinone (in accordance with the requirements of item 57 of this List) or only a mixture of methylchloroisothiazolinone and methylisothiazolinone (in accordance with the requirements of item 39 of this List) may be used.

[18] The use of methylisothiazolinone is also regulated by the requirements of item 39 of this List in a mixture with methylchloroisothiazolinone. The requirements of items 39 and 57 of this List are mutually exclusive: in the same product only methylisothiazolinone (in accordance with the requirements of item 57 of this List) or only a mixture of methylchloroisothiazolinone and methylisothiazolinone (in accordance with the requirements of item 39 of this List) may be used.

19 For other uses (not as a preservative) – see item 310 of Annex 2 to the Technical Regulation.

Notes:

1. For the purposes of this List, the following terms are used:

salts – salts of sodium, potassium, calcium, magnesium, ammonium and ethanolamine cations, and salts of chloride, bromide, sulfate and acetate anions;

esters – esters of methyl, propyl, isopropyl, butyl, isobutyl and phenyl.

2. Perfumery and cosmetic products containing substances specified in this List that release formaldehyde must bear the warning statement: "Contains formaldehyde" if the formaldehyde content exceeds 0,05 percent.

ANNEX 5
to the Technical Regulation
of the Customs Union
"On the Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

LIST
of UV filters allowed for use in perfumery and cosmetic products

Footnote. Annex 5 – as amended by Decision of the Council of the Eurasian Economic Commission of 29.03.2019 No. 32 (enters into force 12 months after the date of its official publication); with amendments introduced by Decision of the Council of the Eurasian Economic Commission of 15.04.2022 No. 64 (enters into force 12 months after the date of its official publication).

[1] Not required if the concentration is 0,5 % or less and the substance serves only to protect the product.

[2] For other uses (as a colorant), see entry 143 of Annex 3 to the Technical Regulation.

[3] In case of combined use of zinc oxide and zinc oxide (nano), the sum shall not exceed the limit given in column 7.

[4] In case of combined use of titanium dioxide and titanium dioxide (nano), the sum shall not exceed the limit given in column 7.

[5] In case of combined use of methylene bis-benzotriazolyl tetramethylbutylphenol and methylene bis-benzotriazolyl tetramethylbutylphenol (nano), the sum shall not exceed the value given in column 7.

Note. Terminology used in Annexes 1 – 5 to the Technical Regulation:

(a) "rinse-off products" – perfumery and cosmetic products that are removed after application on the skin, hair or mucous membranes;

(b) "leave-on products" – perfumery and cosmetic products intended for prolonged contact with the skin, hair or mucous membranes;

(c) "hair products" – perfumery and cosmetic products intended for application on the hair of the head or face, except eyelashes;

(d) "skin care products" – perfumery and cosmetic products intended for application on the skin;

(e) "lip products" – perfumery and cosmetic products intended for application on the lips;

(f) "face products" – perfumery and cosmetic products intended for application on the skin of the face;

(g) "nail products" – perfumery and cosmetic products intended for application on the nails;

(h) "oral care product" – perfumery and cosmetic products intended for application on the teeth or the mucous membrane of the oral cavity;

(i) "products intended for mucous membranes" – perfumery and cosmetic products intended for application on the mucous membranes of the oral cavity, the rims of the eyes or the external genital organs;

(j) "eye products" – perfumery and cosmetic products intended for application in the eye area;

(k) "professional use" – application and use of perfumery and cosmetic products by persons in the course of their professional activities (when providing hairdressing and/or cosmetic services).

The following designations are used to simplify substance identification:

International Non-proprietary Names (INN) for pharmaceutical substances, WHO, Geneva, August 1975;

CAS (Chemical Abstracts Service) numbers;

EC number, corresponding either to the European Inventory of Existing Commercial Chemical Substances (EINECS) numbers, or to the European List of Notified Chemical Substances (ELINCS) numbers, or to the registration number under Regulation (EC) No 1907/2006;

XAN, which is a name approved by a specific country (X), for example, USAN, corresponding to the name approved in the USA.

The substances listed in Annexes 2 – 5 to the Technical Regulation do not cover nanomaterials, except where the nano form of a substance is specifically listed.

ANNEX 6
to the Technical Regulation

of the Customs Union
"On Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

REQUIREMENTS
for the pH value of perfumery and cosmetic products

Footnote. Annex 6 is set out in the wording of Decision No 32 of the Council of the Eurasian Economic Commission dated 29.03.2019 (enters into force after 12 months from the date of its official publication), as amended by Decision No 114 of the Council of the Eurasian Economic Commission dated 29.11.2024 (enters into force after 12 months from the date of its official publication).

Products	pH limit	
1. Cosmetic skin-care, hair-care, nail-care and lip products, and products for the external genital organs (intimate cosmetics)	3,0 – 9,0	
2. Rinse-off hair balms, rinses and conditioners	2,5 – 9,0	
3. Liquid cosmetic skin-care, hair-care and nail-care products	2,5 – 9,0	
4. Powdered and alginate masks (ready-to-use, after mixing the powder with a solvent in accordance with the instructions for use)	3,0 – 10,0	
5. Cosmetic hand-cleansing products	3,0 – 11,5	
6. Cosmetic products for softening calloused (hardened) skin: for professional use	3,0 – 12,7	
other	5,0 – 10,0	
7. Peeling products based on acids and/or enzymes: for professional use	1,2 – 9,0	
other	3,0 – 9,0	

8. Cosmetic products for depilation (hair removal)	3,0 – 12,7	
9. Hygienic cleansing cosmetic products (bath foam, cleansing gels, cleansing products, shampoos, liquid soap)	3,5 – 10,0	
10. Cosmetic shaving products	3,5 – 11,5	
11. Deodorants, antiperspirant deodorants, antiperspirants (cream, gel or liquid)	3,0 – 10,0	
12. Emulsion-based make-up products, water-based make-up gels (foundations, blusher, liquid eye shadow, lip, face and body gloss, etc.)	4,0 – 9,0	
13. Liquid mascara, liquid hair mascara, liquid eyeliner	4,5 – 10,0	
14. Children's and family skin-care, hair-care, nail-care and lip cosmetics, and cosmetics for the external genital organs (intimate cosmetics), including products intended for children under 14 years of age Children's and family hygienic cleansing cosmetic products, including products intended for children under 14 years of age (bath foam, cleansing gels, cleansing products, liquid soap, shampoos) Children's and family cosmetic products on substrates, including products intended for children under 14 years of age Baby powder, talc, powder (under 3 years)	4,5 – 9,0 3,5 – 10,0 3,0 – 9,0 6,0 – 8,0	

15. Tattoo cosmetics	4,0 – 10,0	
16. Cosmetic products for removing (softening) the cuticle (acid- or alkali-based)	2,0 – 12,5	
17. Water-based nail lacquers	6,0 – 9,5	
18. Cosmetic products for hair colouring and lightening (bleaching), products for removing dye from hair, colouring products: cosmetic hair-colouring products based on colourants and/or pigments of plant origin	3,5 – 8,0	
ready-to-use hair-colouring formulation	7,0 – 11,0	
ready-to-use formulation for hair lightening (bleaching) and highlighting	3,5 – 11,0	
products for removing dye from hair	3,0 – 11,0	
hair colouring products	3,5 – 10,0	
19. Cosmetic products for permanent waving and chemical straightening of hair: hair-shaping product	7,0 – 11,5	
fixing composition (fixative)	2,0 – 4,0	
20. Oral hygiene products: toothpastes and tooth powders	4,5 – 10,5	
liquid oral hygiene products	3,0 – 10,5	

tooth-whitening products containing hydrogen peroxide or other components that release hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an ingredient or released) of 0,1 – 6,0%	4,0 – 10,5	".

Note. The pH value for family cosmetics not intended for children under 14 years of age is determined in accordance with their product designation and intended use.

Annex 7
to the Technical Regulation of the CU
"On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011)

Microbiological Safety Parameters of Perfumery and Cosmetic Products

Footnote. Annex 7 as amended by decisions of the Council of the Eurasian Economic Commission dated 29.03.2019 No. 32 (enters into force upon expiry of 12 months from the date of its official publication); dated 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication).

Groups	Type of Cosmetic Products	Total Number of Mesophilic Aerobic Microorganisms	Candida albicans	Escherichia coli	Staphylococcus aureus	Pseudomonas aeruginosa
Group 1	Children's cosmetics, eye-area cosmetics, lip products, intimate cosmetics, oral hygiene products, family cosmetics, including those intended for children under 14 years	Not more than 10^2, CFU* per 1 g (ml)	Must not be present in 0,5 g or 0,5 ml	Must not be present in 0,5 g or 0,5 ml	Must not be present in 0,5 g or 0,5 ml	Must not be present in 0,5 g or 0,5 ml
Group 2	Other cosmetic products	Not more than 10^3, CFU* per 1 g (ml)	Must not be present in 0,1 g or 0,1 ml	Must not be present in 0,1 g or 0,1 ml	Must not be present in 0,1 g or 0,1 ml	Must not be present in 0,1 g or 0,1 ml
Group 3	Sterile perfumery and cosmetic products	Compliance with sterility requirements				
* CFU – colony-forming units.						

Note. The microbiological requirements for family cosmetics not intended for children under 14 years are determined according to their intended use.

ANNEX 8
to the Technical Regulation
of the Customs Union

REQUIREMENTS
for the Toxicological Parameters of Perfumery and Cosmetic Products

Footnote. Annex 8 as set out in the decision of the Council of the Eurasian Economic Commission dated 29.03.2019 No. 32 (enters into force upon expiry of 12 months from the date of its official publication); as amended by the decision of the Council of the Eurasian Economic Commission dated 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication).

Name and Intended Use of Cosmetic Products	Toxicological Safety Parameters		
	skin irritation *(in vivo* or *in vitro)*	mucosal irritation *(in vivo* or *in vitro)*	systemic toxic effect (toxicity index), determined by alternative methods (in vitro)
1	2	3	4
1. Cosmetic products: for skin, hair, nail, lip and external genital care (intimate cosmetics); decorative cosmetics; for protecting the skin against exposure to harmful occupational factors; hygienic cleansing products for the hair, face and body (bath foam, cleansing gels, cleansing products, shampoos, liquid soap), including fat-based products; products on substrates. Children's cosmetics, family cosmetics	0 points (absence)	0 points (absence)	absence

2. Cosmetic products: for skin, hair, nail, lip and external genital care (intimate cosmetics) containing alcohol (more than 10 % by volume); sun-protection products; whitening products; self-tanning products; containing fruit acids and their derivatives; for problem skin; for body shaping; for imparting or preventing odour (deodorants, antiperspirants, deodorant-antiperspirants); for bathing; for shaving; tattoo cosmetics; for hair styling; solid toilet soap; for hand cleansing; for softening keratinised (roughened) skin; for removing (softening) the cuticle; enzyme-based peeling products; scrubs; gommages; exfoliants; powdered and alginate masks applied after mixing the powder with a solvent	0 points (absence)	–	absence
3. Perfumery Products	0 points (absence)	–	absence
4. Cosmetic products: for manicures and pedicures; for colouring and tinting the hair, eyelashes and eyebrows; for lightening and highlighting; for permanent waving and hair straightening; for depilation	not more than 1 point	–	absence

5. Acid-based peeling products	not more than 2 points	–	absence
6. Oral hygiene products, except for tooth-whitening products specified in item 7 of these requirements	–	0 points (absence)	absence
7. Tooth-whitening products containing hydrogen peroxide or other components that release hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an ingredient or released) of 0,1 – 6,0%	–	not more than 1 point	absence

Notes:

1.Toxicological assessment is performed:

either by determining the systemic toxic effect (toxicity index) and mucosal irritation (using alternative methods *(in vitro)*);

or by determining skin irritation and mucosal irritation (using laboratory animals *(in vivo)* or alternative methods *(in vitro)*).

If test results for perfumery and cosmetic products obtained using alternative methods *(in vitro)* do not comply with these Requirements, additional testing using laboratory animals *(in vivo)* is performed at the applicant's decision.

2.Mucosal effects are not determined for:

products listed in items 2 – 5 of these Requirements;

products causing irritation of the skin (1 point or more);

products with a pH value below 3,0 or above 11,5.

3. Toxicological parameters for family cosmetics not intended for children under 14 years are determined according to their name and intended use.

ANNEX 9
to the Technical Regulation
of the Customs Union
"On the Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

REQUIREMENTS
for the Clinical (Clinical and Laboratory) Parameters of Perfumery and Cosmetic Products

Footnote. Annex 9 as set out in the decision of the Council of the Eurasian Economic Commission dated 29.03.2019 No. 32 (enters into force upon expiry of 12 months from the date of its official publication); as amended by the decision of the Council of the Eurasian Economic Commission dated 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication).

Name and Intended Use of Cosmetic Products	Irritant Effect	Sensitising Effect
1. Cosmetic products: for skin, hair, nail, lip and external genital care (intimate cosmetics); sun-protection products; whitening products; self-tanning products; containing plant extracts, fruit acids and their derivatives; for problem skin; for body shaping; for imparting or preventing odour; hygienic cleansing products for the hair, face and body; perfumery products, solid toilet soap; for bathing; for shaving; for make-up; for manicures and pedicures; for hair styling; for protecting the skin against exposure to harmful occupational factors; for tattooing; scrubs; gommages; exfoliants; enzyme-based peeling products; products on substrates. Children's cosmetics. Family cosmetics. Oral hygiene products, except for tooth-whitening products specified in item 3 of these requirements	0 points (absence)	0 points (absence)
2. Cosmetic products*: for colouring and tinting the hair, eyelashes and eyebrows; for lightening and highlighting; for permanent waving and hair straightening; for depilation	not more than 1 point	0 points (absence)
3. Tooth-whitening products containing hydrogen peroxide or other components that release hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an ingredient or released) of 0,1 – 6,0%	not more than 1 point	0 points (absence)

* Clinical (clinical and laboratory) parameters (irritant effect, sensitising effect) are not determined for perfumery and cosmetic products with a pH value ≤ 2,5 or ≥11,5 or causing an irritant effect in animals (in vivo).

Annex 10
to the Technical Regulation of the CU
"On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011)

No. item	Product Type	name of the parameter	characteristic and limit
1	2	3	4
1.	Toothpastes, gels, powders	Demineralising effect*	Absence of new demineralisation lesions
2.	Liquid oral hygiene products (balms, fresheners, deodorants, elixirs, mouthwashes, rinses)		
3.	Tooth-whitening products containing hydrogen peroxide or other components that release hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an ingredient or released) of 0,1% - 6,0%.		

Note:

* Determined for oral hygiene products with a

declared pH below 5,5 and in the presence in the oral hygiene

product of substances causing enamel demineralisation.

Annex 11
to the Technical Regulation of the CU
"On the Safety of Perfumery and Cosmetic
Products" (TR CU 009/2011)

Symbol Indicating the Presence of Additional Information on Perfumery and Cosmetic Products

Figure 1

Annex 12
to the Technical Regulation of the CU
"On the Safety of Perfumery and Cosmetic
Products" (TR CU 009/2011)

List of Perfumery and Cosmetic Products Subject to State Registration

Note. The List as amended by decisions of the Council of the Eurasian Economic Commission dated 02.12.2015 No. 91 (enters into force upon

expiry of 12 months from the date of its official publication); dated 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication)..

1. Perfumery and Cosmetic Products for self-tanning

2. Perfumery and Cosmetic Products for skin whitening (lightening)

3. Tattoo cosmetics

4. Intimate cosmetics

5. Perfumery and Cosmetic Products for individual protection of the skin against the effects of harmful occupational factors

6. Children's cosmetics

7. Perfumery and Cosmetic Products for chemical colouring, lightening and highlighting of hair, including eyebrows and eyelashes

8. Perfumery and Cosmetic Products for permanent waving and hair straightening, including eyebrows and eyelashes

9. Perfumery and Cosmetic Products manufactured using nanomaterials

10. Perfumery and Cosmetic Products for depilation

11. Peeling Products

12. Fluoride-containing oral hygiene products in which the mass fraction of fluorides exceeds 0,15% (for liquid oral hygiene products - 0,05%) (expressed as the molar mass of fluorine).

13. Tooth-whitening products containing hydrogen peroxide or other components that release hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an

ingredient or released) of 0,1% - 6,0%. Hydrogen peroxide, including carbamide peroxide and zinc peroxide, with a hydrogen peroxide concentration (as an ingredient or released) of 0,1%-6,0%.

14. Family cosmetics intended, among other things, for children under 14 years

ANNEX 13
to the Technical Regulation
of the Customs Union
"On the Safety of Perfumery and
Cosmetic Products"
(TR CU 009/2011)

GENERAL CRITERIA
for substantiation of claims made regarding the consumer properties of Perfumery and Cosmetic Products

Note. Annex 13 as amended by decision of the Council of the Eurasian Economic Commission dated 29.11.2024 No. 114 (enters into force upon expiry of 12 months from the date of its official publication).

1. Claims must not contain information on approval by executive authorities of the Member States.

2. Claims declaring the absence of substances prohibited for use in Perfumery and Cosmetic Products by acts forming part of the law of the Eurasian Economic Union are not permitted.

3. Claims regarding the properties of ingredients must not be extended to the properties of products without substantiation.

4. The level of evidence or substantiation must correspond to the type of claims, particularly with regard to claims where the absence of a result may prove unsafe (for example, claims regarding the properties of sunscreen products (SPF Factor)).

5. Claims of an abstract nature regarding consumer properties that are perceived by consumers as obvious exaggeration do not require confirmation (for example: "These perfumes will make you soar" and the like).

6. Claims must be based on data available to the manufacturer (for example, studies conducted on volunteers, including under clinical conditions, and/or through studies conducted on model samples, and/or using instrumental methods, and/or based on scientific data for ingredients included in the composition of Perfumery and Cosmetic Products).

7. If it is claimed that Perfumery and Cosmetic Products contain a particular ingredient, that ingredient must actually be present in the composition of the Perfumery and Cosmetic Products.

APPROVED
by Decision of the
Customs Union Commission
dated 23 September 2011 No. 799
(as amended by Decision of the Board of the
Eurasian Economic
Commission
dated 21 May 2019 No. 80)

LIST

of International and Regional (Interstate) Standards, or, in their absence, National (State) Standards, through the application of which, on a voluntary basis, compliance with the requirements of the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011) is ensured

Note. The List as set out in the decision of the Board of the Eurasian Economic Commission dated 21.05.2019 No. 80 (enters into force upon expiry of 30 calendar days from the date of its official publication).

236	clause 3.3 STB 1671-2006	Emulsion-Based Make-Up Products. General Specifications	applies until 01.01.2021
237	clause 3.3 STB 1672-2006	Fat-and-Wax-Based Make-Up Products. General Specifications	applies until 01.01.2021
238	clause 3.3 STB 1673-2006	Cosmetic Creams. General Specifications	applies until 01.01.2021

239	clause 3.3 STB 1674-2006	Powdered and Compact Cosmetic Products. General Specifications	applies until 01.01.2021
240	clause 3.3 STB 1675-2006	Hygienic Washing Cosmetic Products. General Specifications	applies until 01.01.2021
241	clause 3.3 STB 1736-2007	Liquid Oral Hygiene Products. General Specifications	applies until 01.01.2021
242	clause 3.3 STB 1886-2008	Cosmetic Nail Care Products. General Specifications	applies until 01.01.2021
243	clause 3.3.1 STB 1949-2009	Cosmetic Gels. General Specifications	applies until 01.01.2021
244	clause 3.3.1 STB 1973-2009	Liquid Perfumery Products. General Specifications	applies until 01.01.2021
245	clause 3.3 STB 2217-2011	Cosmetic Shaving Products. General Specifications	applies until 01.01.2021
246	clause 4.3.1 STB 2240-2011	Perfumery and Cosmetic Products in Aerosol Packaging. General Specifications	applies until 01.01.2021
247	clause 3.3.1 ST RK GOST R 51577-2003	Liquid Oral Hygiene Products. General Specifications	applies until 01.01.2021
248	clause 3.3.1 GOST R 51577-2000	Liquid Oral Hygiene Products. General Specifications	applies until 01.01.2021
249	clauses 5.3.1 and 5.3.4 GOST 34435-2018	Perfumery and Cosmetic Products. Liquid Oral Hygiene Products. General Specifications	

250	clause 9 of Article 5	clause 3.3.1 GOST 5972-2017	Tooth Powders. General Specifications	
251		Section 5 GOST 27429-2017	Liquid Perfumery and Cosmetic Products. Packaging, Labelling, Transportation and Storage	applies from 01.01.2020
252		Section 5 GOST 28303-2017	Perfumery and Cosmetic Products. Packaging, Labelling, Transportation and Storage	applies from 01.01.2020

APPROVED
by Decision No. 799 of the Customs Union Commission
dated 23 September 2011
(as amended by Decision No. 46 of the Board
of the Eurasian Economic Commission
dated 17 May 2016)

List of
International and Regional (Interstate) Standards and, in their absence, National (State) Standards Containing Rules and Methods for Research (Testing) and Measurement, Including Sampling Rules, Necessary for the Application and Fulfilment of the Requirements of the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011) and Conformity Assessment of Objects of Technical Regulation

Footnote. The heading was amended by Decision No. 54 of the Board of the Eurasian Economic Commission dated 10.04.2018 (enters into force upon the expiry of 30 calendar days from the date of its official publication).

Footnote. The List is set out in the wording of Decision No. 46 of the Board of the Eurasian Economic Commission dated 17.05.2016 (enters into force upon the expiry of 30 calendar days from the date of its official publication), as amended by Decisions dated 29.08.2017 No. 110 (enters into force upon the expiry of 30 calendar days from the date of its official publication), dated 10.04.2018 No. 54 (enters into force upon the expiry of 30 calendar days from the date of its official publication), and dated 21.05.2019 No. 80 (enters into force upon the expiry of 30 calendar days from the date of its official publication).

No. No.	Elements of the Customs Union Technical Regulation	Standard designation	Standard title	Note
1	2	3	4	5
1	Clause 3 of Article 5	Section 2 of GOST 790-89	Solid Laundry Soap and Solid Toilet Soap. Acceptance Rules and Measurement Methods	
2		Clause 6.8 of GOST 7983-99	Toothpastes. General Specifications	applicable until 01.09.2019
2[1]	Clause 3 of Article 5	Clause 6.8 of GOST 7983-2016	Toothpastes. General Specifications	
3		Section 2 of GOST 29188.0-91	Perfumery and Cosmetic Products. Acceptance Rules, Sampling, Organoleptic Testing Methods	applicable until 01.07.2018
4		GOST 29188.2-91	Cosmetic Products. Method for Determining the pH Value	applicable until 01.07.2018
5		GOST 29188.2-2014	Perfumery and Cosmetic Products. Method for Determining the pH Value	
6		Clause 6.8 of STB 1736-2007	Liquid Oral Hygiene Products. General Specifications	applicable until 01.01.2021

6[1]	Clause 8.8 of GOST 34435-2018	Perfumery and Cosmetic Products. Liquid Oral Hygiene Products. General Specifications		
6[2]	Clause 7.6 of GOST 34436-2018	Perfumery and Cosmetic Products. Tooth-Whitening Products. General Specifications		
7	Clause 6.8 of GOST R 51577-2000	Liquid Oral Hygiene Products. General Specifications	applicable until 01.01.2021	
8	Clause 6.8 of ST RK GOST R51577-2003	Liquid Oral Hygiene Products. General Specifications	applicable until 01.01.2021	
9	Clauses 3–6 of Article 5	Sections 3 and 4 of GOST 29188.0-2014	Perfumery and Cosmetic Products. Acceptance Rules, Sampling, Organoleptic Testing Methods	
10	Clauses 3, 5 and 6 of Article 5	GOST ISO 212-2014	Essential Oils. Sampling	
11	Clause 4 of Article 5	GOST ISO 18416-2013	Perfumery and Cosmetic Products. Microbiology. Detection of Candida albicans	applicable until 01.01.2021
11[1]		GOST ISO 18416-2018	Perfumery and Cosmetic Products. Microbiology. Detection of Candida albicans	

12	GOST ISO 21148-2013	Perfumery and Cosmetic Products. Microbiology. General Requirements for Microbiological Control	
13	GOST ISO 21149-2013	Perfumery and Cosmetic Products. Microbiology. Enumeration and Detection of Mesophilic Aerobic Microorganisms	
14	GOST ISO 21150-2013	Perfumery and Cosmetic Products. Microbiology. Detection of Escherichia coli	applicable until 01.01.2021
14[1]	GOST ISO 21150-2018	Perfumery and Cosmetic Products. Microbiology. Detection of Escherichia coli	
15	GOST ISO 22717-2013	Perfumery and Cosmetic Products. Microbiology. Detection of Pseudomonas aeruginosa	applicable until 01.01.2021
15[1]	GOST ISO 22717-2018	Perfumery and Cosmetic Products. Microbiology. Detection of Pseudomonas aeruginosa	

16	GOST ISO 22718-2013	Perfumery and Cosmetic Products. Microbiology. Detection of Staphylococcus aureus	applicable until 01.01.2021	
16[1]	GOST ISO 22718-2018	Perfumery and Cosmetic Products. Microbiology. Detection of Staphylococcus aureus		
17	ST RK ISO 16212-2011	Cosmetics. Microbiology. Enumeration of Yeasts and Moulds	applicable until 01.07.2019	
17[1]	Clauses 4 and 7 of Article 5	GOST ISO 16212-2016	Perfumery and Cosmetic Products. Microbiology. Enumeration of Yeasts and Moulds	applicable from 1.09.2017
18	Clause 4 of Article 5	ST RK ISO 18415-2009	Cosmetics. Microbiology. Detection of Specified and Unspecified Microorganisms	applicable until 01.07.2019
18[1]	Clauses 4 and 7 of Article 5	GOST ISO 18415-2016	Perfumery and Cosmetic Products. Microbiology. Detection of Specified and Unspecified Microorganisms	applicable from 1.09.2017

18[2]	Clause 4 of Article 5	GOST 33918-2016	Perfumery and Cosmetic Products. Method for Determining Sterility	applicable from 1.01.2018
18[3]	Clauses 4 and 7 of Article 5	GOST ISO 29621-2013	Cosmetic Products. Microbiology. Guidelines for the Risk Assessment and Identification of Microbiologically Low-Risk Products	
18[4]		GOST ISO 11930-2014	Cosmetic Products. Microbiology. Evaluation of the Antimicrobial Protection of Cosmetic Products	
19	Clause 5 of Article 5	GOST 26927-86	Raw Materials and Food Products. Method for Determining Mercury	applicable until 01.07.2018
20		GOST 26930-86	Raw Materials and Food Products. Method for Determining Arsenic	applicable until 01.07.2018
21		GOST 26932-86	Raw Materials and Food Products. Method for Determining Lead	applicable until 01.07.2018
22		GOST 30178-96	Raw Materials and Food Products. Atomic Absorption Method for Determining Toxic Elements	applicable until 01.07.2018

23	GOST 31676-2012	Perfumery and Cosmetic Products. Colorimetric Methods for Determining the Mass Fractions of Mercury, Lead, Arsenic and Cadmium	
24	GOST 32936-2014	Perfumery and Cosmetic Products. Stripping Voltammetric Method for Determining Mercury	
25	GOST 32937-2014	Perfumery and Cosmetic Products. Stripping Voltammetric Method for Determining Lead	
26	GOST 32938-2014	Perfumery and Cosmetic Products. Stripping Voltammetric Method for Determining Arsenic	
27	GOST 33021-2014	Perfumery and Cosmetic Products. Determination of the Mass Fraction of Arsenic by Atomic Absorption with Hydride Generation	

28	GOST 33022-2014	Perfumery and Cosmetic Products. Determination of the Mass Fraction of Mercury by Flameless Atomic Absorption		
29	GOST 33023-2014	Perfumery and Cosmetic Products. Determination of the Mass Fraction of Lead by Atomic Absorption with Electrothermal Atomisation		
30	Clause 6 of Article 5	GOST 32893-2014	Perfumery and Cosmetic Products. Methods for the Assessment of Toxicological and Clinical and Laboratory Safety Indicators	
30[1]		MR 1.1.0120-18	Rapid Method for the Toxicological and Hygienic Assessment of Perfumery and Cosmetic Products Using a Luminescent Bacterial Test (Using a BIOTOKS-10-Type Luminometer)	applicable until amendments are made to GOST 32893-2014 and GOST 33506-2015. Applicable only to perfumery and cosmetic products not covered by GOST 32893-2014 and GOST 33506-2015

31	GOST 33483-2015	Perfumery and Cosmetic Products. Methods for Determining and Assessing Clinical and Laboratory Safety Indicators	applicable from 01.07.2016	
32	GOST 33506-2015	Perfumery and Cosmetic Products. Methods for Determining and Assessing Toxicological Safety Indicators	applicable from 01.07.2016	
32[1]		GOST ISO 28888-2018	Perfumery and Cosmetic Products. Screening Method for Assessing the Ability of Liquid Oral Hygiene Products to Cause Erosion of Hard Dental Tissues	
32[2]		Clauses 7.9 and 7.10 of GOST 34436-2018*	Perfumery and Cosmetic Products. Tooth-Whitening Products. General Specifications	
33	Clauses 2 and 7 of Article 5	GOST ISO 14714-2017*	Essential Oils and Extracts of Fragrance Compounds. Method for Determining Residual Benzene Content	
33[1]		GOST ISO 1272-2016*	Essential Oils. Method for Determining Phenol Content	

34	clauses 2.1, 2.2 and 2,4 of Article 5	GOST ISO 10130-2016*	Cosmetic Products. Detection and determination of the content of N-nitrosodiethanolamine (NDELA) by high-performance liquid chromatography (HPLC) with post-column photolysis and derivatisation	applicable from 1.07.2019
35		GOST ISO 15819-2016*	Cosmetic Products. Detection and determination of the content of N-nitrosodiethanolamine (NDELA) by high-performance liquid chromatography with tandem mass spectrometry (HPLC-MS-MS)	applicable from 1.07.2019
36	clauses 2.1 and 7 of Article 5	GOST EN 16521-2016*	Perfumery and Cosmetic Products. Gas Chromatography/Mass Spectrometry method for the identification and determination of 12 phthalates	applicable from 1.07.2019
37	clauses 2.2 and 7 of Article 5	GOST EN 16342-2016*	Anti-dandruff Cosmetic Products. Determination of the content of zinc pyrithione, piroctone olamine and climbazole	applicable from 1.07.2019

37[1]		GOST EN 16274-2018*	Perfumery and Cosmetic Products. Methods for the analysis of allergens. Determination of the quantity of potential allergens in fragrance compositions of consumer products. Stage 1. Gas chromatographic analysis of the prepared sample	
37[2]		clause 7.7 of GOST 34436-2018*	Perfumery and Cosmetic Products. Tooth-Whitening Products. General Specifications	
38	clauses 2.4 and 7 of Article 5	GOST EN 16343-2016*	Cosmetic Products. Determination of the content of 3-iodo-2-propynyl butylcarbamate (IPBC) by liquid chromatography and mass spectrometry methods	applicable from 1.07.2019
39	clause 2.5 of Article 5	GOST EN 16344-2016*	Sun-Protection Cosmetic Products. Qualitative determination of UV filters and quantitative determination of 10 UV filters by high-performance liquid chromatography	applicable from 1.07.2019

40	clauses 4 and 5 of Article 6	GOST ISO 24442-2016*	Cosmetic Products. Method for the in vivo determination of the sun-protection factor against ultraviolet A radiation	applicable from 1.07.2019
41		GOST ISO 24443-2016*	Sun-Protection Cosmetic Products. Method for the in vitro determination of the sun-protection factor against ultraviolet A radiation	applicable from 1.07.2019
42		GOST ISO 24444-2013*	Cosmetic Products. Sun-protection testing methods. Determination of the sun-protection factor (SPF) on living organisms (in vivo)	
43		clause 7.15 of GOST 34436-2018*	Perfumery and Cosmetic Products. Tooth-Whitening Products. General Specifications	

* If necessary, the standards may be applied during State Control (Supervision) of compliance with the requirements of the Customs Union Technical Regulation "On the Safety of Perfumery and Cosmetic Products" (TR CU 009/2011).
